London on the Thames, in Ontario, a prosperous city of 40,000 population, and one of the most important railroad centers in Canada, has one of the very best propositions for seekers of conservative investments to be found anywhere. I refer to

LONDON STREET RAILWAY STOCK. LONDON STREET RAILWAY STOCK.

an 8 per cent dividend payer, listed on both the Toronto and Montreal Stock Exchanges. A few facts in connection with the investment may be of interest. The London Street Railway charter runs 50 years from 1875, the franchises running the same length of time, that is, until 1875. The total authorized bond issue is 750,000, 5 per cents, but only \$20,000 per mile can be issued, and not to exceed the amount of capital stock subscribed. At the present time the total amount of bonds outstanding is \$400,000, the greater portion of which are closely held in England, being listed on the London Stock Exchange.

Exchange.

The authorized capital and the amount issued is identical with the bond issue, so that there is now outstanding \$400,000, on which dividends at the rate of 8 percent per annum are paid in semi-annual installments, 4 per cent each in January and July

Installments, 4 per cent each in January and July.
The Company owns the exclusive Street Railway rights in London, ratified by the Ontario Legislature, so that no other company can operate in London nor parallel their line, which is a decided advantage over the franchises of an American city. The city requires the Company to increase its mileage by one mile for every 2,000 increase in the city's population. It has been customary for the Company to carry an overdraft at a bank, occasioned by extensions and improvements, to an amount sufficiently large to warrant an increase in the capital stock issue of not less than \$50,000 of bonds for the next expenditure where the same total again reaches \$50,000. 600 at a time, and then disposing of \$50,600 of bonds for the next expenditure
when the same total again reaches \$50,000.
The right to subscribe to the new issue
of stock at par is a privilege enjoyed
by the stockholders.
The shares are \$40 each at par, but
quotations are based on \$100 shares. For
instance, the stock is at present quoted
at 165, yielding approximately

5 PER CENT NET INCOME.

When a sale is referred to at 165, it really means \$66 per share. Eight per cent on \$40 is \$3 20 per year, \$66 invested \$60 as to receive \$3 20 per year, is yielding 4.88 per cent income on the investment, or practically 5 per cent. For a high-grade safe investment, such as London Street Railway unquestionably is, the present quoted price of the stock, considering the fact that there is no water in the stock issue, is too low. Any special demand for the shares would bring about a 5 PER CENT NET INCOME.

RISE IN THE SHARES. of 35 points. It is my candid conviction that the stock is easily worth 200, at which price the income yield would be 4 per cent. The Company is now earning 4 per cent. The Company is now earning 12 per cent on its stock issue, and paying 8 per cent dividends with the stock quoted at 165. Montreal Street is earning 12 per cent, paying 10 per cent dividends, and the stock is quoted at 275, at which price the investment nets 3.63 per cent

The capitalization, including both bonds The capitalization, including both bonds and stock, is so extremely conservative as to be below the average, as is proven by the following table giving capitalization per mile of various City Street Rail-

EARNINGS. For the year ending 1901 the Gross Carnings were \$141,845 59, compared to Earnings were \$141,845 59, compared to \$119,109 42 for the previous year, an increase of \$22,736 17, or 19.9 per cent. Operating expenses were \$84,556 95, compared to \$78,501 22, an increase of \$6,055 73, or

ating expenses at \$90,000. After deducting \$20,000 for Bond interest, the surplus remaining applicable to dividends would be equivalent to over 12 per cent on the outstanding capital.

COMPOUNDING INCREASED EARNINGS.

The remarkable increase in Street Railway earnings all over the country is more remarkable in that each recurring annual increase is compounding over previous years. We all know to what heights compound interest will climb, at current interest rates; but when doubled and quadrupled, as in Street Railway earnings, the result in a decade is marvelous

earnings, the result in a decade is marvelous.

Street Railway earnings are showing compound increases of from 10 to 30 per cent per year. The increase in Gross Receipts of the London Street Railway last year was practically 20 per cent over 1900. No well managed Street Railway in any locality is showing less than 10 per cent increase in gross receipts per annum. This has been going on steadily every year since the innovation of electrically propelled roads.

The possible earning capacity for the future is surprising when one figures it out. Take for instance the earning statement of the London Company for the year 1901. Assume that the gross earnings will only show an average annual increase of 10 per cent, which is a minimum basis. Allow at the outside 60 per cent for operating expenses, and note from the following table how the earnings multiply:

The above estimate furnishes an interesting study. You can figure out for yourself if the stock now selling on a 5 per cent basis around 165, it should be worth on the same basis in 10 years 635. It should be remembered that up to the present time the London Street Railway has never operated cars on Sunday. It is only reasonable to assume that it will not be a great while before their cars will run on Sundays, and consequently add materially to the earnings. In fact, the earnings would increase from 15 per cent to 20 per cent by the addition of Sunday receipts.

