“We have developed the technology for putting building designs on computer. This eliminates hand drawing, and also permits simulations to test a building before it is built. Americans are interested in this capability.

The Free Trade Agreement will make possible new freedoms for many Canadian professionals to offer their services in the U.S. In addition, border crossing restrictions will be relaxed.

I believe young Canadian professionals will have the opportunity to demonstrate their skills in the U.S. while continuing to live in Canada.”

Canadians are getting ready for Free Trade. The Government of Canada is there to help.
