HERE'S PROBLEM FOR SOME RADIO BIG

Coatesville.—The uncanny behaviour of a telephone receiver from which radio programs have been received at the railroad station at Brandamore, five miles north of Coatesville, is providing a mystery with which railroad and telephone company engineers and electricians are struggling with little success.

The telephone line runs from Coatesville to Brandamore and is used exclusively by the railroad company. Telegraph operators on the Brandamore station discovered that merely by lifting the receiver from its hook they could hear musical programs broadcast from distant stations usually the more distant, the better the reception.

At first the operators attributed the reception to an accident or a practical joke, but attempts to discover the source proved futile. Various tests were employed. On one occasion a radio receiver was connected with the telephone line near the Brandamore depot, but immediately the line went dead. Removing the set and hooking up the telephone receiver, the operators were able to hear a program from a distant station. The problem was complicated further when a headset was connected with a railroad rail near the station and music again was heard.

Various theories have been advanced. One, in which some credence was placed, was that undiscovered ore deposits in the vicinity might be aiding in the transmission of the radio waves. How these are transformed into sound waves, however, remained unsolved.

THE FLORIDA RUSH

All the gold, oil and land rushes in the history of the United States are said to have been surpassed by the current of migration pouring into Florida from all parts of the country. It is now the Florida Land-Rush, says another Southern editor, is admittedly "the most remarkable boom of its kind in the history of such booms." Those on the spot report the motor roads of the Peninsular State crowded with cars from every State in the Union, while added streams of humanity arrive by train and steamship and the roadsides are dotted with tent colonies of tourists and fortune seekers.

Here and There

During July thousands of osteopaths and members of allied professions gathered in Toronto from all parts of the United States and Canada to attend the International Convention of Osteopaths. Several of the visitors toured the country in the interests of osteopathy.

Final figures showing the total live lobster catch on the Nova Scotia coasts, for the season ending June 1st, show a total of 8,585,900 lbs. valued at \$1,364,141, an increase over the 1924 season of 3,687,400 lbs. in quantity and approximately half a million dollars in value.

During his tour of Western Canada over the Canadian Pacific lines, Field Marshal Earl Haig was received on all sides by cheering and enthusiastic crowds. At towns in northern Ontario and elsewhere he shook hands and exchanged reminiscences with local ex-service men, many of whom he recognized.

Having concluded his visit to the Pacific Coast, His Excellency Lord Byng, Governor-General of Canada, has returned East. Before leaving the West His Excellency stayed off for a few days at Banff to meet Earl Haig, and the two famous soldiers spent some time together talking over old times.

Considerable interest has been aroused in London, England, over the arrival there of 8,000 peony blooms for exhibition in the Canadian Pacific pavilion at Wembley. The peonies were grown by W. Ormiston Roy of Montreal, and have been sent to England to dispel the belief that Canada's climate is excessively cold.

A delegation of prominent newspaper proprietors and journalists from Great Britain passed through Canada recently on their way to attend the Third Imperial Press Conference to be held at Melbourne, Australia, during September. Besides the delegates from the British Isles, representatives of Canada and the other Dominions have been invited and will attend the conference.

Two automobile accidents occurred in Montreal over the week-end at railway crossings, in both of which it was proven that the car struck the train. In the first accident the car ran into the first car behind the engine and in the second struck the side of the engine itself. Public attention has been directed to these accidents as illustrative of the results of negligent driving.

Early in July a party of one hundred French-Canadians associated with the University of Montreal departed from Windsor station on a three-weeks educational tour of the country under the auspices of the University. Mayor Dugas of Montreal, Monsignor A. V. J. Pietta, rector of the University and Professor E. Montpetit one of his associates accompanied the party. They were seen off at the station by E. W. Beatty, K.C., chairman and president of the Canadian Pacific Railway and other officials.

A similar excursion to the above left Toronto, July 20th, for the benefit of English speaking school teachers. This tour, also lasting three weeks and covering all principal points of the Dominion was conducted by Dean Sinclair Laird of MacDonald College under the auspices of the Teachers' Federation of Canada.

CLEMENTSVILLE

Miss Helen Pyne is visiting her sister, Mrs. Bertis Freeman, Lansdowne.

Mr. and Mrs. Robert Freeman, have returned from New Brunswick, and are guests of the latter's parents, Mr. and Mrs. Peter Wright.

Mrs. William Verrell of Portsmouth, N. H., is visiting relatives in Clementsville.

Mrs. Beniah Potter, Miss Isabella Potter, Mr. Watson Potter and Mr. Albert Potter, who came from Lynn, Mass., to attend the funeral of the late Mr. Beniah Potter, have returned home.

