

YOU like to know that your cream separator is so simple and finely made that, if necessary, you can order any part and be sure it will fit perfectly.

We insist upon exactness for every part of every Sharples Tubular cream separator.

Constant tests keep the making of Tubular parts perfect. One test, recently made, was both unusual and positive proof of Tubular exactness.

We took twenty Tubular Cream Separators, at random, from our immense warehouses. They were already boxed for shipment. We had those twenty cases opened. We had those twenty Tubulars taken entirely apart. Every part was taken from the frames and separated into single pieces, down to the smallest screw and spring. *All the separate unmarked pieces, from those twenty Tubulars, were mixed together*

Mixed The Parts Ran Perfectly

The supply can is set low and on the side of Sharples Separators. It is easy to fill, always steady, and need not be lifted off to remove either the milk and cream covers or the bowl from the machine. The supply cans on all other separators are directly over the bowls and must be lifted off before bowls can be removed from such machines, which is doubly unhandy if the can is full.

in a single heap. Then we had those twenty Tubulars put together again. *Every part that went into them was fished, at random, out of that mixed up pile.* Just

one chance in twenty that any piece was put back into the machine from which it had been taken.

Then we sent those twenty Tubulars to our big testing room, where every Tubular is given an actual running test, and had *every one of the twenty tested. Every one of them ran perfectly*

showing that every part was perfect and interchangeable.

Tubular perfection, simplicity and superiority have made Tubulars so popular throughout all Canada that the manufacture of Tubulars has become one of Canada's leading industries.

Tubular sales for 1908 were way ahead of 1907—out of sight of most, if not all, competitors combined. 1909 will be better yet.

Write for Catalog No. 193, fully describing the finest cream separator money can buy.

For Spraying

Fruit Trees, Shrubs, Bushes and Plants, there's nothing to equal

EUREKA
COMPRESSED AIR, FOUNTAIN SPRAYER

It requires but one pumping to empty entire contents of sprayer. The lever valve is operated by foot while the nozzle is in use. It is simple to use, and the parts are easily replaced. It is the most reliable and economical sprayer yet invented.

THIS IS THE SHEET METAL AGE

Fire or lightning are no menace to the safety of a structure protected by the new "Galt" Steel Shingles and Galt "Art" Sidings.

The "Galt" is not the first shingle—but it's the first perfect shingle. Why shouldn't it be—haven't we the weaknesses of all others to warn us?

The fiercest gale can't drive rain or snow through the Gale-proof, Closed-end, Side-locks, or the continuous overlapping and interlocking bottom lock of the "Galt" Shingles.

Covered nailing flanges both top and sides—no wind can loosen them. No openings or cleats. Easiest and quickest to lay. Handsome Bold Gothic Tile patterns—fit for a palace. Best British Galvanized Steel Sheets—Guaranteed to last a life time. Ask for Catalog "B-3"—It tells all about them.
