

This proposal has political implications particularly with the Japanese going ahead as they are in China. If it came into effect I think it likely from past experience that we would have the Japanese Legation in Ottawa at once demanding something similar for Japanese students.

Univ. of Toronto, too, do not wish to give free tuition. Suggest that it be raised by some private means, but apparently not from the Boxer Fund, though their resolution is vague.

Do you not still feel wiser plan to have it considered by Univ. Conference first before we put it to our Senate?
