

3. Defence - The Defence Sector continues to receive the lion's share of the annual Thai budget. Procurement windows exist for de Havilland Aircraft, Canadair CL215, Airborne Surveillance Radar Systems, M-41 Tank Retro-fits, Pratt and Whitney engines, radio equipment (especially for the police), and further simulator sales for helicopters.

4. Power Equipment and Services - Thailand will double the existing 6,000 megawatts of installed electricity generating capacity by the end of the century.

5. Petrochemicals - The Eastern Seaboard Project is forging ahead in the development of the National Petrochemical Complex. Many opportunities for Canadian suppliers exist there, plus pipeline opportunities throughout Thailand.
