CATHOLIO NEWS.

There exists between the Irish and French Beman Catholics of Ottawa a great deal of dissatisfaction concerning the proprietorship of the Basilics, which is now one of the fixest churches in the Dominion. The majority of the services have been conducted of late in French, and the English-speaking portion of the congregation are divided among themselves as to whether a new church should be built for them or they hould retain the Basilice, on which they have expended a great deal of money.

Liver Pills.

MALARIA! MALARIA!!

THE CAUSE OF DISEASE IN THE STOMACH, KIDNEYS AND NERVOUS SYSTEM

Below will be found a brief Summary of a Lecture upon the Liver, delivered before the Eclectic College of Medicine, by

DR. J. HAYDOOK.

The Liver has been known as the great blood-maker and blood-purfier of the circulation. From its size and spongy structure, it plays a most important part in the animal economy, as regards assimilation and nutrition. Food taken in the mouth and acted upon by the digestive organs or the stomach is converted into Glucose or Peptone, and in these forms enters the Portal vein. Here, by the action of the Liver, these substances are converted into a form of sugar and pass out of the Liver by a large vein, called the Hepatic vein, into the general circulation. The new material now formed stryes two purposes, viz: the maintenance of heat in the body and assisting in the cell growth of the system

Dr. Murchison says:—"The composition of bile and its secretion is very complex. It is constantly being secreted by the Liver, and, increasing suddenly before eating, gradually decreases as soon as the appetite is ratisfied and feeding cases." New, if this most important organ of the body becomes torpid, or the passage of bile interfered with emaciation and disease this in the eight marked peculiarities that now occur, and which we all know of:

1. The nation complains of a feeting of waight and fullness of the enignatrium.

1. The patient complains of a feeling of weight and fullness of the epigastrium.
2. Distention of the Stomach and now is by wind.

2. fistention of the Stomach and sand and great sleepiness after meals.
3. Heart-burn.
4. A feeling of wearfness, pains in the limbs, and great sleepiness after meals.
5. A bad taste in the month, especially in the morning, and furred tongue.
6. Constipation, with occasional attacks of diarrices.
7. Headache in front of head.
8. Depression of spirits and great melancholy, with lassitude and a disposition to leave everything for to-morrow. All of the above symptoms go to show functional derangement of the Liver; and now comes the great importance of any error made as to the condition of the patient. He should immediately provide himself with a LIVER STIMULANT, the most common form of which is a Pit. Daily experience shows that this, when the Pill is compounted properly, is the readist mode of inciting and promoting the action of the Liver, and can be almost always relied on. I have devoted many years of my life, as many of you now before me know, to compounding a Pill that will act readily and systematically as a Billone Remedy. I do not believe in great purgatives, and therefore have made a Pill, one of which is an active and thorough dose. I have called it

Dr. Haydock's New Liver Pill.

The People Know Thom! The People Use Them! The People Praise Thom WHAT HUNDREDS OF LETTERS SAY FROM PATIENTS ALL OVER THE HABITABLE GLOBE.

Musical Instruments, &c.

THE WEBER BABY GRAND. RECEIVED HOME.

"THE WEBER PIANO"

Is generally acknowledged the grandest instrument of music which has ever appeared in the household, or adorned the Lyric Stage. Its tones are pure and beautiful beyond all others. It is sweet, sympathetic and plaintive, or loud, grand and majestic, at the will of the performer. In its capacity to portray feeling, and in its wonderful power of expression, it stands absolutely without a rival. The duration of its tones, quick responsive action, and perfect mechanism, place it, in the estimation of all musical people, above and beyond all its competitors. For many years the "Weber" Piano was used only by the wealthy and musical aristocracy of the United States; but since the Pulladelphia Exhibition, where it was first placed before the public in competition with the great makers of the world, the demand for it has been unprecedented.

