The Road to Laughtertown.
Oh, show me the road to Laughtertown,
For I have lost the way.
I wandered out of the path one day,
When my heart was broken, my hair turned grey.
And I can't remember how to play,
I've quite forgotten how to be gay.
It's all through moping and weeping they say,
Oh, show me the road to Laughtertown,
For I have lost the way.
Would you learn the road to Laughtertown,
Oh, you who have lost the way?
Would you have a young heart though your hair be grey?
Oh learn from a little child each day,
To never be woe and play his part,
And watch the life of his laughter gay,
And follow his dancing feet as they stray,
For to know the road to Laughtertown,
You must learn from the little child each day.

The Medicine Flask.
In a pleasant little home in one of the apartment houses on the east of New York, sat a happy young mother with her two children, a little girl of four and a baby boy. The father, who was a small tradesman, was away taking fall orders it being now about the first of September, but he was expected home the next day, and with a good heart she held her daughter on her knee and told her, papa would be home in the morning. And the little one laughed and prattled sweetly as she kept to say, 'Now I say me,' added, 'Please, Dad, take care of papa and bring him safe home.'
The mother tucked her up and gave her a good-night kiss, smiling to see the eyelids droop upon the rosy cheeks, then sat down to finish a little dress for her, humming a happy song.
Meanwhile the train sped over the rails, bringing the husband homeward. In the early morning he landed at Jersey City, crossed the ferry, and hurried with joyous steps to greet his wife and children. The trip had been a success. A goodly number of orders had been secured. There was nothing to mar the pleasure of homecoming.
His wife met him at the door with uplifted finger. 'Hush! she said, the children are asleep yet. Come into the kitchen and let us have a good talk before Mary is up.'
He set down his bag and hung his overcoat on a chair, first taking a traveling flask from the pocket and laying it on the table.
'Have you needed that?' asked his wife.
'Oh, no,' was the answer. 'Have been perfectly well, but it is a good thing to have in case of trouble. Can do no harm and may be very useful.'
Then they passed through into the kitchen, and were soon absorbed in happy chat.
How long it lasted they never knew. It was interrupted by a fall in the dining room, and looking in, they saw little Mary senseless upon the floor.
'What can be the matter?' cried the father, catching up the little white figure. 'See, she has on one shoe and heard my voice and started to come to me.'
'Oh, John,' gasped his wife, 'the whiskey! Look!' and she held up the flask, from which three or four ounces were taken.
The glittering glass was evidently caught Mary's eye, and childlike, she had stopped to taste, though how she had swallowed such a draught no one has ever been able to understand. The father sank white and trembling into a chair. The mother caught the child from him and shook her violently to awaken her, but in vain. The head fell back and the arms dropped heavily.
'We can do nothing. We must have a doctor!' she cried.
He staggered to his feet and reached for his hat. 'We will take her to one, not wait for us to come,' he said.
The still sleeping baby was given into the care of a neighbor, and wrapping little Mary in a shawl, they rushed into the street. At the end of the block they met a policeman who told them the quickest way was to Bellevue Hospital, and thither they hastened.

The French War department has invented and perfected a dynamite dart for use by airmen. These missiles of destruction may be dropped in handfuls and are so constructed that the business end will always lead first. The internal missile to be announced will probably be a rocket that will bring an airship to earth faster than it went up. The inventors intend to destroy their fellow-men are always on the alert and keep well abreast of the times.

The child was carried into the baby bed, and the fight for life began. Day doctors and nurses worked on the little form, while the sorrowful parents looked helplessly on. A high Avenue physician came and sat on the bed murmuring, 'This is too bad, too bad,' and raked his brain for remedies. It was by his aid that electricity was applied and the vain hope of preventing the death of the child, which involved all the rest of the brain, from extending to the motor centres which controlled the muscles of the chest and throat.

A Mother's Duty to Her Daughter.
HER HEALTH MUST BE CAREFULLY GUARDED AS SHE COMES TO WOMANHOOD.
Every mother who calls to mind her own girlhood knows how urgently her daughter is likely to need help and strength during the years between early school days and womanhood. Then it is that growing girls droop, become fragile, bloodless and nervous. Nature is calling for more nourishment than the blood can supply, and signs of weakness are plainly visible in their pale cheeks, weak and aching back, a languid step, fits of depression, nervousness and a dislike for proper food. These signs mean anemia—that is bloodlessness.

