PROBABILITIES FOR 1877.

(See General Sketch of Weather, page 28.)

This month will in all probability continue much like the preceding one. There will be some heavy falls of snow, but much of the month will be bright, clear and fairly cold. The third cold snap or spell of the winter will occur during this month, but there are no indications of its unusual length or severity. Winds betokening the approach of March will set in before the close of the month.

VENNOR'S "BIRDS OF PREY" is a most beautiful ornament for the Drawing-room table.
