

To The Manufacturers

The town of Windsor Mills, Province of Quebec, has a power and site to offer to manufacturers who wish to establish a business.

A good distributing point having both the Grand Trunk and C. P. Railways.

For further information address the Mayor of the town.

UNITY IN MACHINE DESIGN.

One of the signs of the advance of civilization has been the increased amount of foresight and planning with which work has been done. Our forefathers worked day by day if not hour by hour. They built machinery by starting with a crude framework and building to it here and there as the exigencies of the case may have demanded. While we are by no means entirely removed from that stage of progress, a careful survey shows the utter impossibility of building modern machinery for most purposes without fairly complete drawings.

The two oldest machine tools, the lathe and planer, have not yet given way entirely to this advance, and it is doubtful if many have attacked the problem of design except as a matter of making improvements.—
American Machinist.

ALASKA'S MINERAL OUTPUT.

Mine production of gold, silver and copper in Alaska in 1912 was \$22,285,821, against \$20,505,664 in 1911, an increase of \$1,780,158. The value of gold production last year is estimated at \$17,145,951, that of silver \$316,839. In 1911 the output of gold was \$16,853,256. The copper output of Alaska for 1912 was 29,230,491 pounds, valued at \$4,823,031, an increase from 1911 of 1,962,613 pounds.

A WORD OF CAUTION.

The Balkan peace, the Paris Journal des Debats remarks, "is a factor of which the importance cannot be disguised. But what we now begin to see is that the Balkan war has had a profound and complex influence. Not only Europe, but the whole world has felt the influence on the resultant financial crisis, and in all the world one can now discover the results of the long period of money tension."
