Entries and Letters being Received that Show Great Interest-Another \$200 Contribution to the Prize List.

That interest in the dairy farms ompetition that will be held this year threighout Ontario by Farm and Dairy is increasing, is shown by the fact that letters, enclosing entries, or and

tact that letters, enclosing entries, or asking for particulars about it, are now being must every by Farm and pairy in almost every by Farm and pairy in almost every will information. Although a number of informal entries had been received, the first letter containing the fee of \$2.00, and an entry came to hand last week from Mason Bros. Tyrell, Ont., in Norfolk Co., which is in district number 4. Their farm is known as "The Maples." Shortly afterwards, Mr. Victor Begg, 1 Shortly afterwards, Mr. Victor Begi of Moose Creek, in Stormont Co of Moose Creek, in Stormont Co., which is in district number 1, called years ago when it was practically all bush and swamp. He has cleared it and underdrained it until it is now one of the best farms in his section of the country. It consists of about 100 acres. The milk is shipped to Montreal.

OTHER ENTRIES

Mr. W. C. Good, of Brant Co., who is well known through his connection is well known through his connection with the Dominion Grange, has applied for an entry form and is a likely competitor. Mr. John Murphy of Silver Hill, in Norfolk Co., which is also in district number 4, is entering his favor of 170 areas. his farm of 170 acres.

From present indications, the keenest competition this year is likely to be in district number 2, between Kingston and Toronto as more entries have been received from this district than been received from this district than from any other. Recently an editorial representative of Farm and Dairy, while travelling in Prince Edward County, was much impressed by the large number of fine farms and farm buildings that he noticed. If the farm-ers in this county enter the competi-tion as they should, some of them will stand high in the prize list. One farm-

dairy farms er who intimated his intention co competing, was Mr. A. D. Foster, of Bloomfield. Mr. Foster's buildings may not be equal to some others that have been entered but he has a Holstein herd that will be hard to beat and his farm is an exceptionally good one. Another competitor in district num-ber 2, will be Mr. R. Watson of Harwood. Mr. Watson is just getting started in the breeding of Holsteins and intimates that he is entering the competition as much with the idea of obtaining pointers from the judges as in the hope of winning a prize

WILL INCREASE VALUE OF FARM While Increase value of Farm One farmer while discussing this competition with Farm and Dairy pointed out that any farms that win a prize will be worth considerably more money afterwards as the very which is in district number 4; causes in the office of Farm and Dairy, Peter-more money afterwards as the very boro, and paid his entry fee of \$2, and fatth that they have won a price in entered his farm. Mr. Begg comments such a competition will consider that they have won of the construction of the cons petitor in district number 1 is Mr. Jas. McGinn, of Dixon's Corners, in Dundas Co., who has written asking for particulars about the competition

A GENEROUS CONTRIBUTION As the expenses of conducting the competition are going to be very heavy owing to the fact that the farms will have to be judged twice, making a double expense for the salar-

a double expense for the salar ies and travelling expenses of the judges, to say nothing of the furnishing of the 60 gold and silver medians. nishing of the 60 gold and silver med-als that will be given as prizes, the committee of management have been very much pleased at the generous contributions to the expenses that are being received. The latest contribution came to hand this week in a letter from the Empire Cream Separator Co. contributing \$200 to the prize list. The letter making this contribution was as follows:

Editor Farm and Dairy.—We have read with great interest the articleappearing in Farm and Dairy in reappearing in Farm and Dairy in re-gard to the dairy farms competition which you are arranging to hold in Ontario during the next three years. The competition which you held in

the district around Toronto two years ago was shown to be such an excellent thing for the dairy farmers of the dis trict that we considered the contri we made at that time the best possible way for us to spend what money we did for the benefit of the

dairy industry.

The farmers of Ontario are learning more, year after year, that dairying can be made, and should be made the back-bone of their income. The largeback-bone of their income. The large-ly increasing value of the dairy pro-ducts produced in this country and ex-ported from this country is the best

vidence of this fact.

We are very glad to notice in the alloting of points to the different de-partments of farm work that you have given special prominence to sanita-tion, and to the necessity for having good ice and water for taking care of the dairy products. Attention to the proper method of taking care of milk and cream will do more towards in-creasing the value of the product from the dairy cow, than any other one line of effort, and if the competition will emphasize this to the dairy farmer, we consider that in this one feature alone the competition will be well worth while

We shall be very pleased to contri-bute the sum of \$200.00 towards the prize list of your competition and its expenses, and it will be a pleasure to us to be of what assistance we can in any other line which you may suggest. Wishing you every success with it, We are your ways trule.

We are, yours very truly, EMPIRE CREAM SEPARATOR CO. OF CANADA, LIMITED.

(SGD.) H. C. SPARLING.

THE SMALLER COMPETITION

As our reads are aware, Farm and Dairy is conducting a smaller competition in Counties of Durham and eterboro open to all classes of farms. In this comp etition there is no restric tion as to the number of cows that shall be kept. Two gold and three silver medals are being offered for the best farms in each county. As yet no entries have come to hand from Peterboro Co., although several are expected shortly. Several have been received ed shortly. Several have been received from Durham Co., including one from Alexander Smith, of Enfield, Albert Tamblyn, of Orono, and Thomas

Baker, of Solina, the president of the Farmers' Institute.

In Durham Co. Messrs. Arthur Vance, of Ida, and H. C. Hoar, of Hampton, have consented to assist Farm and Dairy in the management of the smooth of the s Farm and Dairy in the management of the special competition in their county. They are both Farmers' Institute officers. In Peterbor County, Mr. Frank Birdsall, of Birdsall, and Mr. John N. Telford, of Bridganorth, the presidents of the East and West Peterbor Farmers' Institutes, will be the committee of management that will assist East. will assist Farm and Dairy

SEND IN YOUR ENTRIES On page 24 in this issue, appears an entry form which intending coman entry form which intending com-petitors are asked to fill in and for-ward with their entry fees as speedily as possible. Our readers are again urged not to be backward about enterurged not to be backward about entering this competition and also to tell
their friends about it. The directors
of the South Waterloo Agricultural.
Society, have taken hold in their section in the right spirit. They have
appointed a committee from among
their members to interview leading
dairy farmers in their section to urge
than to commands. Sinch enterprise on to compete. Such enterprise on their part merits success. The officers of a number of farmers' institutes purpose discussing this matter at their annual meetings this month.

Again we would urge farmers not to e afraid to compete. While their farms may be weak in some branches, they probably are strong in others, which will help to even matters up and thus enable them to make a good and thus enable them to make a good showing. They should remember, also, that where farms score low, the scores will not be published. Help us to make this competition a great success by entering your farm and by getting your neighbors to enter theirs.

Hallman's Holstein Sale

In spite of the rain a fair crowd of eager buyers assembled at Mr. A. C. Hallman's place, Breslau, on May 27th, to attend the sale of Holstein cattle and Tamworth swine. The Holsteins offered were a choice lot. Mr. Hallman deserves commendation for allowing the sale to continue in the enforced absence of so many good huyers.

Heifer calves were much in demand. Prices for these were generally well up to the hundred mark. The highest price paid was \$305 for Agusta Acme
