

ment of its finances, and with the utmost confidence at their approval. Let me give the illustrations in the matter of the redemption of a per cent. and 5 per cent. bonds of the Province, and their conversion into three per cents a few years ago, I made a sale of a million dollars of three per cents, which netted to the Province 96 per cent, free of all commissions. There has not been in any province of Canada a sale of Bonds on such advantageous terms.

EASTERN EXTENSION CLAIM.

I feel that the Government is entitled to no small degree of credit for the persistent and successful manner in which the Eastern Extension claim was pressed to a satisfactory conclusion; but instead of giving to the Government the share of credit to which we were entitled in connection with this matter, our opposition friends at once began to find fault because the amount had been put into current revenue. This criticism is unjust. The claim arose entirely from interest, and if the amount had not been withheld, the current revenues would have received the benefit from year to year; therefore, when the money was paid it was proper that it should go into revenue account. At the time of the payment, there was a large floating indebtedness incurred for roads and bridges, in respect of which Bonds had not been issued, in anticipation of receiving this amount, and when it came in, it was used to pay the debt of the province. The Government did as any business man would do, viz., used the money for the reduction of the provincial indebtedness.

CRITICISM OF OPPOSITION PLATFORM.

It is perhaps due to the Leader of the Opposition that I should call your attention to the platform upon which he appeals to the electorate for support.

First, and apparently most important of all, he asks for an amendment of the Election Act, so as to provide for a change in the ballot. Mr. Hazen has not indicated what form of ballot he would provide, but presumably it would be the same as is used in Dominion elections. Before asking the electorate to support a change of this nature, the burden is surely upon the leader of the Opposition of proving that the adoption of the Dominion ballot has been the means of preventing bribery and corruption, and of giving to the electors that freedom in the exercise of their suffrage which we all admit it is desirable they should enjoy. I am inclined to think that upon consideration you will decide that the Dominion ballot, with its somewhat cumbersome and expensive machinery, is not more calculated to preserve electoral purity than the simpler ballot which is in use in provincial elections.

That plank in Mr. Hazen's platform which declares that no contract for the construction of any public work shall be entered into unless tenders be first advertised, is only a statement of the course which is pursued by the Chief Commissioner, in respect to all important public works. Tenders are always asked for, except in cases where by reason of emergencies and the necessity of acting quickly, and also by reason of the character of the repairs to be made, it is impossible to do the work as well by tenders as by day's work.

With regard to his contention that there should be a change in the system of auditing the public accounts, and in the appointment of the Auditor General, Mr. Hazen seems to forget that the Auditor General of New Brunswick has as much power as the Auditor General of Canada: no payment can be made except with his approval.

The reduction of the number of Members in the Legislative Assembly and the disturbance of the present representation from the counties which would result from the division of the Province into ridings, would be no improvement upon the present system of representation.

Mr. Hazen urges that a progressive agricultural policy should be adopted, to induce assistance in dairying, to pork-packing factories and to facilities for exporting the agricultural products of the province to the markets of Europe. The fact that for a number of years the policy of the administration has been to assist the agricultural interests of the province in every possible direction, and the assistance which has been given to dairying and the establishment of improved flour mills seem to have been forgotten by the Leader of the Opposition. His suggestion that bonuses should be given to pork-packing factories seems to be quite unnecessary in view of the fact that there are several pork-packing establishments in the province, and private enterprise has recently been enlisted for the erection of a very large factory in Sussex in the County of Kings.

There is only one other plank in the platform of the Leader of the Opposition, as published in the daily papers, which seems to require attention, and that is his proposal that the By-road appropriations for the several counties in the province be paid each year to the County Councils, to be expended by the Councils through Commissioners appointed by them. Mr. Hazen, perhaps, is not aware that this course in the past was adopted in respect to several counties and the Councils preferred that the money should be paid under the direction of the Board of Works and requested the Government to take over the expenditure. One can very easily see how much better it is for the Province that the present course should be pursued, because in the case of large expenditures, which are required, such as the rebuilding of bridges over large streams, upon proper representation made to the Chief Commissioner, special grants are made from time to time. If, however, the entire charge of the By-roads were vested in the Municipalities, as proposed by Mr. Hazen, the result would necessarily be to either lead to a direct tax upon the people of the municipalities to make good any deficiencies to meet extraordinary requirements, or that the wants of the people in this respect should be neglected.

