GAS WELL AT PORT HAS PETERED OUT

The natural gas well at Port Stanley has petered out, and will be abandoned. This report was received here today, an official of the Southern Ontario Gas Company being sponsor for the state-mant.

I would go and this in the state of plenty to eat. And could always fight on a nice clean street, and if I did not suffer from real cold feet.

The company was of the opinion that a good well had been struck, the flow being at the rate of three million feet a day. A number of agents were ready to take leases, if the test proved satisfactory. However, the supply dwindled down, and experts decided that merely a pocket of gas had been struck.

The Southern Ontario Company is making numerous tests in various parts of Western Ontario in an effort to locate more gas.
