HOLD ON!

We will surprise you with the NEW AMERICAN SEWING MACHINE,

THE ONLY SEWING MACHINE WHICH HAS A

threading Shuttle, Self

being ready to work as soon as the bebbin is placed in it. If the machine accidentally turns backwards it does no harm, and breaks no thread or needles. The construction of the shuttle and shuttle race is such, that no wear comes on the shuttle as in other machines; consequently, the shuttle does not wear sharp and cut the thread. Also the wearing points of the machine are adjusted on steel centres, thereby avoiding friction, and adding greatly to its durability

The feed can be quickly raised or lowered to adapt it to thick or thin material; also the length of stitch can be regulated from above, while the machine is in motion. The tensions are easily, evenly, and perfectly adjusted, the under tension being self-regulating, and no threading up required in the shuttle. The underthread is drawn from a short, deep bobbin, giving a perfectly even tension, never breaking the thread, making the Lock Stitch, the strongest and best. It runs lighest of any shattle machine. Makes the least noise. Has self setting needle. Has the most room under the arm. Never skips stitches or breaks threads. Is most easily learned. Can be instantaneously adjusted to work from No. 300 to No. 10 cotton. Is thoroughly made in all its parts of the best material, and every machine is warranted by the Company and its
