This is, as you are aware, the latest and inventors. The kinetoscope is to the eye purchasing a bull and heifer calf of the what Edison's phonograph is to the ear, in that it reproduces living movements of the most complex and rapid character. To clearly understand the effect it is necessary

I will give a few notes on their origin, and to explain the cause, but to appreciate the result the working of the invention must be witnessed. The moving and apparently the Province of Quebec. He says, "Being witnessed. The moving and apparency living figures in the kinetoscope are produced in the following manner: Mr. Edison has a stage, upon which the performances he reproduces are enacted. These performances are recorded by taking a series of 43 myself partial to that breed, I will simply photographs in rapid succession, the time quote what English authorities in dairy occupied in taking them being one second matters say of our cow."

ances are resorded by taking a series of 3 photographs in rapid succession, the time occupied in taking them being one second only. Thus every progressive phrase of every single action is secured, and the photographs are successively reproduced on a film of celluloid of the length required for recording a given scene. When this film is passed before the eve at the same rate of speed as that at which the photographs were taken the photographically disjointed parts of a given action are united in one complete whole. Thus, supposing a person to be photographed taking off the coat the successive views representing the phase of action of every forty-third part of a second are injoined up, and the complete operation of aking off the coat is presented to the eyes it would appear in reality. In other words, the kinetoscope is a perfect reproduction takes place is a cabinet about 4ff. high, 2ff. wide and 1ft., 9in. deep. It contains the celluloid film band, the apparatus for reconded on it passes under his view. The chief detail of the mechanism is a flat metal ring baving a slot in it, which make about 2,000 revolutions per minute. The film passes rapidly over the ring, beneath which is a light. The spectator look through a lens on the film, and every action recorded on it passes under his view. This wonder of the age is on exhibition at 169 Tremons street, Boston. Here 15 machines are shown, in which the mest rapid and complex actions are faithfully reproduced.

When to Avoid Candy.

Sugar is one of the heat of the fat-producing foods, writes Dr. Cyrus Edson in the October Leadies Home Journal, in an article on "The Candy exting Habit," and for that reason it is bad for a person, young or old, who are too thin. It is also valuable, how a suffer from a lack of animal heat, and who need building up. Not to much of it though, because there are elements needed in the body which ways will not supply. Sugar is exceedingly astisfying to the apportunity to fill his haversack and both saddle bags with brown sugar. The men of h days before they were able to get a supply of rations, and during that time they lived on the sugar and were perfectly contented with the diet. This story points to one rule which may safely be laid down for all: Gandy should not be eaten immediately be fore meals by either child or adult, because it will destroy the appetite for other food, and that other should be taken first, because of the tood element found in it and which is not found in candy. In other words, the supply of sugar should be adjusted to that of other foods in a natural and common. senseway and proportion

-A despatch to the Montreal Star ar anounces that plans have been prepared at the Public Works Department for a dairy building which is to be erected adjacent to Rideau Hall. Lady Aberdeen is evidently desirous of possessing a model dairy, so that her children and servants may be instructed in the latest methods of butter-making, etc. The building will only be a small one, but it will be fitted up with all the latest appliances. Her excellency is not to enter into competition with the dairy owners of Canada, nor need her purpose be regarded as a fad. Her ladyship is eminently practical, her purpose is obviously to give a fashionable stimulus to dairying as a respectable and highly important calling. By setting will accomplish much, for the example will be followed. It was by methods not alto gether similar, but exercised on the same principle, that she stimulated Irish industries. The good his Excellency is achieving by the interest manifested in husbandry, and his consort by her powerful patronage and example in social and industrial affairs is beginning to be materially felt in the country. Well may the Rideau Hall dairy

RELIEF IN SIX HOURS.—Distressing Kidney and Bladder Diseases relieved in six hours by the "Great South American Kidney Cure." This new remedy is a great surprise and delight on account of its exceeding promptness in relieving pain in the bladder, kidneys, back and every part of the urinary passages in male or female. It relieves retention of water and pain in passing it almost immediately. If you want quick relief and ours this to your remedy. Sold by deBlois & Primrose.

Here's a Youthful Prodigy.

A wonderful child, who, at the age of two years, can read with fluency any writing or printing in German or Latin characters, cing correctly the most difficult words, is described in the columns of the Magdeburg Zeitung. The boy learned to When about a year and a half old, while walking out with his grandmother, he showed the liveliest interest in all the he showed the invenest interests and was especially signs, bills and placards, and was especially delighted with the display in booksellers' it begins to fail. If proper attention was paid shops. At home he played with books and newspapers, and one day, finding his own now as they did years ago. They should be name, "Otto," in print, he ran to show it with delight to his parents. The boy is under cultivation, if the crops taken off did mentally and physically perfectly healthy not more than pay for the labor put on them and normal. He has fair hair and very lively, intelligent brown eyes. Three in those sections where wood is used as fuel, well-known and highly respected physicians" have decided that the boy possesses an immense wealth of pictures of memory, but can give no physiological explanation.

