

## THE BEST SPIRIT LAMP

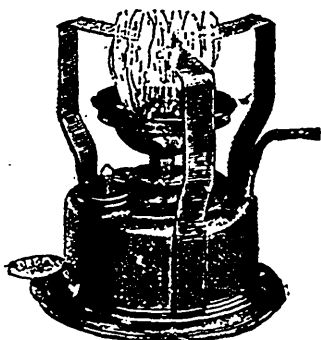

Fig. 1.—Lamp with full flame

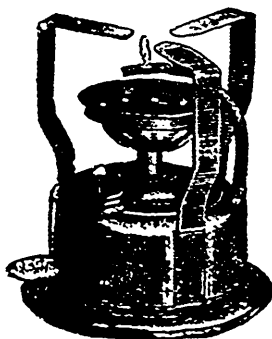

Fig. 3.  
Lamp with small burner lit

Our illustrations show an entirely new departure in Spirit Lamps.

This new invention vaporises the spirit before burning it, saving at least one half of the spirit and giving a larger and hotter flame than any other. It will boil children's food, etc., quicker than any other lamp and with less spirit (see figure 1.) Moreover by a patent attachment a small burner is provided which while burning hardly any spirit gives enough heat to gently warm the contents of a saucepan (figure 2).

The lamp is in polished brass, with handle, and is as ornamental as it is useful.

To advertise *Woman's Realm*, a monthly magazine for the Home, full of useful hints on housekeeping matters, dress, decoration, cooking, etc, we will deliver the lamp, all charges prepaid, and your money back if dissatisfied, together with *Woman's Realm* for one year, for 90 cents.