Mr. and Mrs. Walter Brown, of Bear River, have been guests of the former's sister, Mrs. Edith Baird, last week.

Mr. George Danielson, and Mr. Percy Burrell, have returned from the West.

MAITLAND BRIDGE

Mrs. Isalah Munro, returned to her home at Lake Munro, on Sunday, after having spent a week with her daughter, Mrs. Walter Dukeshire.

Mr. and Mrs. Leon Hemen, of Milton, spent Tuesday with Mrs. Hemen's parents, Mr. and Mrs. Andrew Merri.

Mrs. Dorcas Samuels of Massachusetts, is the guest of Mr. and Mrs. A. J. Nixon.

The supper and dance held in Odd-fellows Hall on Thursday evening, November 12th, realized the sum of \$24.00.

Our teacher, Miss A. L. Brooks, spent Thanksgiving at her home in Bridgewater, remaining until the 13th inst., so as to be able to attend the Teachers' Institute.

Rev. Mr. Piddington held Divine service in the Baptist Church on Sunday afternoon at 2.30 o'clock.

The latest messages from Charlotte, P. E. I., states that Harley Lewis is rapidly recovering from his recent serious illness. Mr. Lewis is a son of Mr. and Mrs. Judson Lewis, of Maitland Bridge.

Miss Clara is expected home from Boston in a few days. Much sympathy is extended to Miss Carter, in her recent bereavement, her father, Charles E. Carter having recently passed away rather suddenly. In that city Mr. Carter was a native of Halifax.

The Ladies Circle of the Baptist Church was entertained at the home of Mrs. Eunice Baxter on Thursday afternoon.

Mr. A. W. Munro and Mr. and Mrs. Lawrence Munro of Lake Munro, accompanied by Mr. Charles Millard of Litchfield, were the Sunday guests of Mr. and Mrs. Walter Dukeshire.

Mr. Park Kempton has gone to Boston.

Mrs. Adelbert Fancie, who has been seriously ill, is recovering.

Mr. Lloyd Sandford of Bear River, was a week end guest at the home of Mr. and Mrs. Charles Merri.

C. P. R. TAKES OVER LINES NEAR BORDER

Canadian Road Will Operate Northern Stretches of Boston and Maine.

Boston.—The executive committee of the Boards of Directors of the Canadian Pacific Railway and the Boston and Maine Railroad, have approved an arrangement under which lines in and near the Canadian border which have been under lease to the Boston and Maine, will be operated in future by the Canadian Pacific Railway. It was officially announced here today.

These lines, aggregating 104 miles, extend from Beebe Junction Quebec, to Lennoxville, Que., and from Wells River, Vermont, to Beebe Junction.

In negotiating this arrangement, it was announced, the management of the Boston and Maine Railroad was prompted by the belief that these lines because of their extreme northerly location, could be operated to better public advantage by the Canadian road with resulting economies to both systems.

WORLD WHEAT CROP

Three Hundred Million Bushels More Than Last Year.

Washington.—A world wheat crop of 290,000,000 bushels in excess of last year's crop was forecast by the Agriculture Department today on the basis of estimates received up to November 12th. "Wheat production in 22 countries of the northern hemisphere," the department's announcement said, "is nearly 30,000,000 bushels more than last year, being 2,552,000,000 bushels, as compared with 2,522,000,000 bushels in 1924."

The output in the southern hemisphere, it added, is still somewhat uncertain, with indications for a crop about the same as last year.

The Canadian crop was placed at 422,000,000 bushels, compared with a previous estimate of 392,000,000 bushels, and last year's harvest of 352,000,000 bushels. The statement estimated that there should be available for export and carry over from the Canadian crop this year somewhat more than 300,000,000 bushels.

CHILDREN LIKE BABY'S OWN TABLETS

Because They Are Tasteless and Are Easy to Take.

One of the strongest points in favor of any medicine for children is that it is so agreeable that the mother does not have to force it down the little one's throat.

Baby's Own Tablets have no drug taste, may be crushed to a powder if desired, and babies like them. They are perfectly safe for they contain no opiate or narcotic. They sweeten the stomach and remove the cause of fretfulness.

Mrs. Arthur Charlebois, Pawtucket, R.I., says: "I have found Baby's Own Tablets to be a gentle laxative and a safe remedy for stomach disorders in children. Our little boy had been given harsh cathartics but these tablets worked more effectively without the severe griping. I can recommend them to all mothers of little children."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

DIPHTHERIA

Nova Scotia during recent years has enjoyed a very good record, its small number of Diphtheria deaths taken as a standard. We have not always been so fortunate. Of our older generations many can remember numerous and severe outbreaks of the disease which killed quickly almost every individual attacked.

