REMOVAL OF SUBSIDIES ON IMPORTED GASOLINE FOR AUTOMOBILES

Question No. 335—Mr. Herbert:

What time schedule does the Minister of Finance envisage for the complete removal of all effective subsidies in the retail price of imported gasoline used by private automobile owners?

Mr. Bob Kaplan (Parliamentary Secretary to Minister of Finance): I assume that the hon. member is referring to the Oil Import Compensation Program, which was put in place in April, 1974, to ease the transition to higher costs of imported oil. The government's policy is to move domestic oil prices toward international levels; the July 1 increase of \$1.05 per barrel was a step in that direction. As Canadian oil prices approach world levels, average compensation payments for both crude and product imports will diminish. In considering at what rate domestic prices should be permitted to rise, the government must, of course, bear in mind the inflationary impact of higher prices and their effect on our international competitive position.

TRADING REPORTS

Question No. 773—Mr. Herbert:

What is the present time period for the issuance of insider trading reports?

Hon. A. C. Abbott (Minister of Consumer and Corporate Affairs): Generally speaking, the law requires an insider to report his interest or change in interest in the securities of a distributing corporation within 10 days after the end of the month in which he became an insider or in which his interest changed. The law further requires the information reported to be summarized in a periodical available to the public. It is the policy of the Department to summarize all information reported for a given month in the Corporate Affairs Bulletin identified by the same month, though issued as soon thereafter as normal processing and printing operations permit.
