THE NEW YORK I MISONE, now more than seven the years old which was the first journal in the work that appeared regularly on an imperal eight-page that a so low a price as two cents, and which has attained the unparalleled aggregate of more than 100,000 subscriptions, respectfully solicits its share if the patronage which the Metropolitan Press is encelorth to receive. It asks especially the patronage and active favor of Republicans—of those in that all forms of operation, and derive that every henceforth to receive. It asks especially the patronage and active favor of Republicans—of those who hate all forms of opression, and desire that every rational being shall be free to employ his faculties in such innocent manner as he shall deem best—of those who could extend Liberty and limit Slavery; but it further appeals likewise to all who look and labor for the return of National thrift, plenty, prosperity, through the protection of American Industry by wisely discriminating duties on Imports—all who favor National progress through internal development and melioration rather than by external aggression and extension—all who would rather have the National resources devo.ed to the construction of a railroad to the Pacific than to the purchase or conquest of Mexico, Nicaragus or Cuba—all who for trench radically our present inordinate Federal expenditures by abolishing or immensely reducing the Army and Navy, and expending the money thus saved on works of beneficence which will endure to bless our children—all who profoundly realize that RIGHTEOUSNESS exalieth nation," and that no real advantage can ever accrue to any person community from acquisitions or successes achieved py means which contravene the laws of Federal Right. The free allotment of limited portions of the Public Lands to Actual Settlers thereon, and every hopeful plan intended to diminish the sum of human misery dearth of employment or inadequate recompense—every scheme especially that seems to help the unfortunate by enabling and teaching them to help themselves—must command our carnest sympathy and cooperation.

elves--must command our earnest sympathy and cooperation.

Withen the present year The Tribune has provided itself with a new and faster Press at a cost of \$30,000 merely that some of our subscribers may receive their papers a mail earlier than they otherwise might do. With correspondents at the most important points throughout the civilized world, and, a staff of writers chosen from among the best in the country, we believe that even those who dialike the politics of our sheet concede to it frankness in avowing its convictions and ability in maintaining them. We applie then to those who believe that an increased circulation of The Tribune would conduce to the political intellectual and moral well-being of the Republic, to aid us in effecting such increase. As we employ so traveling soliciters of subscriptions, we ask our present patrons in every locality to speak to their neighbors and friends in our behalf; we shall gladly sective and read a specimen copy of one of our editions and shall be particularly grateful to those who may send us such names from post-offices at which we have now no supscribers. Whatever additions may thus be made to our circulation shall be paralleled by increased efforts and expenditures to make our issues more valuable and useful than they have hitherto been.

Scientific American PROSPECTUS

VOLUME FOURTEEN

Begins September 11, 1858.

MECHANICS, INVENTORS.

MANUFACTURERS AND FARMERS. THE SCENTIFIC AMERICAN bas

now reached its Fourteenth year, and will enter upon a new Volume on the 11th of September. It is the only weekly publication of the kind now issued in this country, and it has a very extensive circulation in all the States of the Union. It is not, as some might suppose from its title, a dry, abstruse work on technical science; on the contrary, worlds, as to please and instruct every one. If the Mechanic or Artisan wishes to know the best machine in use, or how to make any substance employed in his business—if the Housewife wishes to get a recipe for making a good color, &c.,—if the Inventor wishes to know what is koing on in the way of improvements—if the Manufacturer wishes to keep posted with the times, and to employ the best facilities in his business—if the Man of Leisure and Study wishes to keep himself familiar with the progress made in the chemical laboratory, or in the construction of telegraphs, steamships, railroads, reapers, mowers, and a thousand other machines and appliances, both of peace and war—all these desiderata can be found in the Scientific American, and not elsewhere. They are here prestaerata can be found in the Scientific A me-rican, and not elsewhere. They are here pre-sented in a reliable and interesting form, adapt-ed to the comprehension of minds unlearned in the higher branches of science andart.

MOFFAT'S LIFE PILLS.

And Phænix bitters free from all mineral Poisons.

— Seware of Counterfeits.—The great popularity which Moffat's Life Pills and Phænix Bitters have attained in consequence of the extraordinary cures effected by their use, renders it unnecessary for the proprietor to enter into a particular analysis of their medicinal virtues or properties. Having been more than twenty years before the public, and having the united testimony of more than Three Millions of persons who have been restored to the enjoyment of perfect health by them, it is believed that their reputation as the best vegetable medicine now before the public, admits of no dispute. In aimost every city and village in the United States there are many who are ready to testify to their afficacy in removing disease and giving to the whole system renewed vigor and health.

In cases of Scrofula, Ulcera, Scurvey or Eraptions

The receipt of Advance Sheets from the British publishers gives additional value to these Reprints, maximuch as they can now be placed in the hands of subscribers about as 2000 as the original editions.