The object of this market letter is to call the attention of investors to a security of unusual merit. The opportunity to buy Franchise Corporation securities in which there is absolutely no inflation, but where the proceeds from the sale of the Company's Stocks and Bonds have actually gone into the construction and bathletics are fitted for the proceeds from the sale of the property is not all

the Company's Stocks and Bonds have actually gone into the construction and building up of the property, is not all ways to be found. Again, the Franchis of the London Street Railway is one of the most desirable of any Company of the Continent. It runs for 23 year longer, at the expiration of which time the city has the right to buy the property, the value of which is to be fixed by arbitration. The property has been it successful operation for many years, sufficient to establish it firmly as to its per manency and unquestionable earning power.

present level of quotations, which is decided improvement over previous ef forts to buy the stock at reasonable figures. Incidentally, Messrs. Everett and Moore are conceded to have no superiors in the management and building up of street railways in which they are interested. All of their properties are in excellent condition physically and financially. Messrs. Everett and Moore will con-tinue to manage the London Street Rail-

way as in the past.

London Street Railway Stock is listed on the Toronto and Montreal Stock Exchanges and can be obtained from brokers in either city, or from my firm.

A careful analysis of the merits of the investment is so clearly convincing as to make it exceedingly desirable as an absolutely safe investment.

AMERICAN MARKETS CHICAGO. Chicago, July 81.—July corners were snuffed out today. With little excitement, save that influenced by the injunction against a corner in July standard oats, the manipulated deals ceased to be before the eyes of their projectors. July wheat cut the most spectacular figure by slumping almost 6c. The July corn corner faded into history with a closing price 24c lower than the price exacted ner faded into history with a closing price 24c lower than the price exacted when the Gates clique were in control. July oats, although controlled absolutely by the Patten-Frazier crowd, closed uneventfully, held down, doubtless, by the fear of the court when the injunction case comes up for decision. manency and unquestionable earning power.

Capitalists and investors of both large and small amounts are satisfied to put their money in safe quarters, where the income derived is 3 to 4 per cent. They can, of course, invest so as to yield 5 and 6 per cent, and even higher; but to buy a 5 per cent income where there is no element of risk is always inviting, particularly so when to this condition is added the practical assurance of future increased value.

[Press Report.]

Toronto, July 31.—Receipts at the cattle market today were 46 loads, with 772 head of cattle, 903 sheep and lambs, 558 hogs and 92 calves. Business was fair for all good stuff, and prices on the whole were steady. There were, however, too many cattle offering intended for export, but which should have been left out on the grass for some time yet. Those dealers who bought in these unfinished cattle found a ready was companies in which they are interested, a block of the syndicate stock has come on the market and is being taken by Canadian investors at the present level of quotations, which is a little disappointed with the day's market at 36 to 36 25 for heavy cattle; ighter experters, \$5 25 to \$5 75; fair to medium butcher cattle were worth from lighter exporters, \$5.25 to \$5.75; fair to medium butcher cattle were worth from \$3.85 to \$4.25; choice lots, picked, \$5. to \$5.20. The sheep and lamb trade was dull, lambs especially being a drug, probably between 200 and 300 being left unsold. Export ewes were worth \$3.50 to \$3.60; lambs,

INJUNCTION ISSUED.

Judge Keller issued a temporary order, restraining and prohibiting the defendants, who are named in the order, and all others acting with them, from in any way interfering with the management, operation or conducting of the mines.

SOLDIERS AT SHENANDOAH. Shenandoah, Pa., July 31. - All the troops ordered out last night have arlived on the ground, and established camp at Columbia Park. A provost guard has been established through-out the town. The streets are full of idle men watching the militia. There has been no hooting and jeering of the soldiers. All the members of the district executive board of the Miners' Union are holding frequent conferences with the local leaders.

The miners are incensed at the call-

ing out of the troops, which action, they say, was unwarranted, and have telegraphed Governor Stone, requestative to investigate the conditions. John Denow, a striker, was arrested. He is held on a charge of having Cassell last night. The latter is in a critical condition.

MITCHELL'S SIDE OF IT. Wilkesbarre, July 31.—Shortly after noon, President Mitchell, of the United Mine Workers, issued the follow-

ing statement: 'Complete and authentic reports furnished by national officers of our or-ganization located at Shenandoah, show that the stories of the riot at Shenandoah were greatly exaggerated, and the facts much distorted. It develops that no one was killed, and that the entire trouble might have been averted had the deputies kept cool and used greater discretion. While I greatly deprecate acts of lawlessness by any one, particularly by those on strike, I am naturally pleased to learn that the trouble is not as serious as first re-

FOOT ELM" MADE MARCHING EASY.

Many Canadian Soldiers in the Latt South African Campaign Tested "Foot Elm" and Speak Enthusiastically of Its Merits.

