Jim Hill of the Great Northern Now Trying to Kill C. P. R.'s Boundary Business.

ing industry getting on a solid basis in Southern British Columbia, and incidentally to cut the C.P.R. out of business. The

"If Mr. Hill will give the word, Spokane

"If Mr. Hill will give the word, Spokane can be made one of the chief smelting centres of the United States. He indicates a desire to do this. He realizes, of course, that if ores from the north country were smelted at Spokane, his Spokane & Northern branch would haul them from the mines to Spokane. His main line would carry the fuel to the smelter, and he would also have the long haul on the buillion from the smelter to the distant refinery.

"Mr. Hill also comprehends the grave responsibility, if smelters are not established here, of the smelting industry being firmly established across the line. Already successful smelters are established at Nelson and Trail, and plans are formulated for another in the Boundary Creek country. A large part of the ores of the mineral beit along the international boundary will not bear shipment to the distant smelters of the United States, and if smelters are not erected here these ores will go to the local smelters of Southern British Columbia, and the tonnage will pass to the Canadian Pacific."

Mr. Hill will, however, find his task a big one. Southern British Columbia's éheap coke and increasing transportation facilities seem to assure the smelting industry success in that part of Canada.

Mr. Blue on Ontario Mining.

Mr. Archibald Blue, Director of the Bureau of Mines, has communicated the following interesting particulars regarding mining industries in Ontario last year:

The copper and nickel mines of the Sudbury country gave employment last year to an average of 610 men, and the amount of wages paid for labor was \$315,000. All the ore raised at the mines was smelted and reduced to matte, in which form it was exported to the United States to be refined. The estimated quantity of fine copper in the matte is 8,373,560 pounds, valued at \$268,080, and of fine nickel 5,567,690 pounds, valued at \$514,220. These valuations are based on the selling price of the matte at the works, which is about one-third of the market price of the refined metals. The total value of nickel and copped is \$782,300. In 1897 the total value was \$559,718, and in 1896 was \$487,660. The amount of wages paid for labor in 1897 was \$253,256, and in 1896 \$247,151. Mr. Blue on Ontario Mining.

pig iron during the coming year.

Kamloop Mining Centre. The Kamloops (B.C.) Sentinel puts forward the assertion that Kamloops will soon become famous as the centre of a great copper mining district, and this journal goes on to give a detailed description of the best known mineral deposits of the neighborhood.

known mineral deposits of the neighborhood.

It first takes up the Coal Hill copper district, situated to the south of the town, where a great deal of prospecting work and preliminary mining in the way of open cuts, shafts and tunnels has been done, and where some properties have been brought to quite a forward stage. A 50-foot shaft has been sunk on the Python, and it is understood that a large expenditure will be made in opening up this property this season. The Hecla, near by, is in a similar stage of development, and the Erin and Iron Mask groups are also looking up well. The Iron Mask group yields 2 dwts. in gold to the ton, and 15 to 17:50 per cent. in copper. Other claims in the immediate vicinity which have been more or less developed are the Iron Cap, Earnsellife and Norma, Con Verdant, Dawson and Brownie. A couple of miles to the west of the coal region is located the Pot Hook group of claims. A large double shaft has been sunk to a depth of 225 feet on one of these claims. A large force of men is to be put on this property, and work is to be pushed. A very promising showing is made by the claims near Cherry Creek, 17 miles from Kamloops by wagon road, but only one-quarter of a mile from the C.P.R. track. The ore goes 30 to 45 per cent. in copper, and sometimes carries as high as \$80 to the ton in gold.

Another large mineral zone is found on Jacko Lake, east of the Sugar Loaf district.

ton in gold.

Another large mineral zone is found on Jacko Lake, east of the Sugar Loaf district. This part of the country is distinguished by immense leads of quartz, showing fair values in gold and copper. A good many claims have been located here, and a number of test shafts have been sunk from 30 to 60 feet on a number of them. The district is well fixed as regards transportation facilities, water, timber and fuel, and when capital comes in Kamloops district may give a good account of itself.

