CLEANLINESS' IS HEALTH

By the use of Gillett's Lye, house cleaning is made a pleasure instead of a drudgery. It softens the water and cleans thoroughly whether the dirt is visible or invisible. Destroys all bacteria and infectious germs, removes obstructions from drain pipes, closets, sinks, etc. Refrigerators are made delightfully fresh and clean by using one teaspoonful of Gillett's Lye dissolved in two gallons of water.

"GILLETT'S LYE EATS DIRT"

are almost entirely confined to Portugal and Spain. Both of these markets were practically uncontracted last season, so far as shippers were as to supplies although an attempt

was made to uphold prices.

The only markets to which effective control was applied were Brazil and Italy, and in neither of these markets were any losses made that were not attributable to fish arriving in poor

The stocks of old fish are relatively small, this surely must be a good sign. I regard the opposition of the West

has been the strain all the way through the address, and that is, that

stated he would like me to attend some meetings of the Exporters. That I think would be beneficial and we would work much better together. If by certain interests to lay their views before you and for that purpose I will an Exporters' Association is established they will have me with them very often, because I will be a member as an exporter and as Minister of Marine and Fisheries, I can attend if necessary at any time in that capacity. Before we disperse I trust you will have made up your minds to establish such an association.

words as possible my views on this matter: "The Fishery Regulations." I would say that I am not actuated by Regarding the carrying out of the any selfish motive in anything I may say on this question. I was a fisherregulations, you may be quite certain that this will be done in accordance with the Act. The Commission have man for sixteen years of my life and afterwards carried some of our proas yet been unable to propose regula-tions to the Governor-in-Council. Had ducts to foreign markets and when the they been able to do so, the present regulations would have been rescinded. of the reasons why we did not get further in the work of the Commistion was that all our transactions at the first meeting were made public along the street and there did not be any confidence established. because of conflicting reports which

best ways and means for the exporta-tion of our greatest industry is adopted I will agree with it on general principles even though it is not in accord with my views. I have been asked to represent, with others, Burir. Board of Trade and Grand Bank and Fortune Exporters. I think these par-ties will bear me cut when I say that a great deal of the opposition that the Fishery Regulations have met with from those parts is because of the overbearing way in which they were commenced to be carried out by the Advisory Board. Common courtesy costs nothing and men with the interest that men of S. Harris, G. & A. Buffett, Hollett Bros., who are only DOUGLAS ypes of the many men who have been fishermen, and are to-day assisting the fishermen around them to become shareholders in their vessels, owners owners of their own homes, and whose earning powers are away above the average salaried man. Ibelieve should not be interfered with hile trying to dispose of their his in any market in the world, but should be encouraged Stops Bleeding Instantly and assisted in the marketing and putting into consumption all the fish at good profitable results to all con-cerned. Therefore, while I agree in part with the Regulations, I feel that the fishermen will be the greatest sufferers, as their fish will be culled Prevents Blood Poisoning All Inflamation according to Standardization of cull and the outcome of that will be very little No. 1, the greater part No. 2 and West India. To spring this so suddenly will be a hardship to the men who can ill afford to bear it. The merchants on the West Coast are prepared to pay within a narrow margin of the worth of the fish. Unless they GEORGE NEAL

read a short memorandum which I

Memorandum. I would like to express in as few

have prepared for that purpose.

The Exporters'

were circulated. That threw a cloud over the work of the Commission. The next fact that presented itself was that this conference was to take place, because at the first meeting of the Commission we decided to call this conference, and we fixed a date and gave due notice. Having given such notice we thought the exporters with foreign fish importers and make the best bargain possible, the result will be no outlitting for the Bank fishery. This would be, as I see it, a deplorable state of affairs. To understand better the value of the West Coast fisheries in this country go to the Minister of the country has sufficience and Customs, to the Minister of Finance and Customs, to the Minister of Posts and Telegraphs, and you find (Continued from page 9.)

I would like to give expression to may own personal feelings on the subject. I have been throughout a supporter of Control, and have on several occasion endeavoured to explain why I take the views I do. Since previously making my declaration, we have had control in force for a matter of six menths, and it should be possible to say whether in that time the Control has operated to the advantage

Such notice we thought the exporters builting up to the Minister of Finance and Customs, to the Minister of Posts and Telegraphs, and you find that the figures have mounted up to large sums and we have not been a whit behind any part of this country in contributing to the revenue and fillings are regarding the past regulations, and what suggestions you have the find out where the faults and fillings are regarding the past regulations, and what suggestions you have the sum of the first operated good for the greatest go of sky marths, and it should be possible to say whether in that time the Control has operated to the advantage or otherwise of Newfoundland. What do we find?

That the heavy stocks of fish held in January last have practically been marketed.

