

a pressure varying from 80 feet to 31 feet, according to altitude in the building, is provided for all the floors and the roof. Both hot and cold water is supplied to the bath-rooms and lavatories.

Lighting.

The Building is lighted throughout with Edison's Incandescent Electric Lights. These are introduced into all the rooms, halls, lavatories, passages and closets.

The School Hospital.

This is a small building placed on the highest part of the property, and with one exception it is situated on higher ground than any other building in Windsor. Being 100 feet above the sea level, it is thirty feet higher than the basement of either of the School buildings, from which it is removed about 120 feet. It will be used in case of the sudden outbreak of infectious or contagious diseases.

Physical Training.--The Recreation Grounds.

These lie to the west of the School buildings, and consist of two level portions, an upper and lower plateau, separated by terraces about 10 feet high in the aggregate, and a gravelled road 12 feet broad. The upper plateau is 250 feet long by 100 feet broad, and is divided into a Bowling Green, Lawn Tennis Court and a Croquet Ground. On the north side is a picket fence, supporting grape vines, to the north of which again is the School road to the Paddock hereafter described. The lower plateau is 250 feet long by 63 feet broad. It is designed for Lawn Tennis and Croquet. West of the Recreation Grounds is the School Paddock, of about 4 acres in area. It is well supplied with water, and affords very convenient pasturage. The grounds south and east of the buildings are chiefly in grass plots with terraced walks on the south and east sides, extending for five hundred and eighty feet. Beyond and bounding these on the east and south is a close spruce fence from 10 to 12 feet in height. The stables, cow houses and hen yard are to the north of the upper plateau and back road. They are situated about 200 feet from the School buildings.

The view from the Recreation Grounds is very extensive and varied. Being sheltered from northerly winds, as well as from observation, by a high spruce hedge with board fence in rear, which crowns another terrace north of the back road, the Recreation Grounds possess features of rare excellence and advantage for Physical Training and Education.
