# HEW YORK EXCHANGE.

AMERICANS FRACTIONALLY LOW-ER IN FOREIGN MARKETS-LEA-THER AND SUGAR ADVANCE THOUGH THERE IS MUCH LIQUI-DATION-BANK STATEMENT.

New York, August 12.

The foreign market is dull and fraction-

ally lower.

Prices for Americans show declines as compared with hist night's New York closings, of from 1-8 to 3-8, but there is no pressure to sell, and on the other hand, offerings of the more preminent shares are

very limited.

Money in London is slightly firm on call, but discount rates remain unchanged.

The set-back which the market experionced yesterday was most prominent in these stocks which have been for the week past the leaders in the advance, and included among those which suffered yesterday, were also some of the Standard stocker. The advance in leather was accompanied by enormous liquidation by commission houses, some of the stock doubtless having

been carried for months.

In Sugar there was also thought to have been free selling by insiders who parted with all the stock the market would take without unduly depressing the price.

The Government crop report was favorable but was taken advantage of to sell stocks.

The unsettled condition of the money market and the fears of a bad Bank Statement were userihed as the reasons for selling the market.

For some time in many weeks the ro-ports of the Commercial Agencies are rather negatively good. Dann says, that business hesitates, and that it is surprising the hesitation is so slight. On the whole the report is satisfactory.

#### ONTARIO MINES.

Mr. Bannol Sawyer says:

I visited the most promising properties in the Manitou and Soine River districts, Ontario. In the Maniton, last week, there were three remarkable strikes made which will likely have an important effect on the future of this hitherto neglected but apparently promising district. The strikes were made in the Glass, the Cracker Jack and the Swede Boys. The kest named property known technically as H.P. 25% & 259 is owned by the Atlin Mining Co., a Montreal organization. The strike is important as it establishes the big values previously obtained from this property.

Went down through the Maniton in

canous to the Seino River where the Decca was thoroughly inspected and found to be still yielding good values. The compressor plant is now working smoothly but little progress has been made during the month, owing to the difficulty of getting satisfac-tory work from it.

The Manhattan has been closed down, but it is said to contain good values. Their lead crosses the Decoa and has a large amount of ore in it.

Spent-some time with a gentleman connected with the work in the Golden Star mine and the whole situation in that property is simply this, that the upper three levels were worked out white paying dividends and the development work discontinued so as to keep down expenses. Development work is now going on, the vein showing up as well as ever and containing as good values. The market price of the stock will likely be dependent largely on the manner in which the business is carried

A very hopeful spirit prevails among the mines and there are about 25 to 30 visitors brought into the district daily.
