DR. ED. MORIN'S WINE

CRESO-PHATES

Compound of Beechwood Creosote and Phosphates.

Cures Coughs, Colds, Bronchitis, Catarrh, Asthma, Consumption.

Try it if you want to be Cured.

DR. ED. MORIN & CO.

Sirs,—I used Dr. Ed. Morin's Wine and I found it very good. I was suffering for a long time with severe Bronchitis, which affected my health so much that I got thin in a short time, but as soon as I commenced to use this wine I found a great change in my health, and cough ceased, appetite came back, and in the space of three or four weeks I gained fifteen pounds in weight, which I had lost during my illness. I recommend Dr. Ed. Morin's Wine with pleasure to all persons suffering with Pulmonary Diseases; also to weak persons, because I consider they can never take a better strengthening compound to re-establish their strength promptly.

Your obedient servant,
J. B. CHOUINARD, Quebec.
