## Charming Summer Resort

Two interesting little books of the illustrated folder type have been issued by the Grand Trunk Railway System, one being entitled "Songs of the Nipissing" and the other "The Eastern Coast of Lake Huron." The illustrations are very numerous, are of all sizes, and are scattered through the pages to elucidate the text and appear to the eye just as the story told in the letter press does to the mind. The prevailing note in these little works, upon which a profitable half hour may be spent by the reader, is the craving for change, and there can be no doubt that men and women who live in the stress and strain of today, and feel the throbs of advanced and advancing civilization, do require change—complete change for mind and body. The haunts described here minister to the intellectual as well as the physical health of the dweller in cities. The physical exercises that can be obtained among the woods and waters create and promote a perfectly sound bodily condition, while the multifarious life that is to be found, stimulates the intellectual faculties and prompt inquiry and investigation into nature's ways as they are revealed in her flora and fauna. The maps which are in these pamphlets enable the visitor to the wilds to realize his bearings at whatever part he may be, and the general information given enables him to economize his time and spend it to the best advantage.

## YELLOWSTONE NATIONAL PARK.

This famous national park offers to the tourist and sight-seer more novelty and curiosities than perhaps any other spot on earth. The stage ride from Monida is through scenery hardly inferior to the park itself, and this ride is one of the very many enjoyments of the trip.

The new route to the Yellowstone is via the Union Pacific and Oregon Short Line Railroads to Monida, Montana, thence daily by palatial Concord coaches of the Monida & Yellowstone Stage Company to all points in the Yellowstone National Park.

Full information cheerfully furnished on application to

The funeral of the late Miss Gertrude Winkless took place on Sunday afternoon at two o'clock to the Maple Leaf Cemetery. The item in last night's paper, should have read Miss Gertrude instead of Miss Grace Winkless.

Hackman Fred Bennett, while driving on Victoria avenue with two passengers, struck a hole in the street opposite the residence of Mr. Stegman. The result was that one of the springs broke. W. B. Wells came to the rescue and summoned another hack.

Among the Pueblo Indians six points of the compass are recognized, and each has its color. North is yellow, west is blue, south is red, east is white, the upper regions are many colored and the lower regions are black. All the prey gods are represented by their images in these six divisions.

For example, there is the yellow mountain lion of the north, the blue mountain lion of the west, the red mountain of the south, and so on. Likewise it is with the other beasts, and thus a very considerable number of deities is formed. All of them must receive worshipful attention lest they get angry and revenge themselves for the neglect.

Where Amber is Found.  
The largest quantity of amber is found on the southern shore of the Baltic between Memel and Konigsberg, where it is cast up by the action of the ground swell after the northern gales. It is also found on the coast of Sicily, on the shores of the Adriatic, on the English beach of Norfolk and Suffolk and at Cape Sable in Maryland. Mining for amber in beds of brown lignite or wood coal is carried on in Prussia, and it is found in excavations all over Europe.

**VonGunten Bros.,