They remember, too, how dreaded "croup" was. Nowadays croup hardly figures at all on the International List of Diseases, for it is known that the "croup" which really was of danger—that which killed—was Diphtheria, though it was not then recognized as such.

Much more is now known concerning the cause of the disease, the germ which, if it lodges in the throat, forms the membrane characteristic of the disease. Few or no doctors nowadays see a case of sore throat and do not take a "swab" in order to see if the germ present is the Diphtheria germ.

Sometimes, too much reliance is placed on the laboratory report that the germ can not be identified. If too great time has elapsed between the taking and the examination of the swab the germ may have dried, so that recognition is impossible. It is not wise to trust too much to a "negative" report. On the other hand, if the Laboratory report be "positive," the diagnosis may be regarded as fully determined.

At the present time our doctors recognize the disease, either by naked eye appearance, or from Laboratory examinations with much more frequency than was formerly the case. They are thus very often able to attack the disease in its early stages. At that time by the early use of Antitoxin a very large number of cases can be saved.

The fact that many cases seen nowadays are relatively mild makes some persons doubt that it actually is Diphtheria. They remember the fatality which attended former outbreaks and can not without hesitation accept the present day opinion. Such an error of judgement it is most desirable to prevent.

Unfortunately they may satisfy themselves on this point, if they fail to mind that the poison generated by the germ is almost unique in that it is apt to set up paralysis of the nerves in any part of the body. The throat may be paralysed, so that food can not be swallowed and fluids "come back" through the nose. The arms or legs may be paralysed, causing difficulty in using the hands or in walking. The heart may be paralysed, and sudden death may follow by unusual exertion. In any case in which paralysis occurs shortly after there has been sore throat one is quite safe in concluding that the antecedent disease was Diphtheria.

By all means consult your doctor if you are in doubt. It certainly does not pay to run the risk of your child not being properly treated. If Diphtheria is a possible explanation of the child's illness.

Department of the Public Health, Halifax, N. S., Nova Scotia, November 12th, 1925.

TO HEAR APPEAL

Federal Cabinet to Consider Case of N. B. Youth Sentenced to Hang.

Ottawa.—Death will come with the dawn of the New Year to Alfred Arsenault, now in jail at St. Anns, N. B., unless cabinet intervention occurs. Arsenault was sentenced on January first, for the murder of Alphonse Hanselpecker, at Bethel, Charlotte County, N. B., on May 8th last. At his trial it was said that the youthful murderer was 16 years of age. The case will probably come before cabinet at the latter end of December. Even if no interference decision is reached, it is possible that the date of execution will be changed.

WHAT TO WEAR

"In Masumbaland we tried to teach the women they should wear something more than beads, palm oil and sunshine. But here we were shocked and mortified to discover that the girls and women wear only paint, powder and suggestion."—Mrs. A. L. Piper, returned missionary.

In the Congo the dappers wear nothing but beads.

And a smile and a lady like bearing.

And nobody notes them and nobody heeds.

For a moment what they are not wearing.

For people see nothing inviting.

In anything constantly placed on display.

And nudity's quite unexciting.

But here the dear girls are still wearing a wee.

And the mission folks find that it's shocking.

To see the faint flash of a dainty rouged cheek.

Peering over a neatly rolled stocking.

And as for the gleams of the skin through the gauze.

Entrancing to us as its feeling it gives them to wonder, it gives them a pause.

And too long for a big bolt of sheeting.

So, girls this lesson from all Congo belles.

Who spread out their stuff in the sun—

It's what you don't show to the public that tells.

For what a man sees isn't fun.

Cut short your disrobing while still there is time.

Don't hazard completely undressing.

Be warned by the matter of this simple rhyme.

And dress so 'you still keep 'em guessing.

BEETHOVEN'S FORGETFULNESS

Numerous stories are told of Beethoven offending those with whom he came into contact by his gruffness; but his number is almost equalled by the records of his seeking pardon from the people he had unintentionally offended. While he was forgetting in most parades of non-musical nature, it was rarely that he was led into such a blunder as is here related.

When he brought out his Fantasia for the first time with an orchestra and chorus, he directed, at the usual hasty rehearsal, that the second variation should be played through without repeat. In the evening, however, completely absorbed in his own creation, he forgot the order given, and repeated the first part, while the orchestra accompanied the last, a combination not productive of the best effect.

At last, when it was too late, the composer suddenly stopped looked up in amazement at his bewildered band, and said dryly, "Over again."

