London, Dec. 17.—The news of the German raiders' arrival was promptly sent to the military authorities of all coastal towns and villages, and immediately taken everywhere, so as to be prepared in case a raid developed at other points.

For instance, the mayor of Tynemouth, on the North Sea, eight miles east-northeast of Newcastle, immediately ordered the police to stand by, and issued the following proclamation to the emergency committee:

"There is a rumor that a battle is progressing in the North Sea, and there is a possibility of a boat attack on Tynemouth. The civil population is advised to remain indoors, but if the possibility of a boat attack is not confirmed, the civil population is advised to proceed in the direction of Newcastle."

"There is no reason for undue alarm, and we strongly advise the population not to leave town, as notices will be promptly given if we consider this necessary."

No Panic Spreads.

There is much speculation in London as to how far the German raid has succeeded in creating a feeling of uneasiness or panic in coastal towns.

One of the London newspapers telegraphed to the mayors of all coastal towns, advising them to remain calm, and to advise the civil population to remain indoors, but if the possibility of a boat attack is not confirmed, the civil population is advised to proceed in the direction of Newcastle.

"There is no reason for undue alarm, and we strongly advise the population not to leave town, as notices will be promptly given if we consider this necessary."

inhabitants likened the bombardment to a terrific thunderstorm, it appearing as though the Germans intended not to leave a house standing. The people were herded out of the lower part of the city, the poor quarter, by soldiers, as this section was a prominent target. Notices were published by the police, asking residents to report all unexploded shells which were found, and several were brought to police headquarters.
