**WOMAN'S WORLD**  
BY KATHERINE LESLIE

I wonder why the word “red” when applied to hair, should be so elastic, why it should be permitted to cover so many varieties of hair, when in color, silk and all manufactured stuffs, or in things that grow, it is limited to certain shades of one color. I have just been reading a list of the world's famous personages from Caesar and Alexander down to Paderewski and the prodigious Pittsburg, among the men, and from Helen of Troy and “burning Sappho” down to Sarah Bernhardt among women, and all these are said to have been or to be red-headed. Of course we have to take the word of history and tradition for the dead and gone heroes and beauties, but the color of the living celebrities is something that is open to debate, because we have seen some of these with our own eyes, and unless we are color blind we have to deny the “red” hair to a number of these well-known personages. Take Paderewski for example: most of us have seen him at his recitals, but where is his red hair? It is a pure flame color, and when was flame color ever red? Even in the open hair color, more flame color than in the concert hall. A lot of us who have seen him in the hair of the same time as the great musician, took the keen interest in that wonderful hair of his, and the way it daily flung in the strong sea breeze under a little cloud of wax. Red it certainly is not, but it is beautiful. Rather it is curly and wild, with a color that is not red, but attracts the eye and holds it spellbound—a dead hair that once seen is not soon forgotten, but recurs like a ghost to the vision at the most unexpected times. Idealized by Burnedones, and beautified through the enchanting medium of black and white, it is a head to delight in every way, to keep before one's eyes, to gaze at with joy. But in life that bushy hair of flame, in conjunction with the pale yellow skin, who can say it is not red?

Then, to take the one step to the right, consider the being called Pittsburg, whose hair, when he was a young man, was said to be red. The same variety of color, all of them called red, is met with in ordinary everyday creatures, “no forerunner of fame unknown,” but, on examination, these may be classed as orange, flame color, or, rarely, sandy, golden, or yellow, golden and light brown, but the real red, the Irish or Scotch red, is not a frequent matter, and much rarer in this country than that of the shades mentioned. When one does come upon it, it is a remarkable sight, and it is a shame that the other shades mentioned are as “moonlight unto sunlight or water unto wine” in comparison. The term “red” is much more correct than “red,” it conveys a deal more meaning than “red”—for one gets the idea of the many warm tints and shades that cover this class of hair. I don't, I believe the idea of a light hair, so that it will be seen at a glance that the word “red” is more illuminating than the less descriptive and more popular term “red.” For in so-called “red-headed” persons there is nearly always more yellow than red.

Speaking of red hair reminds me that there are those who maintain that red hair and great beauty go together usually, and of in-laws and in-laws, when one looks about and considers the number of “red heads” who, in their hair, have absolute beauty in itself, have absolutely no beauty of face or form, while there is the same absence of brain and ability under a red that is under a black or mousy-colored one. That beauty is not always common, but undeniable, and genius is all the more attractive for its lack of ruddy gold locks, but that these things are always common, however, and preferable to one found in the scientific world. Says The Hospital: among the various warning signs given by Dr. Still at London, one of the signs for rheumatism is red hair! He suggests that the color of the hair may be only the index to some other disease, and that the hair in the chemistry of metabolism, which produces a gas favorable to rheumatism, is at any rate, it is one of the many indications that are sometimes of value in leading to the early detection of rheumatism in a child. Here is a descent from poetry to prose with a vengeance!

The banners of the census-takers are just beginning to be heard. A thrifty, bustling Scotch dame, who manages a very thriving

## FATAL LEAD BULLET SEEN

Prof. Charles R. Eastman, Charged With Killing Grogan, Still on Trial.

## BROTHER-IN-LAW A LOVELY FELLOW

Were the Words the Prisoner Used in Dr. Durrell's Hearing—His Man's Expression.

Cambridge, Mass., April 27.—The 22-calibre leaden bullet, which caused the death of Richard H. Grogan, Jr., was handed around for microscopic examination by the jury, and proved an interesting feature early to-day in the trial of Charles R. Eastman, charged with murdering Grogan. The bullet was brought out in connection with the testimony of Dr. Durrell, one of the medical examiners of Middlesex County, who was summoned when Grogan was killed, and was present at two autopsies subsequently held.

