

Solution of Run-Down Soil Problems in a Nut Shell

To prevent your farm from running down, you must save every ounce of the manure produced by the stock, and distribute this manure on the soil while fresh, with a Corn King, or Cloverleaf spreader.

That is the solution of run-down soil problems in a nutshell, and if carried out will effect a cure in the worst case of soil depletion.

The Corn King spreader is of the return apron type, and the Cloverleaf of the endless apron type. Each style is made in a number of sizes, among which will be found a machine exactly suited to your requirements.

Each style of these spreaders is described and illustrated in separate catalogs. The catalogs, in addition to illustrations and descriptions of the machines, contain a lot of valuable information on soil fertility.

You will naturally want a spreader that you can depend upon—one that will not kill your horses, yourself, or your help. An inspection of one of these spreaders will convince you that it is the machine to buy.

The International local agent will explain every one of the excellent features of the machine he handles. Write for catalog.
