THE INK AQUARIUM.

How to Change Ink Into Water Con-taining Several Fish.

Some time when you have an even ng party at your house spring this clever trick on your playmates: Present a glassful of ink to the view of the spectators; then prove that it is ink by dipping a visiting card in it and showing the card. Now announce that there are fish in the tumbler that just thrive on ink, and you will prove they are there by changing the ink to water so that the onlookers may see them.

Throw a handkerchief over the glass so as to entirely envelop it, repeat an

incantation and then suddenly whisk the handkerchief away. The audience will be very much astonished to find the glass filled with water clear as crystal, with several fishes in it.

The trick is performed in this way: Get a piece of thin black rubber cloth and line the inside of the glass with it: then tie a black thread to the upper edge of the cloth. Attach a little button to the end of the thread overhanging the tumbler, as shown in the drawing. Fill the glass with clear water and introduce several fish-live ones, if

The ink test with the visiting card is accomplished by means of a confederate who is in the audience and who hands you a card which is marked with ink on one side. As you dip the card into the tumbler you contrive to turn it around, and the audience then sees the black side, thinking naturally sees the black side, thinking naturally that it has just been immersed in the ink. The startling change from ink to water is effected by pulling out the Take Hall's Family Pills for constirubber cloth by means of the attached thread and button when the handkerchief is whisked away. Some practice is needed first in order to do this with-out spilling the water in the glass.—

"I'll tell you what I'll do," said the householder. "You go ahead and decorate the house, and then I'll give it to you in payment of your bill."

Why Frogs are Cold.

Many boys have probably wondered why frogs are cold to the touch, and some of them look upon these little creatures with a sort of horror, believing that they have no blood. But such ing that they have no blood. But such is not the case, for they have not only blood, but they possess nerves and can feel. Perhaps if this were more generally known there would not be so many heartless boys who seem to take special delight in torturing frogs and toads. According to scientists, frogs are cold blooded because they consume very little air. It is the same with fishes. Without a plentiful supply of air there is not much animal heat, because combustion is slow. A HELPLESS CHILD.

A weak and puny child is badly handicapped in the battle of life. It is isolated from the healthy enjoyments of its little fellow-beings. It cannot partake either of their play or their sturdy work and progress in the world; its whole life is embittered by incapacity and weakness.

Any woman who expects to become a mother ought to know what Dr. Pierce's Favorite Prescription will do both for her own health and safety during her time of triel and also to insure ber in bequeathing a fair measure of health and strength to the prospective, little one.

The Lost Life.

"A Shipwreck" was the subject given the class, and the children were to write a composition. The teacher was much amused while reading the productions over and correcting them when she came to one that ended thus: "There was but one life lost, and that was found afterward."

Dodd's Dyspepsia Tablets Won't Cure the Spring Fever Victim he Has Something Worse Than a Bad

With the warm days comes that disinclination to eat and that dreamy far away feeling that is commonly known as spring fever.

And the victim of spring fever is a general nuisance. He's dissatisfied with himself, dissatisfied with everyone else and he leaves an air of dissatisfication wherever he goes.

Do you know what's the matter with him? His stomach is out of order!

That stomach has been overworked

That stomach has been overworked and needs a rest.

How do you prove this? Give the spring fever victim a treatment of Dodd's Dyspepsia Tablets. They will cure him. If they don't he is troubled with something worse than a bad stomach. For no bad stomach is so bad that Dodd's Dyspepsia Tablets will not cure it.

A GOOD COMPLEXION.

Is a joy to every woman's heart and man is vain enough not to despise it. Beautiful complexion means pure blood, or in other words a healthy body. Tens of thousands of women take Ferrozone because it's a splendid blood builder, keeps the system in perfect order and helps the complexion wonderfully. "I consider Ferrozone the best remedy to give you a clear, ruddy complexion I know of," writes Miss Ada E. Brandon, of Pembroke. "My skin used to be sallow, but after taking a few hoxes of Ferrozone a fosy tint was noticeable on my cheeks. I can recommend Ferrozone as a tonic also." For good health and beauty use only Ferrozone. Price 50c. at druggists.

A great deal of purple and of laven-der are being used for street wear.

NOVELTIES OF THE SEASON.

The baby hat made of lace ruffles has been so much copied in cheap materials that it will not be worn this summer by really smart women. In its place are semi-French sailor hats of shirred tulle lace and net combined with bands of tiny roses and French sails straw. These come with an accentuated roll, which is greater on one side to allow for a feather, which is fastened under the brim. In some cases this feather passes over the crown and is then run through a slit in the brim, so that the

The Dutch lace cap for night wear is quite the latest fashionable fad, which must not be confounded with the nightcap of our grandparents. It is composed of slik brocade finished round the face with a ruching of ribbon, while the lower part has a frill of old lace, one of its special features being that it gives to the hair the subtlest fragrance imaginable, merely a suggestion of a perfume. ## SCOURGE OF THE AGE IS KIDNEY DISEASE

t Creeps Stealthily Into The System And Develops Into Many Dis-

Bright's Disease, Heart Disease, Dis-betes, Oropsy and Rheumatism, are Among The Forms It Takes. Dodd's Kidney Pills The One Rem-edy That Never Falls To Oure It, No Matter How or Where It Is Found.

