For General Information.

The following information is offered in general reply to questions arising in the minds of those (fter-ing upon a course of treatment by the great Radam remedy,

The following information is offered in general reply to questions arising in the minds of those (fer-ing upon a course of treatment by the great Radam remedy. FIRST-Microbe Khier is not a drug. It does not cure the polsons of disease by counter-polsons of mineral or plant. It is an element and an energy of purification. It cures disease by direct physical dis-infection from the living seed principle and germ of disease. It allays the microbic feament and heals microbic inflammation, slokness and distress, by killing the microbe. SECOND-Microbe Killer does not cure chronic liness by sudden and violent change, by any instan-taneous process. Its first work is that of radical rnd absolute blood-cleansing, the clearing away of the cause of the liness. But to put out a fire does not restore the fallen walls or the burnt scaffolding and timber. To stop the losses of vitality and the decay of fibre and tissue that goes on undar disease is one thing. That is the preliminary and preparatory work of the healing water. But to repair all those losses, to replace the diseased tissue with healthy and undiseased tissue, to give back to the lungs, the liver, the brain, the kidneys, the life principle and life particles they have been deprived of, and to reclothe the limbs with the flesh that has fallen from them under the ravages of the microbes, is another thing. That is the second function, the closing work of the remedy. And that is a process that requires time, because it is a process of growth. It is growth substituted for putrefaction and decay. And as the sub-requires time to repair the injuries and the losses that the lightning or the parasite may have inflicted upon the beautiful tree, so Microbe Killer must continue to keep the body and the organs and the blood of man in a disinfected condition till nature has time to repair all, the injuries and restore, do not begin Microbe Killer for any deep-seated, chronic aliment unless you have an intelligent appreciation of the priceless value of a final cure and the pati