He's a McKinney Pioneer.

The World had a visit on Saturday from Mr. Joseph Saulter, one of the ploneers of Camp McKinney, B.C. He located Wiarton and other properties in Camp McKinney, and is a great believer in the district. In speaking of the Wiarton, in which he is largely interested, with Mr. C. D. Rand of Spokane, he stated that he believed it was one of the best claims on the market. It lay between the Cariboo and Waterloo properties, and carried the same ore bodies. Where development work had been done on the Cariboo, immediately adjoining the Wiarton boundary line, the vein showed he over six feet wide, and the vein showed a similar width on the Waterloo, on the other boundary line of the Wiarton. Mr. Saulter says that the ore specimens on the Wiarton are rich in free gold, and that, although the veins have not yet been proven to any He's a McKinney Pioneer.

Good Rathmullen News.

Messrs, Hall & Murray received Saturday morning a telegram in cipher as to Rathmullen, which stated that they have struck the ledge, and have a width of over 30 feet, but have only found one wall, and are still cross-cutting. This is most encouraging news to this firm, who had sufficient pluck to underwrite a very large block of the stock a couple of months ago, for the purpose of enabling the Rathmullen Company to do the work recommended by Mr. Jeffery, a mining engneer, and which is now producing such eminently satisfactory results.

The stock is now very much in demand,

The stock is now very much in demand and on Saturday quotations were unobtainable at any figure. Further particulars as to this rich strike are expected by wire.

An Information Bureau. Greville & Co. have opened a Bureau of Information for the benefit of their custom-

To Develop Peat Deposits.

Peterboro, March 18.—A company known as the Trent Valley Peat Fuel Company has been incorporated, with sole authority to manufacture peat fuel in Peterboro, Ontario, Northumberland, Hastings, Victoria, Prince Edward and Durham Counties. The charter members are: Mayor Davis of Peterboro; Aaron Cox, director of the Central Canada Loan & Savings Company; W. G. Morrow, manager of the Toronto Savings & Loan Company; J. R. Stratton, M.L.A. for West Peterboro, and W. S. Sims, contractor for the Trent Valley Canal. As all those gentlemen are kinsmen or business partners of Hon. G. A. Cox, it is surmised that the astute capitalist is behind the scheme. The company are installing three peat-compressing machines at their newly-established works at Kirkfield, and expect Kinney, RathmullenDigging—Saturday's

The production of gold bullion last year was 16,175 ounces, valued at \$271,906, but this does not include the output of a mine on the Seine River, for which returns have not yet been received. It is understood that Mr. Blue refers to the Golden Star. In 1897 the bullion product of the Province was 11,412 ounces, in 1896 7154 ounces, and in 1895 3038 ounces, and it is expected that this year will show an increase, both positively and relatively, much greater than in the past four years.

The production of pig iron in the Province last year was 48,253 short tons (tons of 2000 pounds), valued (at the selling price at the works) at \$550,780. The industry gave employment to an average of 130 men, and the total amount of wages prid for labor was \$61,476. With the establishment of the new smelter at Deseronto, there will undoubtedly be a great increase in the production of pig iron during the coming year.

Mitchell, Wallace & Co.'s Review.