LABOR CANDIDATES IN ST. JOHN.

In view of the fact that the Opposition party in the City of Saint John have selected two gentlemen who have been chosen by Labor societies in that city as their candidates, one is justified in assuming that the platform to which the Labor candidates are pledged is the platform of the provincial Opposition. Feeling a deep interest in the welfare of all classes of people within the province, the Party which I have the honor now to lead has never hesitated to make ample provision for the protection of the laboring classes. The Mechanics' Lien Act, the Woodmen's Lien Act, and the Act for the protection of wage earners for the passing of all of which laws I and my colleagues can claim credit, are a marked and advanced step for the amelioration and protection of the interests of Labor. The Government is also committed to an Employers' Liability Act, which will contain provisions that will be just to the employee and employer alike. But those who claimed to speak for the Labor Societies for the City of Saint John at the last session of the Legislature insisted upon certain provisions, the adoption of which would result in creating a feeling of distrust and danger upon the part of employers which would be greatly against the public interest, and not less against the interests of labor itself. The Government was asked on behalf of the Labor Societies to provide that no matter how careful an employer might be in the selection of his workmen, or in the providing of machinery and plant, if through the negligence of a servant, another in the same employment and in the same grade, should be guilty of negligence, as a result of which the other employee should be injured, the employer should be bound to pay for the injury sustained. This provision seemed to a Committee of the House, to whom the matter was referred, consisting of gentlemen upon both sides, so undesirable that the further consideration of The Employer's Liability Act was allowed to stand over until next session. I cannot help thinking that the encouraging of the Labor Societies to believe that they can procure legislation to the full extent asked for by Mr. Hatheway, in the face of what Mr. Hazen knows to be the feeling of the business men in the Legislature, and particularly of some of the most prominent members of his own party, is an attempt to delude the laboring people into the belief that something will be done for them which Mr. Hazen knows cannot be done. The laboring people of this province can rely upon the fact that the same consideration, the same desire to improve their condition which has been manifested by the provincial government party in the past, will be exercised toward them in the future. It should never be forgotten, however, that the "laborer" of today in this country of development and progress may be the "employer" of tomorrow, and nothing should be

able to disturb the amicable relations which happily exist in this Province between capital and labor.

PROGRESSIVE POLICY IN THE FUTURE.

This Government will, if we should, as I have not the slightest doubt we will, be fortunate enough to secure a renewal of your confidence, pursue in the future, as in the past, a broad and progressive policy, having in view the development of the industries of the province. We will pursue a vigorous course so as to provide good roads, bridges, wharves and steamboat accommodation for the people whose comfort and interests are so much wrapped up in these important matters. We also have in view a policy to provide for the re-forestation of the Crown timber lands, so as to supply for coming generations timber to take the place of that which is cut from time to time.

READJUSTMENT OF PROVINCIAL SUBSIDIES.

I would also call your attention to the fact that we have pressed vigorously for a readjustment of the financial aid which the Province receives from the Federal Government, and it has no doubt been a matter of interest to you that all the provinces of Canada have united with us in a demand for a readjustment of the subsidies, upon a basis which will be reasonable and fair to all sections of the Dominion.

HALIFAX AWARD.

