2 That the Manual Training teacher be made supervisor of the entire work 2 - More time and classes.

2.—More time and classes.

This problem could best be solved for the present as follows;

1. A class for the Separate school and an additional class from the public school be given the work.

2. The public and Separate school classes take the work from 9 to 10.30.

2. The public and Separate school classes take the work from 9 to 10.30 a.m., each day and the Collegiate Classes take the work in the afternoon as before.

3. This arrangement would take more of the Manual Training teacher's time from Collegiate teaching (at present twenty minutes per week) but it would increase the manual training grant and considerably diminish the cost of fuel. cost of fuel.