The First Canadian Contingent that went to South Africa was supplied with Foot Elm. So helpful did it prove in preventing chafing, scalding and blistering of the feet on the long marches over the hot sands of the South African veldt that from Col. Otter, Capt. Barker, as well as from dozens of privates, have come words of the highest praise for this splendid remedy for the feet. Mr. A. MacGregor, color-sergeant,

48th Highlanders, Toronto, Ont., who was through the campaign, has this to say: "Foot Elm was thoroughly appreciated by everyone who used it, as it prevented chafing, eased and rested the feet, and robbed many of a great deal

of misery." People who suffer in any way with their feet, should not fail to try Foot Elm. It makes walking easy. Price 25 cents a box, at all druggists or by mail. STOTT & JURY, BOWMAN-

LORD ROSEBERY ON IMPERIALISM

Is of Great Significance.

President Mitchell Says Reports of Twenty-Seven Bodies Recovered and Many Still Entombed-Castellanes Pay Up.

> London, Aug. 1 .- Lord Rosebery presided at a largely attended dinner of the Liberal League last night, at which Herbert H. Asquith, Sir Edward Grey, Sir Henry H. Fowler, Richard B. Haldame and other prominent Liberals were present.

Lord Rosebery dilated upon the recent bye-election for member of the House of Commons to represent North Leeds, which resulted in the election of Roell, T. J. Carroll, J. M. Richards and land Barren (Liberal). Mr. Barren sat at Lord Rosebery's right. The Speaker characterized the North Leeds verdict as having greater significance than any single election since the late Mr. Gladant is engaged in selling coal and stone was first returned from Midlocoke, and has a contract for the outthian, and as thian, and as

The party had suffered, continued

the speaker, by its unfortunate attitude in regard to the Irish question, and until the Imperialist Liberal principles prevailed within it there will be necessity for the continued existence of the Liberal League, which, Lord Rosebery said, did not threaten internal disunion, but formed a rallying point for others sharing the principles of its promoters.

MACHINISTS WANT A PREFER-ENCE.

Lord Strathcona and Mount Royal, Canadian high commissioner in London, yesterday received a deputation of representatives of firms engaged in the manufacture of paper and wood pulp making machinery, who asked the assistance of the Canadian Government in removing the prejudice which exists in Canada in favor of American as against British machinery of this class. The deputation asked British article.

colliery, at Wollongong, a port, forty miles from here. Twenty-seven bodies has been recovered. The buildings at the mouth of the pit were wrecked. One hundred and forty-nine miners were rescued, but a hundred are still entombed. It is feared their release is hopeless. A portion of the colliery is on fire.

THE CASTELLANES PAY UP. It is stated that Samuel Untermeyer, of New York, has succeeded in effectlitigation between Asher Werthimer, the London antiquity dealer, and Comte and Comtesse Boni de Castel-The four wounded policemen and have thus far heard the cases being divided equally in opinion. The case is now on appeal to the highest court of

By the terms of the reported settlement Wertheimer's claim is admitted for the full amount with interest at 4 per cent. Comtesse Boni de Castellane agrees to pay at the rate of \$100,000 per year. The claim with interest amounts to about \$400,000.

KAISER PARDONS DUELIST. Emperor William has pardoned Lieut. Hildebrand, sentenced to two years' imprisonment in a fortress for the killing of Lieut. Blaskowitz in a duel last November. The affair attracted international attention, because Blaskowitz was shot and killed on the morning of the day set for his wedding. The duel followed an episode in which Lieut. Blaskowitz, while intoxicated at his bachelor dinner, struck Lieut. Hildebrand. A regimental court of honor decided that the duel was unavoidable. An investigation developed the fact that Lieut. Blaskowitz awoke the day after his bachelor dinner without any recollection of the altercation and went to visit his finance, whence he was called to fight the duel. Lieut. Hildebrand served only seven months of his sentence. Military men explain the pardon by saying that Lieut. Hildebrand acted simply as the law of honor required; that he had to fight and kill his opponent if he could. There was considerable criticism of the sentence to two years' imprisonment, imposed on Lieut . Hildebrand by a court martial, on the ground that was inadequate. Comment was caused also by the fact that the trial was held behind closed doors and that newspaper correspondents were forbidden to report anything concerning the meeting which brought about the duel.

No. 6 Shot Told the Story.

Chester Depot, Vt., Aug. 1. — By the use of a spring gun, C. H. Waterman, a local mill proprietor, it is claimed, has revealed the person guilty of a number of robberies which have been going on in this neighborhood for several years. The alleged robber is Clarence Adams, one of the most highly respected young men of this section. He is under arrest, and it is claimed a large quantity of stolproperty has been recovered. The detection followed an announcement that Mr. Adams had been waylaid and shot on the previous evening. On that evening the spring gun set by Mr. Waterman and loaded with No. shot, was discharged. When it became known that No. 6 shot was removed from Adams' wound, suspicion was aroused, and the arrest followed.
