

The PAGE Wood Saw has all the latest improvements

This is the Saw that has become such a favorite with farmers—and it costs only \$19.00, delivered free to any point in Old Ontario.

Its frame is built of heavy angle steel bars, strongly bolted and rigidly braced by heavy flat steel bars.

The shaft is a 4 foot 4 inch piece of lathe-turned steel—runs in well-habited, dust-proof, non-heating boxes. Balance wheel and pulley are interchangeable.

Built so strongly that it never shakes when in operation. And it's good for a lifetime of service.

Saw Blades supplied at these low prices

SEED CORN — WISCONSIN No. 7

We have some fine Wis. No. 7 Seed Corn for sale. This corn is picked from the standing stalk, carefully selected, and placed in our dryer, a building built for that purpose. This method of drying insures the buyer of a fine crop of good seed corn. Owing to the unusual wet season throughout the corn belt, prices at once.

THE POTTER FARM,

R. R. 2, ESSEX, ONT.

W. W. Ballantyne is President

At the recent annual meeting of the directors of the Ontario Provincial Winter Fair the following officers were elected:—Honorary President, Wm. Smith, M.P., Coburn, Ont.; President, W. W. Ballantyne, Stratford; Vice-President, John I. Platt, Hamilton; Secretary, Treasurer, R. W. Wade, Toronto. Executive Committee—John (Hardhouse), Weston; R. S. Stevenson, Ancaster; J. B. Brethour, Burford; William McNeil, London; A. McKenney, Amherstburg.

The new president, W. W. Ballantyne, is a dairyman and one of the

CUTAWAY HARROW COMPETITION.

Lack of space has prevented us from inserting our advertisement concerning our Great Cutaway Harrow competition as we had intended doing. We do not wish our Folks to think, however, that the competition has been withdrawn. A great deal of interest has already been created and we are sure that the three handsome prizes which are offered will be won in a very short time. Full details of the competition were given on the back cover of last week's issue of Farm and Dairy, and we would refer any who may be interested to that number.

representatives of the dairy interests on the Fair Board. He is also president of the Rural Publishing Company, which publishes Farm and Dairy. The dairymen of the province will be well pleased to see one of their number as president of the Winter Fair Association.

The date for the next Winter Fair is December 1 to 7, 1916. It was the decision of the directors to add a class for shearing ewes for the 1916 Show, to take the place of the class for shearing wethers.

A Profitable Small Orchard

OUR orchard at Spruce Lodge Farm is only one-half acre in extent. In 1914 we had 88 barrels to spare, and realized \$110 a barrel clear on this fruit. This makes our half acre of orchard about the most profitable land on the farm.

My real interest in orcharding dates back to an Institute trip that I took with Mr. Porter, of Appleby. He made me a convert to spraying, and all other up-to-date practices. In our orchard now we spray plow, cultivate to about the middle of June, and then sow a cover crop of Hungarian grass and buckwheat. The chickens harvest the buckwheat. We spray three times, prune every year and manure every second year.

Our spray mixture is lime sulphur and lead arsenate. In all of that 88 barrels we did not find a dozen wormy apples. The last spraying we gave was a regular soaking, the mixture dropping off the leaves. Apples with us as with most dairy farmers, are just a sideline, but it is a sideline to which one can afford to give the best attention.—W. B. Shearer.

WALKER SONS

Essex Farm Seed Corn