Of all the diseases the human body has to combat in its struggle for health, the one that is steadily growing in strength and terror is Kidney Disease. Quietly, stealthily as a serpent, it creeps on its victim itill the fatter is enveloped in its folds, and the greatest physician the world has ever known stand helpless before it. As the last fold goes around the struggling victim and the doctor shakes his head and whispers "Bright's Disease." hope fades to nothing, and the sorrowing friends feel that death has marked their loved one for its own.

The alarming increase ftis terrible disease is making is evidenced by the columns of almost every newspaper. For not among the lowly of the earth aione does it look for its victims. Statesmen, judges, eminent lawyers, and honored divines are numbered among those who in recent months have gone down to their graves with the fell marks of this dread disease upon their bodies. In fact, so prevalent has the disease become that a celebrated New York specialist stated recently that not one person in a hundred was free from some tant of Kidney Disease.

WORKS IN SECRET.

WORKS IN SECRET.

It is the secreey of Kidney Disease that makes it the more dreaded. You can fight an enemy in the open with some chance of success, but if he is lying in wait to take you at he is lying in wait to take you at an unwary moment your chances of nuccessfully fighting him are terribly diminished. So it is with Kidney Disease. Its first warnings are so Laint as to be hardly noticeable, a slight pain in the back that is charged up to over exertion, a slight discoloration of the urine or a burning sensation while urinsting that hardly attracts attention. That is all. But that means that Kidney Disease is at work gradually eating its way into your system. The pain in the back grows more severe, the urinary trouble more complicated, swellings under the eyes and of the limbs denote the coming of Dropsy, sharp shooting pains in the joints and muscles tell that Rheumatism has you in its grasp, or perhaps a day or two's illness leads to the calling of the doctor, and suddenly the terrible truth is forced upon you—Bright's Disease has you in its grasp.

minence by a yearly increase in the length of its death list, the demand of the day, of the hour, in "Show us the way of escape." Nature never put mankind in a critical condition without providing a way of escape—providing mankind were wise enough to take the way provided. In this case the way of escape is a simple vogetable remedy. It has been before the people of Canada for thirteen years, and, like all the great relievers of nature, has been first received and first appreciated by the lowly in life, those known as the common people of Canada.

Is it the common people of Canada who die of Bright's Disease! No, it is the bright and shining marks, those who are stationed above the heads of the massess. Ask the reason of this! Go to the people who are practically exempt from Kidney Disease in its worst form, and ask them. With almost a single voice they will reply: "We cure our Kidney Pills, and they never get a chance to develop into that terrible disease that carries so many prominent men into the grave."

ON WITH HIS WORK. ON WITH HIS WORK.

ON WITH HIS WORK.

And so it is; the man wno does manual labor must heal his slightest aches or they hinder him in his work. When he has backache he cures it with Dodd's Kidney Pills, and goes on with his work; when he feels a twinge of Rheumatism he drives it out of his body with Dodd's Kidney Pills-and goes on with his work. Necessity has taught him that he must cure his Kidneys to get rid of his pains, for he must work to live. He has not been educated to that standpoint where a perscription to cure must be written by a specialist at a cost of dollars to every letter. He may not even know that there never was a disease that took in all classes of the community but what nature provided a cure within the means of all classes of the community. What he does know is more fo the point than all this. He knows that Dodd's Kidney Pills will cure all aches which experience has taught him come from the Kidneys. He takes Dodd's Kidney Pills, and goes on with his work.

Bright's Disease has invariably yielded to a treatment of Dodd's Didney Pills, no matter how firm a hold it had secured on its victim. Possibly the most talked of case of recent date is that of Alice MaudParker, of Shubemacade, Hants Co., N. S. The full story of this case will be found in the current number of Dodd's Magazine, Herewith a short statement from the young ladys mother is appended;

Diabetes is another of the most fearful and fatal forms of Kidney Disease that has been cured by Dodd's Kidney Pills, and by no other medicine. (Among those cured of this terrible ailment is Mr. Charles Gilchrist, for fifteen years Chief of Police of Port Hope and afterwards for twenty-two years Fishery Overseer under the Domasion Government. He makes the following statement:

I was a sufferer for ten years with Disabetes and Kidney Disorder. At times my urine was of a dark bricky color, and I would suffer something awful while passing. Dropsy, another disease caused of diseased Kidneys failing to do their work and remove the surplus water from the blood, is another aliment Dodd's Kidney Pills always cure. Here is an example:

I was a total wreck before I start-to use Dodd's Kidney Pills. In the mornings before I got out of bed I could hardly put my feet to the floor they were so much swollen with thropsy. My arms used to swell at timesso that I could not put on my coat. I had to be tapped to be relieved from my terrible pains. On the advice of a friend I started to use Dodd's Kidney Pills.
