The plaintiff alleges that the defendant, as marshal at the Orange tea at Bradatland, hit him on the head with a sword, cutting him in defense. It was claimed that the duty of the marshal was to preserve order, that Reeves caught Campbell's horse by the bridle and Campbell by the leg and body and tried to drag him off the horse, and that he only hit a light tap in self-defense. A sharp argument on arms occurred at the close of the trial between the counsel.

morning, after a long and tedious illness of brain trouble. Mr. Farris, who was in the coasting business, was injured about a year ago by being struck by a deal while unloading his vessel. Although he was able to attend to his duties for a time, his health gradually failed. A few weeks ago he was unable to get up, after which he sank very fast.

It is believed that the cause of her illness was called upon to mourn the loss of her father and sincere sympathy is felt for them in the loss of both parents in so short a time.

The funeral will take place on the 23rd instant, was very largely attended, the services at All Saints' Church here and at the grave, Upper Corner cemetery, being conducted by Rev. George L. Freer. The floral tributes placed on the casket were many and beautiful.

FORT FAIRFIELD, July 25.—A commotion was being in a pasture one night recently, where B. Smith had a young colt and his mother, and upon investigation it was found that a moose had visited the pasture and had killed the colt. The pasture is about three-fourths of a mile from the bridge in this village. Mr. Smith is much disappointed, as the colt, though only two days old, was a prospective valuable one. What may have been the same animal created considerable consternation among some of the other farmers in town. The "king of the forest" put in an appearance in the field of Harry Kenney on the east side of the river. Frightened from the visit of the field of Leonard Kenney; when driven from there he rushed to the Slipp farm and began racing through the field where men were cultivating potatoes. As the moose advanced from behind a large pile of rocks the horses which were attached to the cultivator became frightened and went on the run through the field, tearing up the potatoes and prematurely evening the soil. Leaving the Slipp farm the moose made for the woods. Mr. Slipp is of the opinion that the moose as an aid in cultivating the potato crop is not exactly a success. Two of the animals were seen in one of the fields.

Fortunately the steamer "Plover" of the company's boats, was in the wharf, and with a well directed stream from one of her pumps succeeded in extinguishing the fire, which had spread to the office, carpenter shop and store room.

About two thousand dollars worth of hemlock bark was destroyed and three thousand dollars of extract. Fifty men are thrown out of employment.

MONCTON, N. B., July 24.—The Westmorland county council at its semi-annual meeting yesterday adjourned and placed on file a report of the committee appointed at the January meeting to look into the matter of providing a county almshouse. The committee stated that they had visited the Kings county almshouse and also that at Moncton city and recommended that if possible an arrangement be entered into for the care of the county's poor in the Moncton city almshouse, which has only eight inmates, while it has accommodation for forty, which might be increased at small cost. It may be stated that the Moncton almshouse was built with the view of admitting the county poor at a pro rata share of the cost and the disposition has always been to admit individual parishes or the county as a whole on a fair basis of cost. The matter will be further considered by the council at its meeting in January, and several of the councillors expressed themselves favorable to making an arrangement with the city if satisfactory terms could be fixed.

This is the growing time. Just before adjournment of the county council, one of the members in a facetious mood was referring to the fact that themselves \$25 a day for their services and half that amount for life for ex-councillors. Fortunately the motion was not seconded or it is impossible to say what the result would have been. The beauties of the round robin are as yet unknown to our municipal councillors.

FIT CHURCH WITH SERMON 'PHONES.

Every Pew in Chicago Edifice Has Direct Wire.

Pastor Believes He Could Reach the Lazy, Too, But Fears They Would Miss Collections.

Dear persons can now hear the gospel and find the straight and narrow way by the use of the telephone. And for the latest, electrical contrivance it is not necessary for them to even say "hello" before receiving directions to find the road to heaven.

Twenty-five persons sitting in a church and listening by telephone to the sermon being preached from the pulpit some distance away, is the latest novelty. This innovation is found in the settlement known as Lincoln Centre, Langley avenue and Oakwood boulevard, Chicago, under the supervision of Rev. Jenkin Lloyd Jones.

Persons with defective hearing have heretofore been barred by their ailment from the pleasure of enjoying a sermon on Sunday, and could only scan the Monday morning newspapers for the reports of the pulpit utterances. The management of Lincoln Centre has solved the problem and now the applications for membership from deaf persons are coming in at so rapid a rate that they may, in a short time, comprise more than half the audience on a Sunday morning.

The innovation is simply an original application of the telephone principle. On the stand in the pulpit of the large auditorium at Lincoln Centre sits a small box, each side of which is about ten feet square. It contains a small battery and telephone transmitter that has great power. From this box emerges a small cord-covered wire that drops to the floor and passes under the carpet, and runs along the floor beside the tiers of seats to the rear end of the room. From this main wire branch wires run along each row of seats. Thus telephone connection is made between each seat or pew and the pulpit.

A deaf person simply carries a small telephone receiver, no larger than a silver dollar, in his hand, makes connection with the wire in his pew, and placing the receiver to his ear, enjoys the sermon from the pulpit. The preacher is not required to speak any louder than is his custom, and he can sit anywhere in the pew and talk straight at the audience. He is not required to hold a receiver to his mouth while talking. The telephone transmitter has a power of such force that the deaf person can hear at any spot in the pulpit and his words will be distinctly heard by those using the tiny receivers in the audience.

Persons who have a delicacy about their ears, or who are afflicted with defective hearing can conceal the tiny receiver in one hand and place it to the ear in such a way that the observer will think they are only leaning their heads on their hands.

It is only a step further to run a wire from the pulpit to the residences of the church members. Dr. Jones has said of the invention, "and the lazy persons who like to sleep late on Sunday morning could be aroused from their slumbers just before services open, and they could place the receivers to their ears and lie in bed and listen to the sermon. They might satisfy in the prayer and the sermon the pleasure of reading the stock quotations in the Sunday morning paper, and the women could turn from a dry place in the sermon and read the latest cards from the friends of their friends."

"What an ideal condition for lazy persons! The preacher would have a show that he hasn't now. He would have the opportunity of making the absentees hear when he would have none for not coming to church, that is, if they wouldn't become so aggravated that they would throw down the receivers. I don't know just how this would work when a big collection is to be taken up 'in the audience,' if the audience is scattered several miles around."

The telephone idea was suggested by Charles M. Leonard, who placed the apparatus in the church himself and who has charge of it. He is defective in hearing, and for that reason the thought of the "phone came to him. It cost about \$400 to install the little plant.

A white-headed old French-Canadian entered a store adjoining the post-office in a New Hampshire village and requested the aid of the clerk in addressing a letter.

"Ah want him to go to mah nephew, 'Miss Olive Benson, Franklin,'" said he, producing what had once been a square white envelope.

"Sure, how do you spell 'Bedeau'?" asked the clerk, whose scholastic attainments did not embrace a very extensive acquaintance with French surnames.

"Do 'no' how to spell 'Bedeau'?" "No."

"Wal, den," and the old man scratched his head reflectively for some seconds, "you jes' mak' him 'Miss Olive Bedeay.' Dat her name ever since she been got marrie'."
