

QUESTIONS AND ANSWERS. Miscellaneous.

CLYDE STALLION NUMBERS.

Will you please give me the numbers of the two imported Clydesdale stallions, Silver Pure and Mackinnon?

SUBSCRIBER.

Ans.—Silver Pure [3015] (4015); Mackinnon [312] (5196).

SUGAR-BEET PULP.

Where is the nearest sugar-beet pulp manufactured (outside of Berlin)?

D. McL.

Ans.—The only sugar-beet factories in Ontario are at Berlin and Wallaceburg. Address the latter, the Wallaceburg Sugar Co., Ltd.

DAUBENEY OATS.

Where could I get some Daubenev seed oats?

J. E.

Wellington Co., Ont.
Ans.—Write to the seedsmen who advertise every spring in the "Farmer's Advocate." Farmers having the variety for sale could do a profitable business by using our advertising columns.

DITCHING MACHINES.

Please answer through "Farmer's Advocate," giving information of any firm that are building ditching machines.

W. W.

Ans.—Manufacturers of ditching machines should take note of this inquiry, as we have no doubt there are many other farmers looking for some such implement.

TREATING TREES FOR INSECTS AND FUNGUS.

I herewith send you order for \$1.50 to pay my subscription for the year 1906. We find the "Farmer's Advocate" both instructive and entertaining. I take the liberty to ask your opinion on the merits of enclosed sheet. The agent stated that the City Council of London were having all the shade trees in the city treated by the _____ process. Is this correct?

S. C.

Ans.—It is not correct. The Park Commissioner informs us that the city authorities are not quite fools enough to be humbugged into thinking they could destroy insects by putting stuff into holes in the trunks of trees. "Why," said he, "if it were possible to get enough poison into the circulation to kill the pests in that way, you would kill the tree itself. What's more," he said, "we were never asked to try the alleged remedy, and if we had been, the agent would have soon found out what we thought of such a scheme."

FALL PLOWING.

In the spring of 1905 I rented farm for one year to B and C (father and son). On this place, part of the plowing had been done the fall before (1904). There were no writings between us, although I mentioned to them, and told tenant to get the forms when he went to town. This he failed to do, and said afterward that it would not be necessary, as what they agreed to do they would do. Since harvest, I have mentioned the plowing at various times to C when we were together, and as the season went on they did not plow any. I went to B and said, "What about the plowing?" He says that plowing was never mentioned, and that I must have misunderstood the deal. I maintained that it was mentioned and gave time and place; after which he called his son over, and asked him if he understood that they were to do the plowing. The son then said that they had never agreed to do the plowing. As I have no witness, would I have any show in a claim for damages, as they refused to plow a furrow, but never said anything until after it got too late to plow. C could not have misunderstood me when I mentioned it after harvest, as I offered to pay for whatever they plowed over and above the amount. They received the benefit of this, and it is customary in this part to leave as much plowed as you get. Have I a case? The son is of age.

Ont.

PLOWBOY.

Ans.—Yes, but you would probably have considerable difficulty in respect of the matter of evidence; that is to say, you certainly have a case, but might not be able to establish it to the satisfaction of a court.

DON'T THROW MONEY AWAY

THE SETTING HEN—Her failures have discouraged many a poultry raiser.

You can make money raising chicks in the right way—lots of it.

No one doubts that there is money in raising chickens with a good incubator and brooder.

Users of the Chatham Incubator and Brooder have all made money. If you still cling to the old idea that you can successfully run a poultry business using the hen as a hatcher, we would like to reason with you.

In the first place, we can prove to you that your actual cash loss in time you keep them hatching and brooding, will be enough to pay for a Chatham Incubator and Brooder in five or six hatches, to say nothing whatever of the larger and better results obtained by the use of the Chatham Incubator and Brooder.

If you allow a hen to set, you lose at least eight weeks of laying (three weeks hatching and five weeks taking care of the chickens), or say in the eight weeks she would lay at least three dozen eggs. Let the Chatham Incubator on the hatching, while the hen goes on laying eggs.

Our No. 3 Incubator will hatch as many eggs as twenty setting hens, and do it better. Now, here is a question in arithmetic:—

If you keep 20 hens from laying for 8 weeks, how much cash do you lose if each hen would have laid 3 dozen eggs, and eggs are worth 15 cents per dozen? Ans.—\$9.00.

Therefore, when the Chatham Incubator is hatching the number of eggs that twenty hens would hatch, it is really earning in cash for you \$9.00, besides producing for your profit chicks by the wholesale, and being ready to do the same thing over again the moment each hatch is off.

Don't you think, therefore, that it pays to keep the hens laying and let the Chatham Incubator do the hatching?

There are many other reasons why the Chatham Incubator and Brooder outclasses the setting hen.

The hen sets when she is ready. The Chatham Incubator is always ready. By planning to take off a hatch at the right time, you may have plenty of broilers to sell when broilers are scarce and prices at the top notch. If you depend on the hen, your chicks will grow to broilers just when every other hen's chicks are being marketed, and when the price is not so stiff.

The hen is a careless mother, often leading her chicks amongst wet grass, bushes, and in places where rats can confiscate her young.

The Chatham Brooder behaves itself, is a perfect mother and very rarely loses a chick, and is not infested with lice.

