M. COURTNEY, *Dep'y Min. of Fin.*

NEW STEAMSHIP SERVICE.

An important arrangement has been consummated between the Plant line and the Newfoundland Railway System, says the Morning Chronicle, which will give to Halifax a new steamship service between Halifax and St. John's. This service will be operated by the Plant line in conjunction with their Boston and Halifax service. The new steamer, which has been built to the order of Mr. R. G. Reid, for the Newfoundland Railway steamship line, has been named the "Glencoe," and a cable announces the very satisfactory trial trip of this steamer on the Clyde, and her departure for this side.

The "Glencoe" is to perform a regular winter weekly service, leaving Plant wharf, Halifax, every Tuesday at 4 p.m., and returning, will leave St. John's every Saturday at 1 p.m. The advantage of having a regular weekly connection between Halifax and St. John's during the coming winter no doubt will be appreciated by shippers and the travelling public.

The following particulars of the "Glencoe" are given: Built of steel; tonnage, 1,100 tons; length, 220 feet; breadth, 30 feet; speed, 13 knots. She is built on the most modern plan, fitted throughout with electricity. She has accommodation for 117 passengers, and a roomy smoking-room. It is claimed that she will be without doubt the finest boat of her size on this side of the water. She has been built particularly to contend with the ice on the Newfoundland coast, and it is confidently expected that she will be able to perform a prompt and reliable service between St. John's and Halifax.

FLAT houses are now in order for Toronto. At least the Improved Realty Company seem to think so, for they propose putting up suites of apartments on St. George street, a very eligible site

---

—Detroit fire insurance agents show the same diversity of action regarding the separation rule that is exhibited in other sections of the State and West, says the Indicator. Some of the leading agencies have resigned their non-union companies, while others remain mixed. Unionizing methods have gone so far, however, that it is safe to say that the larger portion of the Union companies represented in this city are now paying graded commissions, although it is also true that some of the largest agencies in the city are still mixed.

MANITOBA CROP YIELD OF 1899.

The Department of Agriculture, presided over by Premier Greenway, has issued the final crop bulletin for the year. A very satisfactory increase is shown in the area ready for next year's crop. The total area of fall plowing is 861,070 acres, being 253,350 acres more than in 1898. The revised figures for summer-fallow and breaking are slightly in excess of the August estimate. The breaking is now placed at 158,515 acres, and the summer-fallow at 472,500. This makes a total area of 1,492,085 acres now ready for next year's crop, which is an increase of 480,630 acres over the corresponding figures of a year ago.

The yield of wheat has turned out to be less than the estimate, and is, in round figures, 28,000,000 bushels, taken from an area of 1,630,000 acres. The report explains that in the August bulletin the estimated wheat yield was 33,504,766 bushels. This was considered at the time a conservative estimate, as a greater yield
