

DUSTORMUD?

**"FOR HEALTH'S SAKE
USE LIFEBOUY SOAP"**

Mud consists of the filth of the drains and streets, and more often than not the mud carried into your house on the children's boots, or yours, brings in disease germs. The dust you see in your house is dried mud and is generally laden with germs which cause sickness.

Take care to keep your floors free from mud and your curtains, window sills, stairways, etc., free from dust and thereby lessen the chances of heavy sickness in your home. Use LIFEBOUY SOAP, and plenty of it on your floors and woodwork. Use it also for your wash.

LIFEBOUY is a disinfectant soap which cleans and disinfects at same time. LIFEBOUY is recommended by doctors and Health Departments and is made and guaranteed by Lever Bros., soap makers by appointment to His Majesty King George V. Your hands will benefit from LIFEBOUY SOAP.

BUY LIFEBOUY SOAP--don't take something else--LIFEBOUY IS BETTER.

The large bars of LIFEBOUY sell for 20 cents each and the octagonal shape cakes for 9 cents.

Backward Chicks.

RELATING GROWTH AND CUR-
HILLS-SIMPLE TONIC THAT
WONDER.

(By a Poultry Expert)

There is a "dolly" fowl? Many a
keeper this summer could
in an answer readily enough,
"being the great worry of
the at the present moment. In
fact, the "dollys" are the Peter
of the poultry world--those birds
which, hatched
normally in the spring and
well enough for the first few
days, have suddenly come to a
standstill, obstinately refusing to
grow. The professional poultry-
man will rarely be troubled with
this, and puts an end to them
in any way. Such a drastic step is
unnecessary for those who
are a dozen or so fowls, how-
ever. These backward chicks, as a
rule, are not actually suffer-
ing from any serious disease. A little
treatment will soon start
growing again. The first step is
to give them a tonic and the best for
this purpose is sodium sulphate. A ¼
teaspoon of the sulphate should be dissolved
in water, and a dessert
spoonful of this should be added to
the drinking water. Give this
treatment at intervals on three occa-
sions, and an immediate improvement
will be noticeable. Meat-meal and fish-
meal are also fine stimulants to
grow. In fact, all the young pullets
should have an allowance, whether
they are backward or not. The usual
allowance of either--not both together--
is one part to every 10 parts of
meal used in the evening mash;
after the Peter Pan-like birds on
this diet is not too much. Green
chickens is a help. Backward fowls
have just as much of it as they
need. Backwardness in actual dis-
ease should not be confused
with equally common present-
ment--slowness in feathering.
Slowness is not at all serious; many
birds have such birds, however, by
the tenth part of the year in the
case of lineless meal. This should
be used for a week or so--that is,
the feathering begins again. It should
be remembered that a young
bird will either make growth nor
it is tormented by in-
sects, and in this connection, I
add that never have I known such
for red mite and chicken lice
the pests are to be killed.

Almost Every Poultry-House
has some and only reliable method of
keeping a few clear of insects is to
spray with insect powder.
Two tablespoons of dry road
which has been mixed half
with water has been mixed half
with water and sprayed every
day. As good an insect powder
as any other. Whatever insecti-
cide is used, however, the really im-

portant thing is to make sure that
it gets to the roots of the feathers,
especially at the base of the neck, un-
der the wings, and round the vent. A
top-dressing, as it were, is of very
little use.
Another parasite that is doing a lot
of harm is that which causes mange.
The symptom is a loss of feathers on
spots of varying sizes on different
parts of the body. Fortunately the
cure is simple. Apply the insect pow-
der referred to above, and then, in
two days' time, rub the bare parts
well with an ointment made by mix-
ing one part flowers of sulphur with
four parts vasoline or lard, or, alter-
natively, one part carbolic acid with
50 parts vasoline. Apply this oint-
ment three times a week till the
cure is better. There is still one
other reason for backwardness in the
growing birds, worms. You cannot
mistake a bird which is so affected,
because she has a wretched appear-
ance, her feathers are ruffled, she
usually mopes about, refusing to take
exercise, while she has a ravenous
appetite. Here again the remedy is
simple. Fast the birds for 12 hours,
and then give each 20 drops of a mix-
ture made of equal parts of turpen-
tine and olive oil. Two hours later
give two teaspoonfuls of castor oil.
Follow in an hour with a light feed
of mash. It is an excellent plan after
you have cured the birds to water the
run with a solution of two parts of
sulphuric acid in a 100 parts of water.
New litter should also be put
down in the houses, and all feeding
and drinking utensils should be
scalded out thoroughly. Worms, re-
member, are highly contagious.

HEMORRHOIDS

Do not suffer another day with
itching, bleeding, or protruding
Piles or Hemorrhoids. No
surgical operation required. Dr. Chase's
Ointment will relieve you at once and
afford lasting benefit. Stop a box at
dealers, or Edmanston, Sales & Co.
Limited, Toronto. Sample box free.