The tone of the market has improved, and the brokers are busy again. We find considerable enquiry for low-priced Republic stocks. We would caution investors to be very careful when putting thoney into stocks of this class. Golden star is still the leader of the list. The price is steady stocks of this class. Golden star is still the leader of the list. The price is steady stocks of this class. Golden star is still the leader of the list. The price is steady stocks of this class. Golden star is the leader of the list. The price is steady stocks of this class. Golden star is the leader of the list. The price is stocks. We would caution investors to be very careful when putting thoney into stocks. We would caution investors to be very careful when putting thoney into stocks. We would caution investors to be very careful when putting then putting the past week. Furchas-till the leader of the list. The price is stocks of this class. Golden star is stocks. We would caution investors to be very careful when putting the past leader of the list. The price is stocks of this class. Golden sta will develop into great mines. The Mother Lode mine will probably be included in the list of great mines. We are offering snares in the Morrison, located within a short distance of the latter. The Morrison has a phenomenal ledge, about 100 feet in width, carrying values in copper, gold and silver. The Morrison will probably be in the front rank of producing mines. The Slocan silver lead list is very active. Rambler-Carilvo is being taken for investment. This company shipped five car loads of very rich ore last month, and they will probably ship seven carloads of equally high grade this month. This company will probably pay regular dividends. When the upraise is completed, the production will be more than doubled. Noble Five has struck a large body of good ore, and the demand from Western brokers is still unsatisfied. The parties who sold this stock in Toronto a few months ago are now trying to get it at double the price. Dardanelles looks cheap. The Rossland list has been more active. Evening Star and Iron Colt are in demand. Iron Mask and Virginia are neglected. Both of these are likely to make a rapid advance. Orders for Novelty are coming from Montreal, and the shares are being bought for an advance, because the control is now held by the Montreal Gold Fields Co. Jumbo can be picked up at a low price. This is a property under excellent management, with a property in the Republic to Montreal people, and the control of all three anamed may pass into the same hands. Black Tall is selling at half the price of ninety days ago, and looks cheap. They have good ore, and this property will be one of the leading shippers. The management is first-class.

FIRED A BRITISHER.

Correspondent at Nice of The Lon don Daily Mail Was Expelled. Ing fair of many land was Expelled.

Nice, March 19.—Premier Dupuy, who is French Minister of the Interior, to-day signed an order expelling from France the correspondent of The London Globe and Mail. This action is taken by reason of the publication in London of a number of articles by the correspondent in question, the tendency of which was to prejudice foreigners against the Riviera.

> English Railroaders Arrive. English Railronders Arrive.
>
> New York, March 19.—Among the passengers arriving on the Cunard Cliner Campania yesterday were four prominent English railroad officials, who have been sent here to study the American automatic coupling system. They are: R. P. Ellis, assistant superintendent of the Great Eastern Railway: H. J. Ivatts, chief locomotive superintendent of the Great Northern Railway: T. C. Mein assistant superintendent of the Great Eastern Railway, and J. Constantine, assistant superintendent of the Midland Railway.

Diplomats Congratulate Loubet. says that the ore specimens on the Wiarton are rich in free gold, and that, although the veins have not yet been proven to any depth, as the Cariboo has, he believed it had a good future.

WILLIAM CROZIER DEAD.

n Old and Respected Citizen Died Sunday Morning.

After a weeks suffering with apoplexy, William Crozier died yesterday morning at the residence of his son-in-law, Dr. G. H. Carveth, 229 College-street. Mr. Crozier was in his 76th year, and was one of the pioneers of this province. Born in Ireland, he came direct to Toronto at an early age, and had lived here ever since. He engaged in the contracting business, and for 15 years was one of the prominent figures around the city. During the past few years, owing to ill-health, he led a retired life. Up to a few weeks ago Mr. Crozier retained his live interest in politics, and was a firm member of the Conservative party. He leaves a widow and three daughters to mourn the loss of a devoted husband and faithful father. His children are Mrs. Dr. Carveth, Mrs. George Macdonald and Mrs. Robert Lindsay of Streetsville. The funcrat will likely take place to-morrow afternoon.

The Rate Reduced-Service Remain the Same.

From Toronto and Hamilton by Canadian Pacific and T., H. & B., in connection with "America's Greatest Railroad," the New York Central. Rates same as any other line. Train leaves Toronto 5.20 p.m., Hamilton 6.25 p.m., every day, with same fine service as before. Through buffet sleeper. Land at Grand Central Station—the only one in the city of New York—at 8.15 a.m. C. E. McPherson, C. P. R., Toronto; F. F. Backus, T., H. & B., Hamilton, or H. Parry, New York Central. Buffalo. N.Y., will be glad to furnish full particulars on application.