The first autopsy was held the day after the tragedy and the second on Jan. 2 last, when the bullet was disintegrated at Mount Auburn Cemetery.

Dr. Durrell testified that after the shooting on the night of July 4 he went to Eastman's house, where Eastman recounted and illustrated how he had stood relative to Grogan when the shot was fired. Eastman had said he was trying to throw the cylinder in the old revolver when it went off accidentally. He had said that when the shot was fired Grogan had a “manish or devilish” expression on his face, and that he had heard the old rifle-fire pistol, and that when it went off Grogan turned round and said: “Charlie, you have shot me.”

At the request of the chief of police, Eastman had shown witness a wound in the thigh of Grogan, and he had said that he had seen it, and that it was not until after Grogan had been shot.

Eastman replied that he should say that it was not so. Some time later the chief of police and the inspector again went to Eastman's cell, and Eastman retraced his former statement, and said that a struggle had taken place, but it was not until after Grogan had been shot.

**INDUSTRIES FOR CANADA.**  
Another Batch of Companies Incorporated and Will Commence Business in the Province.

The announcement is contained in The Ontario Gazette that a charter has been granted to James Henry Mitchell, John A. Currie, Neil McLean, Alexander M. Macdonald, and Arthur C. Macdonald, of the Detroit River and Western Detroit, to incorporate the Pressed Steel and Wheel Company, Limited, with a capital of \$700,000, divided into 70,000 shares of \$10 each.

The head office is to be in Perth, and the company will manufacture pressed steel cars, wheels, railway equipment, iron, steel, manganese, copper and lumber, and contract to construct canals, bridges, build ships and machinery, docks, and other structures.

The Messrs. William Needler, James R. Knowlson, John McLean of Lindsay, Ella Martin and Geo. W. Martin of Toronto, are the provisions of the company, which has been incorporated with a capital of \$300,000, divided into 30,000 shares of \$10 each. The company is to be incorporated with a capital of \$300,000, divided into 30,000 shares of \$10 each. The company is to be incorporated with a capital of \$300,000, divided into 30,000 shares of \$10 each.

**MARCONI COMPANIES' PLANS.**  
Ask British Licenses for Their Wireless Telegraphy System.

London, April 28.—The Marquis of Londonderry, Postmaster-General, received a deputation of the directors of the Marconi companies yesterday. They ask for a license for the transmission of wireless telegrams by the Marconi system, and for the use of the Marconi system in the Marconi system.

**MR. SLATTERY EXPLAINS.**  
Mr. Slattery, census commissioner for West

**Honored Their Comrades.**  
The knights of the grip trembled a farewell dinner in Wab's parlors to Mr. William P. Smith, formerly with Ames, Hold Company of this city, on Saturday evening, on the occasion of his departure for Philadelphia, to join the staff of the Postoffice Library. The affair was a most enjoyable one, and some 40 or 50 of the best known travelers in the city were present. After a sumptuous repast, toasts, speeches, a musical program was enjoyed, and towards midnight the knights departed, after hearty cheers and well wishes to Mr. Smith for success and prosperity in his new sphere.

A REVOLUTION IN COPPER

Syndicate Headed by Senator Clark of Montana Has Discovered a New Process.

RIGHTS SECURED FOR CANADA.

New York, April 28.—The Herald has the following from its London correspondent:

Senator Clark's visit to Europe is likely to confirm his claim to the title of “Copper King.” A newly-discovered process by which bars, sheets and tubes can be manufactured from the crude metal almost at the pit's mouth. This will mean a saving of something like \$100 per ton on the finished product.

The process is electrolytic, and is closely analogous to the electrolytic refining of copper. It is a new process, and is not yet patented. It is a new process, and is not yet patented. It is a new process, and is not yet patented.

**WINSTON CHURCHILL'S SCHEME**  
To Amend Army Plan and Wait for Calmer Times in the Empire.

London, April 27.—The unstable character of the Government's majority recently was a point of interest in the House of Commons during the discussion on money votes.

**PHOTOGRAPHS IN COLORS.**  
Discovery Made by an Amateur at Bern.

Berne, April 28.—The Bund has a long article on the discovery of the secret of color photography by a Bernese amateur, who has been working on the invention for several years, but by a happy accident a few days ago, he discovered the secret, which consists chiefly in the bath process, and is very simple.