The leader unwillingly asked, "With the repeat?" "Yes," was echoed back, and his time things reached a happy conclusion.

That Beethoven had, to a certain degree, affronted these excellent musicians by his irregular proceeding, he would not at first allow. He contended that it was a duty to repair any previous error, and the public had a right to expect a perfect performance for their money.

Nevertheless, he readily begged pardon of his orchestra for the unintentional offence, and was generous enough himself to spread the story around and to lay the blame upon his own abstraction.

VICTORY

Things are beginning to look quite a business-like look at the new mill site here. We hope it will be a success from all points of view.

Rev. G. Durkee held service here Sunday in the Baptist Church.

The recent rains have been making much out of the new gravel on the roads.

Mr. and Mrs. Archie Wright and Miss Edna Fraser of Bear River East, spent Sunday with Mr. and Mrs. Joshua Simpson.

None of the trappers have met with any success so far. Fur-bearing animals seem to be scarce.

Mr. Willard Rosenkrantz enjoys looking at two deer in his orchard nearly every day. They are so tame and trustful he would not have them frightened for anything.

FREAK MOOSE SHOT IN NEW BRUNSWICK

St. George, N. B.—Decorated with a double set of horns, a moose shot by Charles Lee weighing more than 700 pounds, dressed, passed through town the other day. The animal was certainly a freak. No hunter in this section ever saw the like. The additional growth was perfect in shape. It started a little lower on the head than the others.

Cold water is all right in its place but, Charlie Doyle says its place is not on a warm skin.

Minard's Liniment for stiff muscles.

For Colds

ASPIRIN

Proved safe by millions and prescribed by physicians for

Colds Headache Neuralgia Lumbago
Pain Toothache Neuritis Rheumatism

DOES NOT AFFECT THE HEART

Safe

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer, Manufacturers of Monocrotic acid of Salicylic acid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

THE BIG SKATING MEET FOR ST. JOHN

World's Championships Will be Contested in January.—World's Champion to Take Part.

Saint John, N. B.—Saint John Amateur Skating Association, the body fostering the world's championship skating meet in January, elected A. P. Paterson, President and named a

strong executive to look after the details. Secretary D. J. Corr announced that all arrangements had been completed for the appearance of Clas Thunberg, of Finland, the present world's champion. Skating aces of the United States and Canada will also take part in the three days meet, Charles Jewtraw, of Saranac Lake, N. Y., who retired from the game after winning an Olympic event, has returned to the field and it is expected he will appear in the coming meet.

How's Business?

"Business is as good as we make it" is the answer of business leaders. And it is worth while to note that most big businesses owe much of their success and prestige to the steady use of Advertising.

ADVERTISING in THE WEEKLY MONITOR would help you promote your business. It would attract new customers, retain the goodwill of old ones and increase public confidence in your store and service.

ADVERTISING is simply salesmanship in the mass. It is an efficient, low-priced salesman. Investigate its merits.

Progressive Merchants Advertise in "The Weekly Monitor"

WRIGLEYS

AFTER EVERY MEAL

Probably one reason for the popularity of WRIGLEYS is that it lasts so long and returns such great dividends for so small an outlay. It keeps teeth clean, breath sweet, appetite keen, digestion good. Fresh and full-flavored always in its wax-wrapped package.

WORLD MARKETING RECORD ON C. P. R.

407,624 Bushels of Grain Handled on System's Western Lines Thursday.

Winnipeg.—Constituting a record for Canada, and probably for the world, 3,447,624 bushels of all grains were marketed on the lines of the Canadian Pacific Railway in western Canada yesterday. The nearest approach to this figure was the 3,406,000 bushels marketed in October 18th, 1915, in the year of one of the greatest crops the Dominion has ever harvested.

This accomplishment means that approximately 40,000 farmers' wagons crossed the prairies hauling loads of grain, and that over 100 bushels of grain was handled by the railway every second for 24 hours. If these teams were placed end to end they would reach from Winnipeg to Brandon, from Montreal to Quebec, from Fort William to Schreiber, from Regina to Saskatoon, from Calgary to Field, from North Bend to Vancouver.

From August 1 to November 19 inclusive, there have been 144,519,444 bushels of all grains marketed at stations adjacent to the Canadian Pacific, as compared to 107,552,136 bushels last year, or an increase of 24 per cent. Of this gigantic amount approximately 126,000,000 bushels have already been placed on wheels and transported. The loadings showing a similar increase over last year.

A thousand cars per day have left Winnipeg destined for the head of the lakes each day during the present month, or a car every minute from seconds.