That very heavy losses have been market and under what conditions. The stocks of old fish on hand to-day are comparatively small.

That the West Coast shippers claim that they are seriously hampered in the business by the restriction against shipments of cargoes unsold.

These points are all conflicting when considered, but on careful analysis they present a different complexion.

In what markets have the very heavy losses that are reported been made? So far as I understand they are almost entirely confined to Possible to say whether in that time the graph and the commission will live up to the Act. We must decide as to up to the Act. We must decide as to up to the Act. We must decide as to up to the Act. We must decide as to up to the Act. We must decide as to up to the Act. We must decide as to up to the Act. We must decide as to up to the Act. We must decide as to up to the Act. We must decide as to up to the Act. We must decide as to up to the Act. We must decide as to up to the Act. We must decide as to up to the Act. We must decide as to up to the Act. We must decide as to say in that the years practically been marketed.

In that the beary stocks of fish held in January last have practically been marketed.

That very heavy losses have been market and under what conditions. The stocks of old fish on hand to-day mere an inspector in general, who their fish for \$11.00, \$10.50, and \$9.00.

These advices are vague as there is no pay those prices and the result, later on, will be felt by the fishermen to the part of the advised to hold their fish for \$11.00, \$10.50, and \$9.00.

The proper of the advised to hold their fish for \$11.00, \$10.50, and \$9.00.

The proper of the fishermen to adjust the seminand the proper of the fishermen to adjust the fish for the advised to hold

the Government. The meeting is now open for general discussion.

MR. PATTEN—I want to call your attention, Mr. Charman, to a few remen would suffer unnecessarily through strictness of cull. He also complained of the manner in which effect that some of us had only been in the business has not grown up overnight. We can trace our operations back for many years. In 1908 I was in Oporto with a cargo of our own fish and saw many years. In 1908 I was in Oporto with a cargo of our own fish and saw conditions there just exactly as they ermen there are mostly sharemen in existed. I was taken into a store and shown some West Coast fish shipped by a certain party who had always been shipping good fish. I was also shown samples of fish shipped from various parts of Newfoundland. The countries like Portugal, where the buyers wanted to write the shippers escudo is down to about one shilling. is placed upon exports of cargoes unsold as arising more from conditions financial and from the natural different that I could be used as a reference to hold their fish for nine, ten, and as to its condition after reaching eleven dollars were vague and not justicely there have in the condition of the fish was in your time. financial and from the natural difficulty they have in re-arranging their ideas and methods to suit the altered conditions of markets and shipping.

I feel that a careful study of the position will show them that the refusal to send fish to market except it is sold before sailing must in the moment arrives that all their fish is sold before it is loaded or perhaps caught, they will wonder why they were so much opposed to the establishment of Regulation making that condition possible.

I as to its condition after reaching eleven dollars were vague and not just the flow to be realized by the value to be realized as to its condition after reaching eleven dollars were vague and not just tified by the value to be realized abroad. The catch around Fortune as reference, as the matter did not concern me. I note you said that most of the fish that had gone from the West Coast was number one. showing salt on the face.") We are of the opinion that unless a little salt is shown on the face of large fish, that fish is not the best for export to warm

In connection with the prices of fish as stipulated in Section 3 sub-section (a) entitled "Shore Fish," we beg to state that these Rules are not being adhered to. The Rules state that \$1.50 per quintal must be paid for Merchantable above the price of No. 2. So far in St. John's, Merchantable has only fetched \$1.00 per quintal more than No. 2, so that the sellers have lost 50 cents per quintal.

Section 1 deals with the duties of Inspectors, and we wish to say that

the interests of the fishermen are not being safeguarded. The buyer may send what Culler he likes to cull the the owner of the fish and the culler the former has no one to appeal to. He must abide by the decision of the culler. We suggest that an Inspector be appointed for each premises buy ing fish, who could act as a judge be tween seller and buyer should dif-

Adjournment was taken until 8 p.m

Minutes of meeting of Fish porters held in Grenfell Hall on Thursday, September 2nd, at 8 p.m. The Chairman announced the subject for discussion as Portugal, on which Mr. Patten would speak first. Mr. Patten stated that he had not come prepared with a set speech, but he would as far as possible review conditions in Portugal at present. To his mind they were very serious. We want 80 for our fish and are not likely to get any more than 75 or 70. We should get 75 or 80 in order to pay the fishermen a living price for fish. Under present conditions in Portugal when you ask 75 it means

present situation he saw no reason Mr. Joseph Long read the following for optimism. He had seen men sell letter received by him in his capacity cargoes. His firm had had to load cargoes of four and five thousand through the address, and that is, that I feel the success of the operation of the regulations is dependent entirely on the exporters having confidence in the manner in which they are conducted, and to try, if possible, to establish that confidence.