The watchful mother takes prompt steps to give her girl the new, rich blood her weak system is thirsting for by giving her Dr. Williams' Pink Pills, because so many thousands of feeble, anemic, unhappy girls have been transformed into robust women through the rich red blood these Pills actually make. No other medicine has ever succeeded like them, and thousands of mothers have proved their worth. The case of Miss Marguerite Boisclair, St. Jerome, Que., proves the truth of these statements. Miss Boisclair is sixteen years of age, and says that since the age of thirteen or fourteen she had been afflicted with extreme weakness, and seemed to be going into a decline. The least effort left her weak and breathless, so that she was unable to do any household work. She had no appetite, suffering from terrible headaches, dizziness and some times fainting spells. She was under medical treatment, but made absolutely no improvement, in fact seemed to be steadily growing weaker. When her case seemed hopeless a lady friend advised the use of Dr. Williams' Pink Pills. After taking a few boxes she began to gain new strength, and after the continued use of the pills for about two months she was again as well and strong as ever she had been, and has since enjoyed the best of health.

Sold by all dealers in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Agriculture and Better Roads.
The announced policy of the Ottawa Government to assist and co-operate with the Provincial Governments in the creation and maintenance of better roads and the advancement of agriculture is commendable. Hitherto enormous sums have been contributed by the Dominion for building of railways, canals, and the subsidizing of railways, in dredging the harbor works, in bonuses to the steel industry, for militia and defence, to the entire neglect of the means by which the products of the farms should reach the railway stations or shipping ports on the way to market. And yet farming is the principal industry of the Dominion, and the largest body who contribute to the revenues of the country are the farmers.
It is high time, therefore, that the great farming industry should receive a larger measure of consideration from the powers that be at Ottawa, not forgetting what has been done and attempted in the way of providing instruction in agriculture, horticulture, dairying and other branches, in developing cold storage and in other ways. Co-operation and money aid together for better agriculture and better roads comes in as a timely, appropriate and well deserved forward step at the present time. Better roads are a necessity for our farmers and will benefit them more than any other class.

'In His Father's Suit.'
Colonel Winter Wimberley, of Macon, Ga., enjoys a wide reputation as a story teller in Georgia, that land of story tellers.
Colonel Wimberley was once engaged in a case in which the plaintiff's son, a lad of eight years, was to appear as a witness.
When the youngster entered the box, he wore shoes several sizes too large, a hat that almost hid his face, long trousers rolled up, so that the lacy knees were at his ankles, and to complete the picture a swallow tail coat had to be held, to keep it from sweeping the floor.
This ludicrous picture was too much for the court, but the judge, between his spasms of laughter, managed to ask the boy his reason for appearing in such a garb.
With wondering look, the boy fished in an inner pocket and handed out the summons from it, pointing out a sentence with solemn mien, as he did so, 'To appear in his father's suit.'

Do you know that of all the minor ailments colds are by far the most dangerous? It is not the cold itself that you need to fear, but the serious diseases that it often leads to. Most of these are known as germ diseases. Pneumonia and consumption are among them. Why not take Chamberlain's Cough Remedy and cure your cold while you can! For sale by all dealers.

RED ROSE TEA
"is good tea"
In Actual Use No Tea is Cheaper Than The 40¢

Unhealthy for the Fish.
Dr. William Osler, of Toronto, who is now professor of medicine at the University of Oxford, in speaking against tobacco, said it would be a good thing, if all the beer and spirits in England could be thrown into the sea one day, and if, on the second day, you dumped all the tobacco there too, it would be very good for every one in England—although unhealthy for the fish. No boy ever began smoking because he liked it but generally because either he feared being laughed at by the boys as afraid to smoke or because he thought that by smoking he would look like a great man when all the time he succeeds only in looking silly.
Don't let yourself be persuaded, but just make up your mind for yourself that you don't want to smoke (till you are grown up) and stick to it. That will show you to be a man much more than any stammering about with a half-smoked cigarette between his lips. The other boys will in the end respect you much more, and will probably in many cases secretly follow your lead. If you do this, you will already have done a good thing in the world, although you are only a boy. From that small start you will most probably go on and do big things as you grow up.
Minard's Liment cures Dandruff.

