Speaking of Mad. Nilsson at Cincinna previous to her matinee the Enquirer o Thursday last says: "In the afternoon, with the other members of her troupe, she attended rehearsal with the orchestra at Music hall. The orchestra numbered sixty musicians, and was conducted by Michael Brand. Mad. Nilsson almost conducted the rehearsal herself, detecting every error and orchestra. She spent the evening in he private parlor quietly, resting after her fa tiguing journey. She was called upon by a number of friends, receiving all who came with that ease and grace of manner and cordiality for which she is noted. To an Enquirer reporter Mad. Nilsson expressed phenomenal sale of sects for her two compliment Cincinnati had paid he as one of the great-st of her life. Although diseases of the respiratory organs, and amongst them bronchitis especially, have maintained an important position, yet several show a marked decrease. This is especially the case with pneumonia, which in degree of prevalence has fallen from 3 7 to 2.8 per cent. Influenza has on the other hand perceptibly increased. Neuralgia z is found to fully maintain its position of and to fully maintain its position last week, while the area of prevalence, an to some extent the degree of prevanlence of rheumatism have also increased. the Niagara, southern peninsular, and the southwestern peninsula districts, but has a second time within a month appeared in the southern pennsula district, while its per centage degree of prevalence has markedly increased since last week. The close relations which this disease has with a number of other diseases makes this increase e matter of very serious importance, and calls for energetic steps being taken towards its decrease. Amongst zymotic diseases there is no point of specially new interest equiring remark. Diphtheria, like meumonia, has perceptibly fallen in degree of prevalence since last week, as have like-wise measles, mumps and scarlatina. The decline in prevalence of all zymotic disease would seem to be much too general to de end on accident, and hence would appear to be partially, at least, accounted for by the very different character of the weather of the week, it being on the whole steady, noderate and with much sunshine, whi the previous week was most changeable with much humidity and cloudiness.
