Woman's Irials.

The bitter trail in a woman's life is to be childless. Who can tell how hard the struggle may have been ere she learnt to resign herself to her lonely lot? The absence of this link to bind marital life together, the absence of this one pledge to mutual affection is a common disappointment. Many unfortunate couples become estranged thereby. Even if they do not drift apart, one may read the whole extent of their disappointment in the eyes of such a childless couple when they rest on the children of others. To them the largest family does not seem too numerous. In many cases of barrenness or child-bearing is easily removed by the cure of weakness on the part of the woman. Dr. Pierce's Favorite Prescription has been the means of restoring health and fruitfulness to many a barren woman, to the great joy of the household. In other, but rare cases, the obstruction to the bearing of children has been found to be of a surgical character,

household. In other, but rare cases, the obstruction to the bearing of children has been found to be of a surgical character, but easily removable paralless operative treatment at the Invalids' Hotel and Surgical Institute. Buffalo, N. Y., over which Dr. Pierce of the "Favorite Prescription" fame presides. In all cases where children are desired and are absent, an effort should be made to find out the real cause, since it is generally so easily removed by proper treatment.

In all the various weaknesses, displacements, prolapsus, inflammation and debilitating, catarrhal drains and in all cases of nervouspess and debility, Dr. Pierce's Favorite Prescription is the most efficient remedy that can possibly be used. It has to its credit hundreds of thousands of cures —more in fact than any other remedy put up for sale through druggists, especially for woman's use. The ingredients of which the "Favorite Prescription" is composed have received the most positive endorsement from the leading medical writers on Materia Medica of all the ingredients of working the properties of practice. All the ingredients of working the properties of working the properties of working the properties of practice. All the ingredients of working the properties of working the properties of working the properties of practice. All the ingredients of working the properties of working the properties of working the properties of working the properties of the prope medical writers on Materia Medica of all the several schools of practice. All the ingredients are printed in plain English on the wrapper enclosing the bottle, so that any woman making use of this famous medicine may know exactly what she is taking. Dr. Pierce takes his patients into his full confidence, which he can afford to do as the formula after which the "Favorite Prescription" is made will bear the most careful examination.

Dr. Pierce's Pleasant Pellets are the

Art in the School. embers at the eighth annual meeting which was held on Thursday ever

which was held on Thursday evening. About 75 were present, including Inspector Jas. L. Hughes, Trustees C. A. B. Brown, R. R. Davis, ex-School Trustee Jas. Hales, Miss Semple, directress of art in the public schools; G. B. Payne and Principal Smith.

They all testified to the good work of the Rose-avenue League in adorning the walls of the city schools with expensive reproductions of the world's best paintings.

Since its inception, the league has spent \$500 in distributing these pictures thruout the schools, and they have also placed an order for 75 photogravure reproductions of great masterpieces, which will be framed and presented to the various schools this year.

Next year's program will include five literary and solcal entertainments, at which the following lecturers have consented to speak: Prof. Coleman, on volcanoes; Prof. De Leury, on astronomy; John Maughan, on birds; Mrs. James L. Hughes and Miss Margaret Davidson, directress of domestic science in the technical high school.

The Boys' Naturalist Club, which is a

HAS "WON'T BLISTER HOOKS AND

IMPROVEMENT NUMBER SEVENTEEN

Everybody knows that most hooks and eyes blister. Everybody's leg, ankle and instep surface bears scars and callouses which prate of hook and eye blisters that once were. But why do hooks

Well, hooks and eyes are made of metal. If awkwardly riveted on, they're going to be rough on the under side next to the foot, and as metal's harder than skin, the skin's going to get skinned. Then the leather between the hooks and eyes is going to bend nearly double when the leg bends forward and in bending double some of those between-leather are going to bulge up A-shaped and some sink down V-shaped. If the leather is thick, hard and stiff, the A-shapes are going to pinch like pinchers and the V-shapes are going to bore like drills at every forward bend of the leg, and

Foot-rite hooks and eyes are made of metal, but they're riveted as smooth on the under side as the top of a much-traveled steel rail, and as they're covered underneath with a soft strip of kid, they're as harmless as young down to the leg, ankle and instep surface. And the leather between the hooks and eyes in a Foot-rite bends A-shaped and V-shaped as in other shoes, but doesn't form pinchers and drills to pinch and bore blisters. Why? The leather is not thick, hard and stiff. It's "Normal-Calf," the new Foot-rite leather, almost as soft and supple as the live calf's skin. Lace Foot-rites as tight as you like. There'll be no pinching or boring of blisters.

The name of the Foot-rite retailer in your town's below. His door swings inward but never outward to find a more welcome store. Ask him to demonstrate the comfort of the Foot-rite "Won't Blister":