The first second-hand instrument of this maker, offered at public competition in Montreal, though a square several years in use, realized \$515.00. This was far above the price reached by any other piano, and shows that a good piano, like a good painting, will always command its price.

the fealty of officers. During the first five months of this year no ess than 5,000 tons of Italian produce, eggs, butter, vegetables, &c., bave been imported into Great Britain. This trade will undoubtedly be increased by the quicker transit consequent on the oponing of the St. Gothard.

Some Cornish keepers near Camborne resolved in order to catch peachers, to divide into two parties. During the night a gleam of moonshine revealed to the lurking ponchers a fierce conflict, the keepers having mistaken each other's party for the poachers.

Arrangements have been made by which some of the college lectures at Oxford will be thrown open to female students. Among the lectures thus opened will be those by the Muster of University on English history, by Mr. Butcher on Greek literature, and by Mr. Pelham on ancient history.

A quart of cream can be kept perfectly good for months in the highest temperature by an ounce of boro-glyceride. Prof. Barft proposes to save railroad carriage for wilk by condensing it in the country and mixing it with boro-gly ceride, so that it has only to be mixed with water when needed.

The people of this country have spoken. They declare by their patronage of Dr. Thomas' Eclectric Oil, that they believe it to be an article of genuine merit, adapted to the cure of rheumatism, as well as relieves the pains of fractures and dislocations, external injuries, corns, bunions, piles, and other maladies. There were 302 cases in England in which

flogging formed part of the sentence for offences during the period between the 13th of July, 1863, and the end of the year 1881. The number of cases in which the same offender had been found guilty of similar offences and become liable to be reflogged was five. ". "The same measure will not suit all cir-

comstances." But Kidney-Wort suits all cases of liver, bowels and kidney diseases and their concomitants, piles, constipation, diabetes, ague, etc. Try it and you will say go too. Sir Curtis Lampson, a Vermonter by birth,

who is head of a great fur house, has invented a new method of utilizing electricity in preparing sealshing. The skin is "fed" over a knife-edge bar, above which is stretched a fine platinum wie, which, raised to a white beat by an electro-current, meets the longer hairs which rise above the under for, and mows them down. Persons of weakly constitution derive from

Northrop& Lyman's Emulsion of Cod Liver Oil and Hypophosphites of Limo and Soda a degree of vigor obtainable from no other source, and it has proved itself a most efficient protection to those troubled with a hereditary tendency to consumption. Mr. Bird, Druggiet, of Westport, says: "I know a man whose case was considered hopeless, and by the use of three bottles of this Emulsion his weight was increased twenty pounds."

Bilton Grange, near Rugby, formerly the property of Addison's only child, who died at a very advanced age, having for years before her death been of unsound mind, is now in the market. At her death it passed to her relatives on her mother's side, and thence through various hands until it came to Mr. Washington Hibbert, who employed Pugin to create on the property, at vast expense, a superb medieval residence.

Referring to a St. Louis paper's lament that American boys do not learn trades which are likely to pay so much better than average cleraships, the Indianapolis Journal remarks that this arises less from false rride than from the extreme difficulty of procuring instruction. "Many a parent can attest that it is among the impossibilities for boys to secure situations where they can become skilled in any of the more desirable trades. It is, in fact, a great favor to take a boy."

Circulating libraries of an entirely new description are about to be started at St. Petersburg. A society has been founded for the purpose of supplying the horse cars of that city with daily newspapers and illustrated weeklies. Passengers who avail themselves of these literary stores are to drop into a box a copeck for each paper they read. No watch is to be kept over the box, the payment being left to the honor of the readers. The society trusts that it will be only occasionally defrauded.

The London hospitals are nearly all suffering from the lack of funds. St. George's, at Hyde Park corner in the very centre of the wealthiest residentiary district in the world, has of late had an annual deficit of over \$30,000, and says that, unless money comes in, it must close many of its wards. Depression of agriculture and trade and the muitiplication of calls on the public purse are among the causes assigned. Three of the London hospitals, Gray's, St. Bartholomew's, and St. Thomas', are magnificently endowed, but the rest depend on casual subscriptions.
