CAMROSE.

Bulletin News Service.
In drilling for water on the property at the rear of the Camrose Hotel, a fine seam of coal was struck at a depth of about 200 feet. The operators claim they drilled through two seams, about 9 and 7 feet each, and separated them by the use of only a few inches of clay. This seam has been found at several other places in and out of town, and varying depths, sometimes only 50 feet below the surface, which should prove that this locality is underlain with this most valuable mineral. The opening and operation of a coal mine in this town would, no doubt, be a paying investment, and the coal would be practically unlimited. The product could be shipped from here to points east as far as Winnipeg. If an expert and capitalist came along and offered to go into such a proposition, there is no doubt the citizens of Camrose would gladly subscribe one-half of the capital for the enterprise.

Quite a number from this town journeyed to Bawlf on Monday, to be present at the opening of the new Methodist Church. On Sunday Rev. Dr. Daly, of Wetaskiwin, filled the pulpit at both services. On Monday evening a tea was given by the ladies of the town in the Public School building, after which the crowd gathered in the church, where a good program of songs, recitations and speeches was rendered. The Methodist of Bawlf deserve great credit for the progressive spirit they have shown in erecting the pioneer church in this rising town.

Mr. E. C. Roper, Provincial weed inspector for this district, spent several days in this vicinity this week in connection with his work.

Large quantities of lumber are being taken from here to points along the Grand Trunk Pacific, mostly to these new towns at present. Some mornings as many as a dozen teams, heavily laden, can be seen leaving town, heading for the north country.

Mrs. Harry Foucar, postmaster, is building a residence on the corner of Sullivan street and Alberta avenue. The sidewalk has been completed from the Baptist Church east as far as Fourth street, a distance of six blocks.

The following citizens, with their families, are spending the month of August at the beach, at Billera Lake:

Duncan Sampson, R. B. Rice and Dr. Stewart.
Rev. E. H. Sawers, of Brucedale, Ont., is visiting his former home south of town. Mr. Sawers is very much taken with the country, and will no doubt mention Camrose favorably on his return.

A petition is being circulated today asking that the "central" for the telephone located in the new Pike Block. It is being freely signed.

Red Deer that the government is seriously thinking of establishing a pork and beef factory, not for competition with other factories, but really to relieve the present state of affairs, and find out what there is in it. And from what can be learned, the public is in full sympathy with the proposed undertaking, not that it will be a paying concern, but it will always have an influence over the others, so that they will have to pay what is nearly right or go without. The government of Alberta is going about things in a practical way, and they have the full confidence of the people to back them up. I might say without any flattery that in Alberta we have one of the best governments in Canada today. And as another instance of the good derived from the A. F. A., whenever or wherever there were any A. F. A. delegates sent to the different sittings of the different commissions, it was admitted the evidence produced by those delegates was of a material benefit in assisting the clearing up of that monopoly existed to the detriment of the public good, and the advancement of the country in general.

The next step was the receiving of the names for membership, which was very successfully carried out when a large number subscribed their names to the roll. The next meeting will be held on Saturday, the 17th inst., at the same place at 7.30 p.m., when the election of officers will take place and any other business in connection with the association will be dealt with.