MR. COAKER.—In reply to the speakers I might say that Mr. Bowring stated he would like me to attend a small portion of the West Coast. I stated he would like me to attend and five thousand dascargo of four and five thousand Association of St. John's:

Dear Sir.—At a special meeting of the Amalgamated Fishermen's Dear Sir.—At a special meeting of the Amalgamated Fisher deteriorated considerably, causing a no doubt he will look out for the gen-eral interests of that section of the country. However I have been asked by certain interests to lay their views much pleasure in bringing them to your notice. (Section 2, paragraph 5 of sub-section (a) objects to "not and to transport the fish up country. There are now fifteen cargoes load.

Solventian and we have and the seekly in the months when fish is being sold. His fish is your notice. (Section 2, paragraph 5 of sub-section (a) objects to "not for sub-section (by sub-sect There are now fifteen cargoes load-ing and ten on the way and these will supply Portugal for a long time Regarding Norwegian fish, he thought ve would be faced with serious competition. During the war they could do very little, but now they are active. once more, and may repeat their achievements of some years ago when their total catch was 99,000,000 qtls.,

obtain better prices and conditions there.

MR. HEPBURN.—I look on this matter of shutting out consignments as one of the weak points of the Regulations. I fail to see how you will regulate shipments if we have to stick to the prices distated to us by the Board. Is there no arrangement whereby we can sell fish as in the past; that is with a minimum guarantee from Portugal. We could get the assent of the Board before we made the shipment, give them the minimum guarantee of the cargo we intend to ship, and by that means we would be enabled to our get our fish out of Newfoundiand. It entire catch, I don't think you will

mabsolutely convinced that some of the cargound won't know their some unsuitable fish as successful and the cullers sent around won't know the cargound won't know the cullers sent around won't know the cullers sent around won't know the cullers sent around won't know the in blost the cargo mathes about an absolutely convinced that some of the cullers sent around won't know the carry on our operations of the carry on our own their business as they should, and that the cullers sent around won't know the the cullers sent around won't know the the cullers sent around won't know their business as they should, and that the cullers sent around won't know the the cullers sent around won't know the the cullers sent around won't know the the business. Regarding Mr. Barr's remarks, I would say that we had last year about 70,000 qlts fish. We are well able to carry on our open about 70,000 qlts fish. We are well able to carry on our open about 70,000 qlts fish. W get our fish out of Newfoundland. It entire catch, I don't think you will appears to me that by holding our find all the fish will be good, and I must be soon think that next year, or possibly the petitors will have a chance to step in year after, it will be necessary to and take the market from us. If that allow consignments to go forward. We age outright sales where possible, but to submit to the dictate of submit to the dictate of submit to the dictate. can be overcome by a minimum cannot expect everything to go right to submit to the dictates of one man guarantee, I think it will help out the at once, and I think it will be several armed with arbitrary power as is to-

pepsin tooth paste which combats the film.

Look Now

See how the teeth's whiteness is dimmed by film. Perhaps tartar has formed in some places.

We ask you to prove it by a 10-day test. Do this for your sake and your children's sake. See for yourself how it will help you to cleaner and whiter teeth.

This is to offer you a 10-Day Tube of Pepsodent - the

Able authorities have proved the product by clinical and laboratory tests. The results are beyond any question. Leading dentists everywhere are now urging its adoption.

Film Wrecks the Teeth

That slimy film which you feel on your teeth causes most tooth troubles. Every modern dentist knows that. And for years dental science has sought a way to combat it.

Film is what discolors - not the teeth. It is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay. Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea.

Now science knows a way to combat it. The way is embodied in a dentifrice called Pepsodent. It is now used dany on millions of teeth, largely by dental advice. To those who don't know it we supply a free tube, so they may find it out.

Look Later See how the teeth have whitened - how the film

Old Ways Don't End It

This film is clinging. It enters crevices and stays. The tooth brush doesn't end it. The ordinary tooth paste does not dissolve it. That's why millions find that well-brushed teeth discolor and decay.

Pepsodent is based on pepsin, the digestant of albumin. The film is albuminous matter. The object of Pepsodent is to dissolve it, then to constantly combat it.

But pepsin must be activated, and the usual agent is an acid harmful to the teeth. So this method long seemed barred. Now science has found a harmless activating method. and teeth can now be daily cleaned as they never were before.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the slimy film. See how teeth whiten as the fixed film disappears.

This means more than pretty teeth. Compare your teeth now with your teeth in ten days and decide what is right for yourself. Cut out the coupon now.

The New-Day Dentifrice

A scientific film combatant, based on activated pepsin, now advised for daily use by leading dentists everywhere.