Altogether, there is absolutely no reasonable reason for continuing the use of a hen as a hatcher and every reason why you should have a Chatham Incubator and Brooder.

We are making a very special offer, which it will pay you to investigate.

Small Premises Sufficient For Poultry Raising.

Of course, if you have lots of room, so much the better, but many a man and woman are carrying on a successful and profitable poultry business in a small city or town lot. Anyone with a fair sized stable or shed and a small yard can raise poultry profitably.

But to make money quickly, you must get away from the old idea of trying to do business with setting hens as hatchers. You must get a Chatham Incubator and Brooder.

To enable everybody to get a fair start in the right way in the poultry business, we make a very special offer which it is worth your while to investigate.

We can supply you quickly from our distributing warehouses at Calgary, Brandon, Regina, Halifax, Chatham. Factories at CHATHAM, ONT., and DETROIT, MICH.

The MANSON CAMPBELL CO., Limited, Dept. No. 1, CHATHAM, CANADA
Let us quote you prices on a good Fanning Mill or good Farm Scale.

TURKEYS! 147 BRONZE TURKEYS

Were shown at Winter Fair, Guelph, the past three years (Dec., '02, '03, '04), for which 18 first prizes were offered. Result: Bell wins 12 firsts; three other exhibitors, 2 firsts each. I bred all my winners. Stock for sale.

The Chatham Incubator and Brooder has created a New Era in Poultry Raising.

The setting Hen as a Hatcher has been proven a Commercial Failure.

The Chatham Incubator and Brooder has always proved a Money Maker.

A Light, Pleasant and Profitable Business for Women

Many women are to-day making an independent living and putting by money every month raising poultry with a Chatham Incubator.

Any woman with a little leisure time at her disposal can, without any previous experience or without a cent of cash, begin the poultry business and make money right from the start.

Perhaps you have a friend who is doing so. If not, we can give you the names of many who started with much misgiving only to be surprised by the ease and rapidity with which the profits came to them.

Of course, success depends on getting a right start. You must begin right. You can never make any considerable money as a poultry raiser with hens as hatchers. You must have a good incubator and brooder, but which, perhaps you are not prepared to make just now, and this is just where our special offer comes in.

If you are in earnest, we will set you up in the poultry business without a cent of cash down. If we were not sure that the Chatham Incubator and Brooder is the best and that with it and a reasonable amount of effort on your part you are sure to make money, we would not make the special offer below.

WE WILL SHIP NOW
TO YOUR STATION
FREIGHT PREPAID
A CHATHAM INCUBATOR and BROODER
You Pay us no Cash
Till After 1906 Harvest

No. 1—80 Eggs
No. 2—120 Eggs
No. 3—240 Eggs

THE CHATHAM INCUBATOR—Its success has encouraged many to make more money than they ever thought possible out of chicks.

Every Farmer Should Raise Poultry

Almost every farmer "keeps hens," but while he knows that there is a certain amount of profit in the business, even when letting it take care of itself, few farmers are aware of how much they are losing every year by not getting into the poultry business in such a way as to make real money out of it.

The setting hen as a hatcher will never be a commercial success. Her business is to lay eggs and she should be kept at it. The only way to raise chicks for profit is to begin right, by installing a Chatham Incubator and Brooder. With such a machine you can begin hatching on a large scale at any time.

You can only get one crop off your fields in a year, but with a Chatham Incubator and Brooder and ordinary attention, you can raise chickens from early Spring until Winter and have a crop every month. Think of it!

Quite a few farmers have discovered that there is money in the poultry business and have found this branch of farming so profitable that they have installed several Chatham Incubators and Brooders after trying the first.

Perhaps you think that it requires a great deal of time or a great deal of technical knowledge to raise chickens with a Chatham Incubator and Brooder. If so, you are greatly mistaken. Your wife or daughter can attend to the machine and look after the chickens without interfering with their regular household duties.

The market is always good and prices are never low. The demand is always in excess of the supply and at certain times of the year you can practically get any price you care to ask for good broilers. With a Chatham Incubator and Brooder you can start hatching at the right time to bring the chickens to marketable prices when the supply is very low and the prices accordingly high. This you could never do with hens as hatchers.

We know that there is money in the poultry business for every farmer who will go about it right. All you have to do is to get a Chatham Incubator and Brooder and start it. But perhaps you are not prepared just now to spend the money. This is why we make the special offer.

IS THIS FAIR?

We know there is money in raising chickens. We know the Chatham Incubator and Brooder has no equal.

We know that with any reasonable effort on your part, you cannot but make money out of the Chatham Incubator and Brooder.

We know that we made a similar offer last year and that in every case the payments were met cheerfully and promptly, and that in many cases money was accompanied by letters expressing satisfaction.

Therefore, we have no hesitation in making this proposition to every honest, earnest man or woman who may wish to add to their yearly profits with a small expenditure of time and money.

This really means that we will set you up in the poultry business so that you can make money right from the start, without asking for a single cent from you until after 1906 harvest.

If we knew of a fairer offer, we would make it. Write us a post card with your name and address, and we will send you full particulars, as well as our beautifully illustrated book, "How to make money out of chicks." Write to-day to Chatham.