His name is Otto Poblert, and he is the son up the supply of plant food. To make the

T. R. Lyons, Waterville Horses' Hoofs Cracking.

A state of brittleness is one of the results of the horse's hoofs being too hard and dry, in which state the horny fibres lose their elasticity and their power of resistance. If the horse wears shoes they should be care fully removed and re-set or renewed once a month, or at least within six weeks, and sole and rim be pared down to a proper shape The paring of the hoof should be watched for most horse-shoers slight the paring when the hoof is too hard. A horse with brittle hoofs should not wear heavy shoes with big nails, but rather comparatively light shoes, without caulking. To restore such hoof to a healthy state, it is essential to keep the horn constantly in a proper state of pliability, which may be attained by daily washing and anointing. It will require several months of careful daily attention to the hoof before anything like a normal condition can be brought about. The smith should never be allowed to rasp the hoof above the nailnittings. The washing and anointing may be done twice daily or only in the evening be applied before the water has become en tirely dry on the hoof. Use no axle grease similar stuff. Procure an oin made of, say, one part of cotton-seed oil and five parts of lanolin. Keep this in cool place. - Cal. Cultivator.

Manuring Orchards. We often hear complaints that orchard do not bear as they used to, and we do not wonder at it. In early days the orchards accumulated fertility of centuries, and the late years the orchard is usually set out in some plot that has been under cultivation for years, and usually the land is put in som crop each year until the trees come int bearing, in order to cultivate them, and this exhausts the land more or less. After the trees come into bearing no more atten tion is paid to the orchard, as a rule a to this matter orchards would bear as well all the ashes should be put on the orchard as they are the cheapest source of potash to the average farmer. Stable manure is good most profit out of an orchard it should be as well cared for as any other part of the farm."

-A Canadian customer of a Chicago gra ommission house has this to say about feeding wheat: "I have been feeding wheat to my horses to the exclusion of oats, it is so cheap. It is a great success. I feed a quart of wheat three times a day along with hay, I believe a quart of wheat is as good as four quarts of oats." If any of our readers have experimented with wheat the MONITOR would tion of economic rations is a great one calls for investigation and at the presen should be made.

A writer in the New York Recorder says A writer in the New York Recorder says that most window gardens are filled with a miscellaneous collection of so-called flowering plants, whose few poor, scattering blossoms scarcely pay for their care, and might with plants, whose few poor, scattering blossoms scarcely, pay for their care, and might with profit give place to those without beauty of flower, but whose foliage is at least attractive. Indeed, so often is this the case that many householders are banishing all flowering plants, depending solely upon palms, aspidestras, etc., for their window adornment. But if one prefers flowers to foliage and most people do—this is all wrong. A and most people do-this is all wrong. A few fine foliage plants are, indeed, attractive, but they do not take the place of fragrant "Uncle Alvah, blossoms, that never seem half as lovely as when all outside nature is hidden beneath for them if the world isn't round?" window to be flowerless, even with the poor facilities of the common living room if the | idee as to 'em."

following rules are adhered to: 1. Select only such plants as are 2. Choose only those that will thrive in the temperature at which you keep your room Select carefully to suit the amount of sun shine or shade in your window. 3. Examine every plant to make sure that

it is entirely free from insects before bring-ing to the window in the autumn. 4. Shower the leaves of your plants of week to keep down dust and insects. If insects appear, fight them at once and never give up till they are routed. 5. Keep flowering plants in small or medum sized pots. See that the soil is rich, the

6. Water only when dry, then give sufficient water to wet the bottom of the pot. Be chary of water in severely cold weather. 7. Turn the pots frequently, pinch off withered flowers and faded leaves. Allow

There are some things to which time is the only guide, and in so omentous a step as the choice of the companion of a lifetime, "the unreasoning madness of love" can, in extreme youth, rarely be trusted. A young girl has so many illusions, so little knowledge of human nature, so slight an acquaintance with her own heart

as to make the risk always a serious one. Valuable Hints. To relieve calloused feet, rub them frequently with kerosene.

