

THE STEEL SQUARE

ANOTHER STEEL SQUARE

Since I wrote up a description of the various squares in the first volume of this work, I have been favored by a correspondent with the following description of a square which is the invention of a man in Augusta, Maine. I have not seen the square, nor have I seen a good illustration of it, but my correspondent says of it, "It is an ingenious tool for framing and can be adjusted so that work may be rapidly and accurately laid out, and it is capable of adaptation to all classes of buildings where wooden frames are used. I have used one for a number of years, and
