Josp. Spear spent a day or two at St. Stephen during the week.

Sir Hiram Maxim Says He Can Make Icebergs and Obstructions Audible to Them.

London, July 11.—Sir Hiram Maxim starting from point of view that bats possess a sixth sense enabling them to avoid obstacles in the darkness, has devised an apparatus which is the mechanical analogue of this sense. He believes that if it is fitted to ships it will enable them to detect and locate the presence of obstacles, such as other ships, icebergs and

land, in the dark or fog.

The main idea is that every vessel should be fitted with a means of producing sound waves, and with a sensitive detecting apparatus for receiving and interpreting the echoes of its own sounds reflected from threatening obstacles. The range of the apparatus is to be extended by the use of waves of great amplitude and of a lower pitch than those to which the human ear can respond, and the distance of obstacles is to be gathered from the records, derived from observations of the intensity of the character of the received waves.

The Letang School Prize.

The judges on the school essays on 'Letang as a Canadian National Port,' for which Mr. J. Sutton Clark of St. George, offered two prizes of \$30 and \$20 have awarded the prizes to Miss Margaret L. Duffy and Mr. John E. Dewar of St. George. Both essays were of equal merit, but the presence of a few misspelled words in Mr. Dewar's paper turned the balance in Miss Duffy's favor.

Beacon.

Miss Ray Cawley succeeded in obtaining the first prize given by Dr. Taylor.

Sir William's Swimming Pool.

A distinguishing feature of the landscape on Sir William Van Horne's little island kingdom is his observation tower and swimming pool. This tower is located on the southern point of Minister's island, and commands a broad sweep of St. Andrews bay. It is circular in form, with a 30 ft. floor space, and is open on all sides. It is elegantly furnished in mahogany.

The lower part of the tower is fitted up with bathrooms, and will be supplied with a salt water shower bath. Just outside the tower a swimming pool about 50 feet wide has been hewn out of the solid rock. At low tide it contains about five feet of water, while at high water its depth is about eight feet.

The masonry on the tower was constructed by Mr. Chas. Horsnell, the carpenter work being done by R. D. Rigby.

What Canada Could Do With Wood She Exports

Fifty six per cent. of the pulpwood cut in Canada during 1911 was exported to the United States. This is the fact shown by statistics collected by the Forestry Branch of the Department of the Interior.

The total quantity of pulpwood cut in Canada during 1911 was 1,520,227 cords. The quantity exported amounted to 847,939 cords, while the remaining forty four per cent (672,288 cords) was manufactured in Canada.

The value of this pulpwood was \$5,340,292 (an average of \$6.29 per cord). Had the wood been retained in Canada and manufactured here, it is estimated that the value would have been increased to about \$15,000,000.

Had Canada manufactured into wood pulp all the pulp wood she produces, she could have had enough to supply a hundred and twenty two mills of the average size of those operating in Canada, instead of the fifty four she now has. Quebec could have supplied sixty per cent, more mills than she is now doing, and New Brunswick could have doubled the number of her mills.

A Canoe Trip

Fredericton Gleaner.—Messrs. Frank Phipps and Ray Phinney, of Mount Vernon, N. Y., and George Porges, of New York City, arrived here at an early hour this morning, having come by canoe from St. John. They made the trip in three days. From Fredericton they will ship their canoe to St. Stephen, whence they will go to Camp Utopia, near St. George. They belong to that camp, which was established some years ago and is largely attended by sons of wealthy Americans.

A GREAT COUNTRY.

"No," said the real-estate man, "there's never any sickness round here; the only doctors that ever locate in these diggin's came high starvin' to death, and you'd have to look in the dictionary to find any mention of an undertaker. Those chaps you see over yonder with sledge-hammers are breaking gold nuggets so's they can send 'em home in convenient packages."

STRAW HATS!