Silver clasps replace the button and straps To soften leather hardened by repeated wettings, rub it well with kerosene. To renew woodwork and furniture, varnish with black varnish, plentifully diluted with kerosene. For bleeding at the nose Dr. Hutchinson

recommends plunging the feet and hands in

eye trouble. A home remedy, however, that has proved efficient after the test of many trials is the following. It is especially useful in inflammatory disorders of the eye and the complaint known as weeping eyes:
Make a strong decoction of camomile, boiled in sweet cow's milk; with this bathe the eyes several times a day as warm as can be borne. If persevered in for a few weeks, a complete

cure will be effected. -For people whose eyes are beginning to show signs of work, pink or red lamp shades are very bad for use, although very pretty as ornaments. A few days ago I found that the same objection holds good with blotting paper. Pink is pretty, but white is such a rest for the eyes that it had | Egremund and Purnell, license and pardon better be used.

Catarrh relieved in 10 to 60 minutes.— One short puff of the breath through the Blow er, supplied with each bottle of Dana's Catarr-hal Powder, diffuses this Powder over the sur-face of the nasal passages. Painless and de-lightful to use, it relieves instantly, and per-manently cures Catarrh, Hay Fever, Colds Headache, Sore Throat, Tonsilitis and Deafness.

-There is one custom com among many people, which is to the last degree reprehensible, that is, giving candy to babies in arms. Babies do not need candy; it does hem the greatest harm.

-To prevent lamp chimneys from crack dually heat it till it boils and then let it as gradually cool.

Joker's Carner.

His Novel Theory of Tides. Uncle Alvah Dunning, the hermit of Adirondacks, maintains that the earth is

The old man remained silent for a while and then drawled forth, "Waal, I hev some "What is it, then?" asked the questioner,

while all the sportsmen drew near to await the answer. Uncle Alvah was not to be hurried and after another pause he remarked:
"Did ye ever turn over in bed? 1 think's more than likely."
"Yes, I've turned over in bed."

"Do ye sleep 'tween sheets?" "Always," replied the questioner, laugh ingly. "What's that got to do with it?" "It's got all to do with it in my opinion." Then you went over, didn't the bedclothes When you went over, didn't the bed

kind o' slip round an' slosh round an' didn't get there same time as you did?' "Waal, that's my idee of the tides. The drainage an inch deep at bottom of pot, and a crust of hard earth is never allowed to form ter like a man under the bed-clothes, or it teeters a bid, like when you tip a milkpan. The water don't get there quite as fast as the land, and that's what makes the tides."

In my parish (writes a friend to Harper's all Holland bulbs to root six or seven weeks in the dark before bringing to the window. Prawer), some time since, I had a vestryman, in the dark before bringing to the window. devotion to the interests of his constituency.

One day I went into the large store of my

"Fifty cents the first hour, and twentyfive cents the second," was the reply. "Fifty cents fer the first hour, and twe foive fer the second hour, is it?" Pat said, quickly. "Then, me man, give me wan fer he second hour!" An Important Scientific Discovery Nerviline, the latest discovered pain remedy, may safely challenge the world for a substitute that will as speedily and promptly check inflammatory action. The highly penetrating properties of Nerviline make it never failing in all cases of rheumatism, payradia, cramps, pains in the back and

A Peculiar Patent. Queen Mary's gratitude took a very odd form in the case of the Earl of Sussex. He was a valetudinarian who had a great fear of uncovering his head, and considering the colds he had and dreaded respected no person. He petitioned Queen Mary for leave to wear his nightcap in her royal presence. Her majesty the Queen in her abundant grace, not only gave him leave to wear one

but two nightcaps, if he pleased. His patent for this privilege is perhaps unique in royal annals: "Know ye that we do give our beloved and trusty cousin and counsellor, Henry, earl of Sussex, Viscount Fitzwalter and lord of to wear his cap or nightcap, or any two of them, at his pleasure, as well in our presence as in the presence of any other person or persons within this realm or any other place in our dominions whosoever, during his life, rant in his behalf."

It is the duty of everyone, whether at home or travelling for pleasare or business, to equip himself with the remedy which will keep up strength and prevent illness, and cure such ills as are liable to come upon all in every day life. Hood's Sartepartlla keeps the blood pure and less liable to absorb the germs of disease.

Mr. Hopperly-What? You Madgie? You leek older than that. Madgie-I know it. But I can't te

To relieve chilblains, soak the feet in hot water and rub them with kerosene, or with kerosene and lime water.

For ear-ache mix a very few drops of sweet oil with a like quantity of chloroform and wear a piece of cotton moistened with it in the ear.

—It is wise to consult an occulist in any eye trouble. A home remedy, however, that
