

Bibliography on Arms Control Verification: Update. That Update contained over 800 new entries covering approximately the same period as the 1991 Bibliography, with special emphasis on the literature between the summers of 1991 and 1992. Also included was French language material. In 1993, the Second Update was provided covering more than 400 new entries. A Third Update was published in 1994, and contained over 300 new entries.

The following report, entitled Bibliography on Arms Control Verification: Fourth Update continues to build upon the four previous bibliographies provided in 1991, 1992, 1993 and 1994. It has been prepared as a further Canadian contribution to the development of a United Nations data bank on verification and to assist governmental experts, negotiators and researchers in their work on verification matters.

The Canadian Government wishes to acknowledge the work in the preparation of this Fourth Update performed under contract by Mr. René Unger, through the Verification Research Program of the Department of Foreign Affairs and International Trade.