**Spring Listlessness**  
Dr. Pitcher Tells What It Means and How to Overcome It.

There are a great many people who find themselves every Spring feeling weak, worn out, listless, languid, lacking ambition and energy. Their head feels heavy. Their legs and back ache, and they can scarcely drag themselves about.

What's the reason of all this? The kidneys overworked during the winter become clogged up and fail to filter the poisons from the blood. The blood instead of being pure is loaded with impurities and poisons the whole system.

There is no blood purifying medicine you can take so effectual in purifying the blood as the kidneys themselves. They are Nature's blood purifiers. Let Dr. Pitcher's Backache Kidney Tablets aid them in their work—strengthen them for the extra duties put upon them, and all your spring tiredness and listlessness will soon disappear and give place to vigor and animation of body and mind.

Remember there is no other remedy quite so good as Dr. Pitcher's Backache Kidney Tablets. They are a little chocolate-coated tablet, pleasant to take and always effective. Price 50 cents a box, at all druggists. The Dr. Zina Pitcher Co., Toronto, Ont.

## THE ODDFELLOWS' SERVICE

A Large Turnout of the Brethren to Mark the Independent Order's 82nd Anniversary.

SERMON BY BRO. REV. G. W. DEWEY

Bro. J. T. Hornbrook, P. G. M., Told of the Prosperity of the Order in a Neat Address.

The 82nd anniversary of the Institution of Oddfellowship on this continent was celebrated yesterday afternoon by the lodges of Toronto District No. 19, I.O.F., by a service held in the Pavilion. Upwards of 800 members of the order gathered at the Oddfellows' Hall, corner of Yonge and Adelaide streets, and the service was commenced by the singing of the “Benedictus.” The service was read by Bro. Rev. G. W. Dewey, pastor of Agnes-street Methodist Church, was taken from Romans, xii. chap. after which Mr. J. T. Hornbrook, P.G.M., made a brief address, pointing out the aims and objects of the order. He also quoted statistics which showed that the membership of the order in Ontario on Jan. 1, 1901, numbered 24,480. The sum of \$256,738 was received, and the total relief given for the past year was \$87,334. The number of members who received sick benefits during the year was 2792, a total of \$18,088. Mr. Hornbrook, in conclusion, referred to the members of the order who had taken part in the war in South Africa, and also endorsed the proposal to build an Oddfellow's Home in Ontario, and presented the committee in possession of sufficient funds to purchase a site, and when this is done it is hoped the members will respond liberally to the appeal for financial assistance. The sermon was delivered by Bro. Rev. G. W. Dewey, who took his text from St. Luke, xii. 47. The speaker explained that there was considerable criticism of the order by the church towards benevolent societies, and on the other hand by organizations towards the church. He believed this antagonism should not exist, and he advised both the church and the societies to work together for their own good. This, he said, could be accomplished by the one having a clear understanding of the objects of the other. Continuing, Bro. Dewey commended the many good things accomplished by the order, and also pointed out some things that had been left undone. In conclusion, he exhorted his hearers to be loyal to their principles. Bro. Dewey's remarks were punctuated with applause, and the service was taken up in aid of the Agnes-street Home Fund, and the sum of \$118 was received.

**BAD WHITBY RUNAWAY.**  
Science Master Dent and Miss Copeland of O.L.C. Thrown Out.

Whitby, April 27.—(Special.)—This town was the scene this afternoon of two runaway accidents, one of which may be attended with serious results. The first occurred near the machine shops of Macdonald & Son, Mr. Dent, science teacher at the Collegiate, was driving with Miss Copeland, an Ontario Ladies' College teacher, when his horse took fright and ran into a tree, completely destroying the buggy and throwing the occupants to the back of the head. Mr. Dent was carried to the hospital, and is severely bruised. Miss Copeland was severely injured. The second accident occurred near the machine shops of Macdonald & Son, Mr. Dent, science teacher at the Collegiate, was driving with Miss Copeland, an Ontario Ladies' College teacher, when his horse took fright and ran into a tree, completely destroying the buggy and throwing the occupants to the back of the head. Mr. Dent was carried to the hospital, and is severely bruised. Miss Copeland was severely injured.
