

MORE ALTERATIONS IN THE DRUG ACT

Druggists May Sell Preparations Containing Small Quantity of Opium.

Ottawa, April 23.—(Canadian Press)—Two amendments to the opium and drug act now before the house were introduced by Hon. N. W. Rowell just before adjournment tonight. The most important of these provides that druggists may sell preparations containing not more than two grains of opium, quarter of a grain of morphine, one-eighth grain of heroin, or one grain of codein, provided that such preparations contain other constituents other than narcotics of medicinal value, and provided also that it is printed on each label of the bottle in large type that it is unlawful to administer the preparation to a child under two years of age.

The other amendment has to do with the penalties to be imposed on persons other than druggists, physicians or dentists who are found guilty of selling these drugs. The maximum fine is fixed at \$1000 and costs, and not less than \$500, while the prison sentence may be one year or less. Both fine and imprisonment may be imposed on a guilty party.

Nothing in the amendments is to affect the provisions contained in the proprietary or patent medicines act.

GOLD FROM ENGLAND MAKES BIG JUMP

Total Imported Into U. S. for First Ten Days in April Was Nearly \$38,000,000

Washington, April 23.—Gold imports from England jumped to nearly \$38,000,000 during the first ten days in April, according to figures made public tonight by the Federal reserve board. The great increase in gold movement from England was shown by the further statement that for the first three months of the year less than \$12,000,000 was sent to this country.

Imports from other countries for the ten days period were negligible, with the exception of Ecuador, which, in its first shipment to the United States, this year sent \$124,874. Outside of this, imports from South America were only \$500. Imports from Asia were \$108,970; from North America, \$242,350, and Europe \$39,008,188. New Zealand delivered \$104,596.

Gold exports for the ten days aggregated \$6,543,402, of which \$3,500,000 went to Argentina and \$2,571,550 to China.

Exports of silver exceeded the imports of that metal for the ten-day period by approximately \$1,000,000. The total imports from all countries were \$3,439,738 against exports of \$7,321,738. Mexico sent \$2,778,988 in silver. Of the exports, the largest shipments, \$5,067,733, went to China. The total imports of silver, by branch divisions, were: From Europe, \$3,804; North American countries \$2,778,988; South America, \$519,878; Asia, \$133,936. EXPECTS GLASGOW TO BECOME DRY

Judge Stewart Doesn't Think Prohibition Will Be Unalloyed Blessing.

SHORTAGE OF HOUSES Problem in Glasgow Much Like That Existing in Toronto.

"The old country will never go dry. The Englishman and the Irishman like his beer too well, and the Scotchman his whiskey." This is the oft-repeated statement optimistically made by wet favorers, since the American continent became a Sahara, but Judge James Stewart of Glasgow, Scotland, who is visiting Toronto and staying at the King Edward Hotel, told The World that he did not agree with this view.

"Speaking in regard to Glasgow, I am almost sure that it will go dry at the next election taking place in November of this year. Of course, I believe it will be the women's vote which will decide the issue. The bill which has been drawn up, and on which the people will have to vote consists of three questions. The first is as to whether liquor will be completely abolished, the second whether the number of licenses for public houses or places where it is sold, should be reduced, and the third as to whether the present system shall be continued.

"One feature of the case that will cause confusion in the eyes of the public is the fact that the bill which the vote will become applicable. As it stands now, the vote is taken by means of a ballot box, and the ward in the city could go dry and the other wet. As there are 47 wards in Glasgow, you can readily see where the thing is going to become a farce unless the whole city goes bone dry. Another thing which will cause trouble and dispute is the amount of license. If the vote demands that the number of bars be reduced, there is going to be trouble over the determining which ones shall go, and a barkeeper who has any sense at all will realize that there will be practically as much liquor as there was as there would be in twice that many, and that, therefore, his license will be worth twice as much.

"Here is where I think graft and corruption will begin to show itself," contended Judge Stewart. "The whole question of dealing with the liquor trade, and which stay, is to be left in the hands of a few men, and these men, as you know, are the missionaries, and their duty is to convert you. You can readily see the inference. I am not a drinking man myself, but I do not think that prohibition will be a good thing for Scotland. Nevertheless, I am almost sure that my native city will hit the Sahara trail."

Lack of houses. Apparently the housing situation, which means the lack of sufficient houses, is becoming universal. A noted Australian statesman, Mr. World recently said that the condition prevailed in that country, and Judge Stewart stated that the same condition will be in force in Glasgow. "There has virtually not been a house built in Glasgow since the war broke the committee of the city council which has gone into this matter reported that, to meet the situation, more than 100,000 houses would have to be built annually to supply the demands of the increasing population, and that we could not catch up in twenty years at this rate."

"But how do you account for the scarcity of houses?" asked The World. "Surely you do not have to meet the emigrant problem, like we do." "No, but during the war we had to meet the munition worker problem," was the response. "The war broke the Glasgow, being a manufacturing center, started to make munitions in earnest, and as a consequence there was a general influx of workers into the city. So many came that they more than doubled the number we lost by the war. It is a peculiar condition of affairs which exists, as back in 1911 there were 22,000 empty houses in the city."

"I suppose the landlords took advantage of the scarcity and raised rents sky high?" was the next query. "Not one cent of a raise during the four years of strife, was the unexpected reply. "The rent was raised in 1918 in the parliament passed a bill whereby landlords were forbidden to raise rents any higher than the amount they were receiving in 1914. Any landlord who had already done any raising, was forced to lower it, and refund all this extra money to the tenant, retroactive from 1914. This year the bill was amended in view of the fact that prices of everything else, so that landlords could increase rents ten per cent."

Glasgow certainly is going in strongly for medical health. Judge Stewart, who is convener of the committee of the city council, has a bill for \$1 million and a half dollars was being spent annually in that city for this purpose. "Of course the expenditure of this money made necessary by the manner in which our people live. The lower or working classes live in overcrowded tenements, small houses, with very few of the sanitary accommodations, which prevail in this country. Only six per cent of the population live in single or two-room houses, and you can see what it means for big families to be cramped up like that."

Judge Stewart, who has been a member of Glasgow's city council for more than twenty years, has been on a visit thru the States and Canada.