Eric Geddes

BLAMES CONDITIONS IN ENGLAND
FOR DULLNESS OF BRITISH
TRADE.

LONDON, Aug. 14 (A.P.)--"I put
the settlement of the European situa-
tion first and foremost of all meas-

ures which can be taken for the im-
provement of trade and the reduction
of unemployment in this country,"
said Sir Eric Geddes, former Cabinet
Minister and economic authority, ad-
dressing the Bradford Branch of the
Federation of British Industries the
other day.

"The general upward trend of
trade," continued the speaker, "is

checked because of the disturbed con-
dition of Europe, and while I have
fair reason to hope for an upward
trend in the cycle of trade, I can at
present see nothing but blackness
when I look for a resumption of the
upward progression in the general
level of trade shown during the last
century.

"Our unemployment is caused by

the state of Europe. The working-
trading, and banking community of
the country cannot too insistently
bring before the Government the con-
viction that the great problems of
this country would melt as mist be-
fore the sun if a stabilized condition
could be brought about in Europe.

"Not only can Germany not pur-
chase from us, but Italy prefers to
purchase from Germany because Ger-
man cost of production is much low-
er owing to her depreciated currency.
And it does not stop there. India can-
not purchase from us because Ger-
many cannot purchase India's prod-
ucts, and so throughout the world.
As proof that England still lags
behind America in the efficiency of
her factory operatives, Sir Eric said
that while English hands did no
more work than they did some years
ago, in America there has been an
all-around improvement of fifteen
per cent. in the efficiency of factory
workers.

Two Jokers.

Sir Hall Caine, the famous novelist,
is fond of relating the following
amusing story.

A celebrated literary man, dining
at a West End restaurant, found him-
self seated next to a well-known
newspaper paragonist, with whom
he got into conversation.

After complimenting him on his
work, he asked him: "How on
earth do you manage to write twenty
paragraphs every day?"

"With a typewriter," answered the
newspaper man jestingly.

"Is that so?" said the other men-
tally: "I thought perhaps that you
might possibly be using some sort of
a copying machine."

Black and white effects are notice-
ably favored for street and restaurant
wear.

New Chicago Clinic to Study Unruly Children.

Chicago, Aug. 14--A clinic for un-
ruly children, second of its kind in
the world, is to be established at
Rush Medical College here, accord-
ing to Dr. C. G. Grullie, head of the
children's department of the school.

"There is too much mother in the
modern family," declared Dr. Grullie.

"That is the reason unruly children
in American homes are more nume-
rous than ever before. In former days
families were large. Nowadays when
we have one or two children in a
family the youngsters get too much
attention. They become self-centered
and consequently unruly. Pity the
only child! He is the product of
modern civilization, and he is a social
and medical problem."

The new clinic at Rush will special-
ize in neurotic children between the
ages of three and 14.

Nurses and physicians of the new
dispensary will investigate home con-
ditions first. In a majority of cases,

they say, the trouble is not with the
child but with the home. Nine times
out of ten he has developed an ex-
aggerated ego. He has been petted
too much.

"If you get a child's environment,
you change his whole life," said Dr.
Grullie. "Small families are bad for
children. If they spend a short time
in the company of other children,
they get their minds off themselves
and are cured completely."

"The cause of undernourishment
usually is this same exaggerated ego.
When a child stops eating or eats
sparingly, he soon learns the whole
family is upset. He enjoys being the
center of interest."

"The behavioristic clinic has as its
object the correction of obstinacy,
sulkiness and other faults. Likely as
not the child is bored. We try to
give him something to think about.
We get him interested in something.
We do not scold, but if we promise
punishment, we do not weaken. A
child soon learns when his parents'
threats are not to be feared."

The only other clinic in the world
specializing in the behavioristic
problems of children is in Boston.

One Hope of Peace.

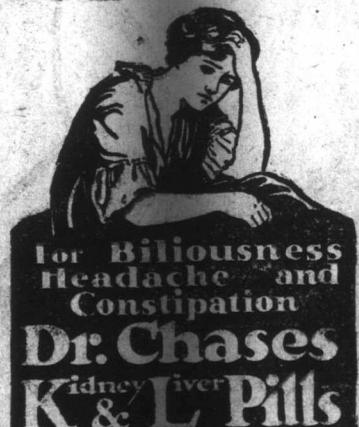

Under-Secretary in the Anglo-French
Alliance.

Mr. Ronald McNeill, Under-Secre-
tary for Foreign Affairs, speaking at
Hervé Bay, asked his audience not
to forget the recent assertion of Lord
Curzon the Foreign Secretary, that
"the one stable element in a world
of flux is the alliance between Eng-
land and France, and that without it
there is no hope for the peace of the
world."