Tomb of Wellington.
Although just sixty years have elapsed since the death of the great Duke of Wellington, it is only within the last fortnight that the splendid tomb designed for him by Alfred Stevens a few months after his departure, and commenced in 1857, has been completed by the placing on the memorial of the bronze equestrian statue, which it was to crown. The sum voted for the work, \$50,000, proved quite inadequate, and Stevens, after spending much of his personal money on the work, died broken in health, in 1875.
The heartbreak was due partly to annual work, but largely also to his troubles with the well known Duke of Devonshire's Very Reverend Henry Milman, who, supported by the Chapter of the Basilica, absolutely refused to sanction the equestrian statue, which was one of the features of the monument, on the ground that a horse, even in statuary, could not be admitted to the Cathedral. Repeated attempts were made, after Duke Milman's death, to overcome this objection on the part of the Cathedral Chapter, but without avail, and in fact it was not until the admission to the chapter of the broad-minded Canon Lang, now Archbishop of York, that the objections to the equestrian features of the memorial were by degrees overcome, at his instigation.

A Bald-Headed Woman.
SUCH IS HER CROWN OF BEAUTY LOSES IN LOVE AND MARRIAGE.
Hair is certainly most necessary to women. Who could love and marry a bald headed woman? What charm could anyone stray to offset such a disfigurement?
A woman's goal is usually love and marriage. Her crowning glory is her hair. The loss of her hair mars her beauty, happiness and success. Yet, right here in Wolfville, there are thousands of women who are neglecting or injuring their hair to such an extent that it is only a matter of time when it will be utterly ruined.
Many women destroy the beauty of their hair through thoughtlessness or ignorance of certain facts. They use curling irons over-heated, or to excess, which destroys the natural oil of the hair, causing it to split, break, and come out. They do not shampoo their hair often enough or too often. They use soaps or preparations that contain ingredients positively harmful to the scalp and hair.
As a result of such treatment dandruff is created, the hair loosens, loses color, falls out and baldness commences, unless proper and prompt precautions are taken in time. Then again, microbes and certain diseases bring about unhealthy scalp and hair conditions.
Almost any woman may rid herself of dandruff and diseased scalp and hair if she will but use the right remedy. We have that remedy and we will positively guarantee that it will either cure dandruff and baldness or it will not cost the user anything.
That's a pretty broad statement but we will back it up and prove it with our own money. We will return your money if you do not find that Rexall's '31' Hair Tonic is an entirely satisfactory remedy that will promote hair growth and overcome scalp and hair troubles; that it will grow hair on bald heads, unless all life in the hair roots has been extinguished, the follicles closed, and the scalp is glazed and shiny. It gets its name from the fact that it grew hair in 93 out of 100 cases, where it received a thoroughly hard, impartial, and practical test. We want you to try Rexall's '31' Hair Tonic at our risk. You surely cannot lose anything by doing so, while you have everything to gain. You had better think this over, and then come in and see us about this offer. You will be well repaid for your visit to our store. Remember, you can get Rexall Remedies in this community only at our store—The Rexall Store, A. V. Rand.

For Diseases of the Skin.
Nearly all diseases of the skin such as eczema, tetter, salt rheum and barbers' itch, are characterized by an intense itching and smarting, which often makes life a burden and disturbs sleep and rest. Quick relief may be had by applying Chamberlain's Salve. It itches the itching and smarting almost instantly. Many cases have been cured by its use. For sale by all dealers.

In your little bride timid and backward with your people?
Not a bit. She has already begun to teach sister how to look stylish and mother how to cook.

KING COLE TEA
YOU'LL LIKE THE FLAVOR.

Ardent tea-lover though you may be, you have yet to learn a deeper enjoyment of your favorite refreshment. The one quality about all others which has endeared tea to your taste has been multiplied. Flavor has been developed to a truer fullness, richer smoothness.
You'll learn how very, very much this means to you in real tea-joy when you sip your first cup of King Cole Tea.
Your only regret will be that the expensive study of flavor-blending which resulted in King Cole Tea wasn't started sooner.
