The work of this department has to ganizations are handed in with a stailing request to have material available for the members when they call. It is not unusual to have both sides of the participants in a debate working at opposite sides of the same table in the reference room. The chief difficulty site sides of the same task erence room. The chief difficulty ere, is that the saelves are now at eir capacity for books, and sometimes ere are scarcely enough seats for all ho come to study and work. During he year \$,550 people were given personal ssistance in special work, while, of sourse, many thousands of others were sufficiently acquainted with the working of a library to need no special help in the information they wanted.

For Boys and Girls.

The providing of good literature for the boys and girls is one of the important functions of the library. During the last year, the library provided the children of London with 85,000 volumes for dren of London with \$5,000 volumes for their reading, and an interesting innovation was the starting of two new reading clubs for girls, one of these being largely made up of children of foreign birth or foreign parentage.

A demand from the southeastern part of the city for library facilities is being considered by the library board who are anxious to extend the use of the library as far as possible and to as many people as can make use of the privileges that are their's as citizens.