A Magic Pill—Dyspepsia is a foe with which men are constantly grappling, but cannot exterminate. Subdued, and to all appearances vanquished, in one, it makes its appearance in another direction. In many the digestive apparatus is as delicate as the mechanism of a watch or scientific instrument, in which even a breath of air will make a variation. With such persons disorders of the stomach ensue from the most trivial causes and cause much suffering. To these Parmalee's Vegetable Pills are recommended as mild and sure.

The Klondike Telegraph Line.

Vancouver, March 18.—Two parties of men who will do important work for the Dominion Government arrived to-day. They are to look after the construction of the telegraph line to Dawson and define the boundary between British Columbia and the Northwest Territory. The telegraph line will be constructed from Bennett, or, perhaps, Skaguay, to the Klondike, and there may be a sea link between Vancouver and Skaguay. The Klondike Telegraph Line.

Vancouver, March 19.—Two Americans, who gave the names of 5. J. Sweeny and F. W. Smith, have been sentenced at Vernon to five years each in penitentiary for burglarizing Cargill & Co.'s store at Armstrong. Rev. Dr. Paget, rector of Trinity Church, Muscatine, Iowa, and Dean of Southern Iowa, has accepted St. Peter's parish, Revelstoke, and will enter on his new duties the first Sunday in May.

A Big Order for Mining Machinery Placed in Portland.

The Portland Oregonian of a recent issue has the following: The Hammond Manufacturing Company of this city have just secured a contract from the Okanagan Free Gold Mines, Limited, of Oroville, Wash., and Rossland, B.C., for the erection

the late Patrick O'Grady from his son's residence, 30 Mission-avenue, to St. Michael's Cemetery.

Many of Toronto's oldest citizens attended the funeral on Saturday morning of the late Thomas Bonner, who passed away in his 86th year. The remains were conveyed from the family residence at 47 Ann-street to St. Michael's Cathedral, where high mass to St. Michael's Cathedral, where high mass to St. Michael's Cathedral, where high mass to St. Michael's Cemetery. Among the numerous floral offerings was a beautiful wreath from the family.

On Saturday afternoon all that was mordal of the late Mrs. Fowler Elton was laid to rest from her late home at 38 Maudistreet. Despite the cold weather, many of decased's friends were present at the services.

Mining Briefs.

Engineer Edgecombe of the Okanagan Free Gold Mines telegraphed yesterday from Wenatchee, Washington, that the 10-stamp mill had arrived there, and that arrangements had been made for its transportation up the Columbia and Okanagan portation up the Columbia and Okanagan by the street of the company. From the cell it will be transported on wagons to the proposed mill site.

Above property is being worked day and night. The machinery, including a 10-stamp mill, cyanide plant and sawmill, is on the way to the mines. June 1 is the date set for the first clean-up.

Summit-Republic and Dora Gold Mining Co's.

The favorable location of both properties is shown in the map below made from actual surveys of Henry United States deputy mineral surveyor. These properties have every prospect of a great future, being in direct course of the REPUBLIC VEIN and adjoining the great REPUBLIC MINE, as shown by the following map:

THE DORA shaft has cut three feet of quartz averaging \$154 per ton, picked specimens assaying from \$640 to \$1037 per ton is gold. Note that Noble Three and Jumbo veins also pass through this property.

THE SUMMIT tunnel has crosscut 15 feet of quartz at present writing without passing through the vein, the full width of which is therefore not yet determined. The depth is only 20 feet and the values consequently are low, averaging \$5.00 per ton in gold. This is known as the NUMBER SIX VEIN and was encountered just as was predicted from the map above, thus proving the accuracy of the surveys. The main crosscut tunnel is now being crowded ahead to cut the REPUBLIC VEIN, as shown in the map. The management of both these properties is of the highest character, including prominent mine operators, mining engineers, bankers and business men as can be ascertained by investigation, which is solicited. Work is being vigorously pushed to develop these properties rapidly, and the personnel of the management insures results for the best interests of the stockholders. We have a limited amount of stock in each company, as follows: Summit-Republic at 6 cents per share, and strongly recommend these AS AN INVESTMENT. For shares and further particulars apply to--
