**RADIGAN'S PATENT
 METALLIC LATH.**

THE object of this invention is to form circular corners on stud partitions, both outside and inside, when required, or only on the outside. This has hitherto been done by making the grounds with coopers' laths, which, owing to shrinkage, caused the plaster to crack—but curves of any required radius may be made with these Metallic Laths, and which will form a strong and firm ground in line with the wooden lathing for plastering on, and as shown in cut A, the laths are keyed top and bottom, thus forming a double key.

The attention of Architects and Plasterers is called to this invention.

Give them a trial and be convinced. Send for Circulars and Price List.

JOHN RADIGAN,
 68 Mary Street, HAMILTON, ONT.

QUEEN CITY GALVANIZING WORKS

MANUFACTURERS OF
**WALTERS' PATENT
 METALLIC SHINGLES**

89 TO 75 SHERBOURNE STREET, TORONTO, ONT.

FOOT-POWER MACHINERY.

Machines for ripping, cross-cutting, scroll-sawing, mortising and planing, forming coves, grooving, gilding, rabbeting, cutting, chiseling, and boring. Builders use our famous circular rip saw for the greater portion of their ripping in preference to cutting their lumber to a mill five minutes' drive from their shops. The same is true in regard to scroll-sawing, mortising, tenoning, cutting stuff for drawers, boxes, etc. Builders using these machines can bid lower and save more money from their contractors than by any other means.

Read the following letters from Builders:
 CLARENCE F. LEE, carpenter and builder, Morrisown, N. J., says: "I have had one of your Hand Circular Rip-Saws for about three months, and am much pleased with it. I have done the ripping for 20 houses in that time, with a very heavy load through the boards. I have ripped as high as 3 1/2 inch plank. They are also good for rabbeting, having rabbeted all sash and saved all drift for 200 windows."
 ALAN, Builder, Lima, Ohio, says: "A few days since we had some 20 small drawers to make for a drug store; the steam power mill went to cents each for making them. With my foot power machinery I made them, and saved above good wages on the job. If I could, these machines will be sold. C. F. LEE."
 The purchaser can have ample time to test them in his own shop and on the work he wishes them to do. Descriptive Catalogues and Price List Free. Apply to
