

## RESOLUTIONS ADOPTED

That the Federal and Provincial Governments be urged to take steps to encourage as far as possible, both by instruction and by giving facilities for obtaining nursery stock, a more general interest in tree planting, especially on such lands as are at present unfit for ordinary agricultural purposes.

That in granting Crown patents of wood lands a proviso should be inserted that at least ten per cent of the area conveyed should be retained by the patentee as a permanent wood lot.

That in view of the many important respects in which the water supply affects the industries of the country, particularly agriculture, manufacturing, water power for the generation of electricity, the convention would urge that special means should be taken for the preservation of the forests on watersheds, so as to conserve throughout the year the even and constant flow of streams dependent thereon.

That the Government be requested to place forest trees and forest tree seeds imported for afforestation purposes on the free list.

## A Well-Managed Creamery

We hear of big averages for last year at the cheese factories, where the prices per 100 lbs. paid for milk delivered has averaged in most cases over \$1.00. But some creameries can show a good average also. The Princeton Creamery, located at Princeton, in Oxford county, is one of these. During 1906 68 tons of butter were made mostly on the cream-gathering plan, having a total value of \$30,746.46. The average monthly over-run was 17 lbs. to 100 lbs. of fat, and the average monthly price 23.81 cents per lb.

This creamery paid its patrons 90 cents per 100 lbs. of milk for each season, while a neighboring cheese factory only paid \$1.01 per cwt. of milk. If the estimated value of 10c. per cwt. of the skim-milk, which the patrons retained at home for their stock is taken into account, it will be seen that the creamery is ahead of the cheese factory in giving profitable returns to the patron.

The manager of the creamery last year was Mr. H. Weston Parry, one of our most expert butter-makers.

## Corn Fritters

Two eggs well beaten, salt and pepper, one cup canned corn, three tablespoons flour, one tablespoon milk. Fry in butter or dripping, turn to brown on other side.

## Have You Grain To Harvest?

THEN you will be interested in harvesting machines—the certain, sure, dependable kind. You will be interested in securing a binder which will do the work evenly, quickly and with the least possible strain upon man, team, and machine. In short, you will want a Deering binder.

Being constructed so largely of steel, it combines greatest strength and durability with lightness.

Considering its adaptability to all kinds of land and to every grain crop, it is withal an exceedingly simple machine, being easy to handle and keep in order.

Perhaps the strongest feature of the Deering is its capacity to cleanly gather the grain.

The many and delicate adjustments of the reel make it possible to gather up tangled down grain almost equally as well as standing grain.

Deering binders are made to cut 5, 6, 7 or 8 feet wide.

The wide-cut machine is specially

**CANADIAN BRANCHES: Calgary, London, Montreal, Toronto, Ottawa, Regina, St. John, Winnipeg.**

**INTERNATIONAL HARVESTER COMPANY OF AMERICA,**

(INCORPORATED)  
CHICAGO, U. S. A.

adapted to the use of the large grain grower.

Its capacity is remarkable.

Capacity in a binder, by the way, is a most valuable quality in the busy, all too short, harvest days.

We have only space to touch upon a few of the Deering good points here.

Every intending purchaser of a binder should secure the Deering book and study the machine.

The Deering line of harvesting machines is complete and includes, besides grain and corn harvesting machines, binder twine mowers, tedders, sweep rakes, slide delivery rakes, hay loaders, stackers. Also a complete line of tillage implements and seeding machines, comprising disk drills, shoe drills, hoe drills, cultivators and seeders, smoothing, spring tooth and disk harrows, land rollers and scufflers. Also gasoline engines, cream separators, hay presses, wagon, sleighs, and manure spreaders. Call on the local Deering agent and discuss with him the qualities and advantages of Deering harvesting machines.

Any of the following branch houses will supply you with the Deering catalog.

## How Do You Spell Your Name ?

It matters NOT where you live  
**IF YOU HAVE PIMPLES,  
BLACKHEADS**

Eczema, Blotches, Freckles, a sallow, muddy or greasy complexion, or any skin diseases, send us your name and address and we will send you FREE a full 2 weeks' treatment of SKIN TONIC; a quick, positive and permanent cure for all skin diseases—a marvellous Flesh Tonic and Complexion Beautifier.
