# Desperate Remedies

By Thomas Hardy. OF "A PAIR OF BLUE EYES," "THE TRUMPET-MAJOR," ETC.

Perhaps, though Hocbride watched and whispered, its animus would have been little more than a trifle to persons in thriving circumstances. But unfortunately, poverty whilst it is new, and before the skin has had timetothicken, makes people susceptible inversely to their opportunities for shielding themselves. In Owen was found, in place of his father's impressibility, a larger share of his father's impressibility, a larger share of his father's impressibility, a larger share of his father's pride, and a squareness of idea which, if coupled with a little more blindness, would have amounted to positive prejudice. To him humanity, so far as he thought of it at all, was rather divided into distinct classes than blended from extreme to extreme. Hence by a sequence of ideas which might be traced if it were worth while, he either detested or respected opinion, and instinctively sought to escape a cold shade that mere sensitiveness would have endured. He could have submitted to separation, sickness, exile, drudgery, hunger and thirst, with stoical indifference, after living on for nine months in attempts to make an income as his father's successor in the profession—attempts were utterly fruitless by reason of his inexperience—Graye came to a simple and sweeping resolution. They would privately leave that part of England, drop from the sight of acquaintances, gossips, harsh critics, and bitter creditors of whose misfortune he was not the cause, and escape the position which galled him by the only road their great poverty had left open to them—that of obtaining some employment in a distant place by following his profession as a humble under-clerk.

He thought over his capabilities with the Perhaps, though Hocbride watched and

opportunity for learning a few more details of the profession.

"It is a beginning, and, above all, an abiding place, away from the shadow of the cloud that hange over us—I will go," said Owen.

Mary Magdalene.

In the new number of the Expository Times, Professor Bruce has a pithy note on the subject of Mary Magdalene. He declares that there is no ground for identifying with her the woman that was a sinner of Luke, vii., 37. The fathers of the Western Church — Ambrose, Jerome, Augustine—who first, hesitatingly, favored the identification, knew nothing more than we know; and that is nothing. The universal currency during the Middle Ages of the opinion that the two women were one and the same person, was due to the authority of Gregory the Great; and the adoption of this view by the translators of the Authorized Version, as shown in the heading of Luke, vii., "Mary Magdalene Anointeth Christ's Feet," only exemplifies, according to Dr. Bruce, the tenacity with which opinion holds its place in the human mind after it has been fairly rooted. He aids that the chief source of the long prevalent idea is the same as that which has given rise to many other legends, the desire to know as much as possible concerning persons whose names are surrounded with a halo of religious interest. Mary Magdalene.
