

# Have Us Build the Roof

ON your next large contract, turn the roof over to us. To make a thoroughly waterproof and satisfactory roof is highly specialized work which our equipment and experience enables us to perform successfully in every case. We guarantee our work. Your responsibility ends when we assume the contract, and the many notable Canadian buildings for which we have constructed roofs is a guarantee of our ability to carry out the most important contracts.

Architects and Engineers should stipulate that the roofing contracts for their new buildings be entrusted to roofing experts. It is the only sure way to obtain satisfactory work in this important feature of a building.

*Waterproofing and Roofing Materials of all kinds supplied. Send for Prices.*

DISTRIBUTORS FOR

## HERCULES

**Waterproofing and Strengthening Compound**

This reliable waterproofing comes in three forms—powder, paste and liquid, suitable for all classes of concrete work where absolutely permanent waterproofing is required. We have used it ourselves on many difficult waterproofing propositions and found that it not only effectually excludes moisture, but that it also increases the tensile and compression strength of the concrete, prevents hair cracks and effects a great economy in the use of cement.

The roof is the most frequent source of trouble to the contractor. Leaks resulting from faulty construction or unwise selection of materials, mean expensive repairs that eat up profits. Contracts undertaken by us are executed strictly in accordance with the architects' and engineers' plans and we assume full responsibility for the thoroughness of our work.

*Let us Tender on your Roofing and Waterproofing Specifications.*