We are also pressing for a settlement of the Fisheries questions which are outstanding between the Province and the Dominion, and have every reason to believe that the just claim which this Province has, to be paid its share of the Halifax Award, made under the Treaty of Washington in respect to the fisheries, will be recognized by the Courts. The readjustment of the Subsidies and the payment to the Province of its share of the Fisheries Award will give an increased revenue of about \$200,000 per year. It may be said by our opponents that the Province does not require this money. I maintain, however, that it does. In the development which is going on, in order to properly discharge the duty to the people which devolves upon the Provincial Government, in connection with education, the maintenance of the Asylum, assistance to Hospitals, improvement in the roads and bridges, the opening up of new lands to settlement, the encouragement of immigration, the further development of the agricultural resources of the Province, in the improvement of transportation upon the inland waters of the Province by the building of wharves and the giving of encouragement to steamboat lines, in these and many other directions there is great work for the Provincial Government to do. This Province, jointly with the other Provinces of Canada, is paying into the Dominion Exchequer in customs duties very large sums, a portion of which beyond what we now receive can be well employed in the promotion of those objects which are of special interest to the people.

REPRESENTATION IN PARLIAMENT.

In addition to our more active work in securing a readjustment of the Provincial Subsidies and the payment over of the Fishery Award, we have felt it our duty to consider very carefully the question which has been raised as to this Province suffering a reduction of its representation in Parliament as a result of the recent census. Our view is that as the ratio of increase of population in this province during the past ten years has exceeded the ratio of increase in the four original provinces of Canada, a correct interpretation of the British North America Act will prevent this Province losing a representative. We have brought the matter to the attention of the Dominion Government and will urge that no injustice shall be done to New Brunswick in this important matter.

NO REDUCTION OF STUMPAGE.

In certain sections of the Province in which the lumber interests are very large, some of our opponents are promising a reduction of the stumpage in case the Opposition should get into power. We have no hesitation in announcing that it is the policy of this Government to give no reduction of stumpage, but to exact for the general benefit of the Province from Crown timber licenses such a reasonable charge as may be made from time to time without burdening the lumbering interests of the country; and we shall deal on broad and equitable grounds with this important question, as the necessities of the province may demand.

FIRST DUTY TO THE PEOPLE OF THE PROVINCE.

I have sometimes felt that in the consideration of questions of provincial interest, there is exhibited too much of a party spirit and too little of a united effort to build up our own country by the development of its varied resources. So far as the Government of which I am the Leader is concerned, we shall at all times recognize that our duty is first to promote the welfare of the people of the Province, who entrust us with their confidence and have a right to look to us to ever keep in mind the advancement and the safe-guarding of their interests.

I am,
Yours faithfully,
LEMUEL J. TWEEDIE.

This Way Will Cure Else I'll Pay Your Bill Myself.

I will cure you—no matter how long you have had it—and take all the risk myself. I will furnish you the utmost that medicine can do; and unless it succeeds it shall be absolutely free. Simply send me the coupon or write me a postal, stating which book you want. I will then mail you a bottle—good at any price—of Dr. Sloop's Restorative. You may take it a month trial, if it succeeds, the cost is \$5.50. If it fails, I will give you your money back, and your mere word shall decide. You see this offer every one, at all times; and thousands every where are accepting it. And you must realize that I am curing these thousands, else the offer would ruin me. You are hesitating and are proving yourselves. You can have health by the asking. And I know from a vast experience that most of you must get my help to get well. The reason that my Restorative strengthens the inside organs. It is the result of a lifetime's study in learning how to bring back the power that creates all vital organs. It gives the weak organs power to do its duty, and power is all that weakness needs. The remedies that merely doctor the organs cannot bring results that last. Many of you know that from long and discouraging experience. The results from my Restorative are permanent. It reaches the cause that must be cured, whether the trouble is little or severe. The facts in my book will convince you that I am right.

CUT OUT THIS COUPON. For me all ready to send for something, but forget. Mark the book desired and mail this with your name and address to Dr. Sloop, Box 11, Racine, Wis. Book 1 on Dyspepsia. Book 2 for Women. Book 3 on the Heart. Book 4 for Men (sealed). Book 5 on the Kidneys. Book 6 for Rheumatism. Book 7 on the Stomach. Book 8 for the Urinary System. Book 9 on the Lungs. Book 10 for the Throat. Book 11 on the Skin. Book 12 on the Nervous System. Book 13 on the Blood. Book 14 on the Liver. Book 15 on the Gall Bladder. Book 16 on the Pancreas. Book 17 on the Spleen.
