Atlantic City. N.J., July 31.—As a result of the collision last evening between the Reading Railway and the Philadelphia and the Bridgeton excursion train, 47 people are dead and 44 are lying in the hospital here more or less seriously hurt. Of the injured in the hospital several are expected to die. Besides those seriously enough hurt to be in the hospital, a score or more of people were brilised and shelp. more of people were bruised and shak-en up. Of the dead, 42 have been identified, and the bodies of three women one man and a boy are awaiting claimants.

The responsibility for the accident is hard to place at this time but the burden of it seems to rest upon the dead engineer of the Reading train, Edward Farr, though an official investigation may clear his name. It was reported last night that when drs. Farr heard of her husband's death she fell dead. This was not true. She fell in a swoon, and to-night is lying in a serious condition from the shock.
