

WILSON'S ANTI-BILIOUS and PRESERVING PILLS

are confidently offered to the public as a safe, mild, and yet certain vegetable cathartic and blood cleanser. They are suited to all climates and all constitutions, they exercise their curative properties on a great variety of disorders, because they are composed of a number of vegetable extracts, from which everything but the active medicine itself has been separated, thus allowing a large amount of curative material to be put into very small space.

WILSON'S ANTI-BILIOUS AND PRESERVING PILLS strengthen the Stomach, assist in the process of DIGESTION, prevent the fermentation of food in the Stomach, and thus cure HEARTBURN, WATERBRASH, INDIGESTION, DYSPEPSIA, &c. They not only increase the appetite, but also give the weakened Stomach strength to carry on the work of digestion so that the food taken may answer its intended purpose of giving nourishment to the body, while they stimulate the intestines to carry off the waste matter.

Wilson's Anti-Bilious and Preserving Pills act energetically upon the Liver—they stimulate its secretions of bile, soothe its irritation, and allay the spasm of its duct which often closes its outlet and thus prevents the bile from being carried away into the intestines, producing Congestion of the Liver or a Bilious attack, or in its more severe form, Jaundice and Chronic Liver Complaint; in its milder form, Congestion of the Liver, by not allowing the supply of Bile, which is the natural purgative, to get into the intestines and work off the waste material in the stomach and bowels; induces Costiveness—and Costiveness, if long continued, almost certainly brings on Piles, which are either Blind or Bloody Piles, according to the extent to which they arrive. Piles consist in the enlargement of the veins which carry the blood to the Liver from which the Bile is secreted; if the Liver is clogged up, so that the current cannot flow on, the increased quantity of blood stretches the coat of these vessels especially at their lowest part, that is at the fundamen, till they swell out in bunches and inflame, and then burst in order to give exit to the contained blood.

CARLETON, Dec. 22, 1874.

I have used DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS through a period of four years. I have recommended them to many persons afflicted with headache and bilious derangement, and administered them frequently to those about me, or under my care, with invariable good results. We use little or no drugs besides

in our family; by the timely use of these Pills we are no doubt saved many a trip for a physician. A friend of mine who has a good right to know, said to me, "If I was travelling, and had but one box of Dr. Wilson's Pills, I would not part with it for fifty dollars if I knew I could not get another." I cheerfully endorse his opinion as to their value under the circumstances. My own is, there is no other Pill equal to them.

HENRY G. CASEY.

WILSON'S ANTI-BILIOUS AND PRESERVING PILLS used regularly in small doses prevent the Congestion of the Liver, by keeping up its secretions, and thus prevent Costiveness and its consequence—PILES.

After having used DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS, for some time past, and finding them to be a safe and sufficient remedy for sick headache and bilious attacks, I take great pleasure in stating, that they are the best medicine I have ever taken for the above complaints. I have been subject to headache, bilious attacks for seven or eight years, and never found anything to effectually relieve me until I commenced using these Pills, and I have frequently been relieved in a very short time after taking the Pills.

Petersville.

JOHN JOHNSTON.

WILSON'S ANTI-BILIOUS AND PRESERVING PILLS cure Bilious Headache, as it is commonly called, Sick Headache. This is always produced by want of action of the Liver and Stomach; the fermenting food generates acid which gets into to blood, the retained particles of vitiated bile also find their way into the circulation and through it to the brain and nerves, poisoning them and producing pain in them. A dose of Wilson's Anti-Bilious and Preserving Pills taken at such intervals as the system requires, prevents these distressing symptoms, or if it has gone too far, one or two full doses are effectual for a cure.

But more than this, WILSON'S ANTI-BILIOUS AND PRESERVING PILLS are effectual in preserving the system from attacks of Diarrhoea, which is almost always produced by derangement of the stomach and liver allowed to go on unchecked. It is in almost every case preceded by nausea, occasional colicky pains, and a feeling of want of circulation in the bowels, something like a load there. If on the first of these symptoms making themselves felt, a full dose of the Pills be taken, they will carry this off by cata-
