MY BOY

I've raised my boy to be a soldier
In the battle for the right;
For country, peace and honor
He is not "too proud to fight."

May the God of battles spare us!
May our leaders see the light!
Whatever be the peril
May freedom conquer might.

Must our land be purged with fire?
Must our days be turned to night?

Must our homes be full of sorrow?
Must we give our heart's delight?

Then I know my boy'll be ready
Prepared to give his all
To hold his comrades steady
When they answer to the call.

Should he fall beside his brothers
And my eyes be dimmed with tears,
If all I love goes with him
And I dread the passing years

Still I know he did his duty,
That he triumphed in the fight,
That he gave his life for others,
That I raised my boy aright.

He came to Kentville on Wednesday to complete arrangements at Camp Aldershot for field hospital and general sanitary provisions for the large camp to follow.

Canada's Crop Conditions

Ottawa, May 12, 1916.—The Census and Statistics Office issued today, in the form of a press bulletin, the first of a press bulletin, crop report of the present season. It deals with the area and condition of the Fall Wheat crop, the condition of hay and clover meadows at the close of the winter and the progress of spring seeding up to the end of April.

AREA AND CONDITION OF FALL WHEAT.

Owing to the heavy fall of snow during the month of March, which protected the young plants from the spring frosts, the fall wheat is reported as being in exceptionally good condition at the end of April. In Ontario, where 820,600 acres were sown, as estimated last fall, not more than 5.6 per cent is reported as winter killed and in Alberta with 260,500 acres estimated as sown, the proportion winter killed is placed at 4.9 per cent. These proportions are lower than in any previous year, on record, for these Provinces. In 1914 the percentage winter kill was 19 in Ontario and 15.6 in Alberta, while last year it was 6.8 in Ontario and 6.2 in Alberta. The area winter killed this year was 45,800 acres in Ontario and 12,800 acres in Alberta as against 71,000 acres in Ontario and 14,300 acres in Alberta last year. The area of fall wheat to be harvested this year is placed at 774,800 in Ontario, 247,700 acres in Alberta, 9,400 acres in Manitoba, 4,100 acres in Saskatchewan and 6,200 acres in British Columbia, being a total for the Dominion of 1,042,200 acres as against 1,208,700 acres in 1915 and 973,300 acres in 1914.

The general condition of the crops on April 30th, which measured by the standard of 100 as representing a full crop, is 89 in Ontario, as compared with 93 last year and 78 in Alberta as compared with 83. For Ontario the figure was only surpassed on April 30 was 88, which converted into a standard of 100 as representing the average condition at the same period for the seven years 1909 to 1915 indicated a condition of 108 or an anticipated yield per acre of 8 per cent in excess of the seven year's average, provided that conditions between now and harvest time are not abnormal.

HAY AND CLOVER MEADOW

The proportion of hay and clover meadows winter killed proved to be unusually small, being only 3.5 per cent for all Canada as compared with 10 per cent last year, 14 per cent in 1914 and 22 per cent in 1913. The average condition was 92 per cent of the standard or full crop as compared with 91 per cent last year, 86.7 per cent in 1914, 89.6 per cent in 1913 and 74.6 per cent in 1912.

PROGRESS IN SPRING SEEDING.

It is as yet too soon to report on the Maritime Provinces. The spring is late, and the general conditions in Quebec and Ontario are not favorable for early planting. Last year on April 30, it was estimated that 63 per cent of the planting was completed as against 27 per cent this year. Of Spring Wheat this year 1.8 per cent of the estimated acreage was sown in Quebec, 4.3 per cent in Ontario, and from 26 to 80 per cent in the mid-west, being 26 per cent in Manitoba, 36 per cent in Saskatchewan and 80 per cent in Alberta. In 1915 not more than 8 per cent of the acreage under wheat remained to be sown after May first. The quantities of oats and barley sown at this date are also relatively small.
